Understanding Russianness Risto Alapuro, Arto Mustajoki, Pekka Pesonen, 2011-08-17 In today's world where other cultures are being tapped to a greater extent than ever before, the processes of mixing and matching are especially relevant in making sense of Russia. Not only do borrowing and assimilation, interaction between the familiar and the alien, constitute a venerable tradition in Russian culture, but during the two last post-Soviet decades a notable Western influence has become apparent. This book provides means for understanding Russianness in this new situation. By bringing together Russian and Western, eminent and younger scholars it provides insights both from inside and outside. By extending its perspectives to three fields – linguistics, cultural studies, and social sciences – it covers different dimensions of creative misunderstandings, hybrids, tensions and other modes of adaptation in the Russian culture. By offering concrete case studies it avoids easy stereotypes, deconstructs clichés, problematizes accepted truths, and identifies points of interaction between Russia and the West.

New Media in New Europe-Asia Jeremy Morris, Natalya Rulyova, Vlad Strukov, 2016-04-14 This volume offers an in-depth investigation of the role of new media in the political, social and cultural life in the region of Europe-Asia. By focusing on new media, which is understood primarily as internet-enabled networked social practice, the book puts forward a political and cultural redefinition of the region which is determined by the recognition of the diversity of new media uses in the countries included in the study. This book focuses on the period prior to the advent of 'world internet revolutions', and it registers the region at its pivotal moment—at the time of its entry into the post-broadcast era. Does the Internet aid democratisation or is it conditioned by socio-political norms? Has the Internet changed politics or has it had to fit existing political structures? Has the use of digital technologies revolutionized election campaigns? How is hyperlinked society different from society prior to the advent of the web? How do ordinary people actually use the Internet. These and other pressing questions – crucial to understanding the post-socialist world – are investigated in the current volume. This book was published as a special issue of Europe-Asia Studies.

The book will be interesting to a wide range of readers interested in the problems of the development of digital platforms and the developing branch of law and science – the law of digital platforms.
