Foundations of Voice Studies Jody Kreiman, Diana Sidtis, 2011-03-21 Foundations of Voice Studies provides a comprehensive description and analysis of the multifaceted role that voice quality plays in human existence. Offers a unique interdisciplinary perspective on all facets of voice perception, illustrating why listeners hear what they do and how they reach conclusions based on voice quality Integrates voice literature from a multitude of sources and disciplines Supplemented with practical and approachable examples, including a companion website with sound files at www.wiley.com/go/voicestudies Explores the choice of various voices in advertising and broadcasting, and voice perception in singing voices and forensic applications Provides a straightforward and thorough overview of vocal physiology and control

Think Like a Monk Jay Shetty, 2020-09-08 Jay Shetty, social media superstar and host of the #1 podcast On Purpose, distills the timeless wisdom he learned as a monk into practical steps anyone can take every day to live a less anxious, more meaningful life. When you think like a monk, you'll understand: -How to overcome negativity - How to stop overthinking -Why comparison kills love -How to use your fear -Why you can't find happiness by looking for it -How to learn from everyone you meet -Why you are not your thoughts -How to find your purpose -Why kindness is crucial to success -And much more... Shetty grew up in a family where you could become one of three things—a doctor, a lawyer, or a failure. His family was convinced he had chosen option three: instead of attending his college graduation ceremony, he headed to India to become a monk, to meditate every day for four to eight hours, and devote his life to helping others. After three years, one of his teachers told him that he would have more impact on the world if he left the monk's path to share his experience and wisdom with others. Heavily in debt, and with no recognizable skills on his résumé, he moved back home in north London with his parents. Shetty reconnected with old school friends—many working for some of the world's largest corporations—who were experiencing tremendous stress, pressure, and unhappiness, and they invited Shetty to coach them on well-being, purpose, and mindfulness. Since then, Shetty has become one of the world's most popular influencers. In 2017, he was named in the Forbes magazine 30-under-30 for being a game-changer in the world of media. In 2018, he had the #1 video on Facebook with over 360 million views. His social media following totals over 38 million, he has produced over 400 viral videos which have amassed more than 8 billion views, and his podcast, On Purpose, is consistently ranked the world's #1 Health and Wellness podcast. In this inspiring, empowering book, Shetty draws on his time as a monk to show us how we can clear the roadblocks to our potential and power. Combining ancient wisdom and his own rich experiences in the ashram, *Think Like a Monk* reveals how to overcome negative thoughts and habits, and access the calm and purpose that lie within all of us. He transforms abstract lessons into advice and exercises we can all apply to reduce stress, improve relationships, and give the gifts we find in ourselves to the world. Shetty proves that everyone can—and should—think like a monk.

A Guide to Hazard Identification Methods Frank Crawley, 2020-04-21 A Guide to Hazard Identification Methods, Second Edition provides a description and examples of the most common techniques leading to a safer and more reliable chemical process industry. This new edition revises previous sections with up-to-date, linked sources. Furthermore, new elements include a more detailed account of purpose, Black Swan events, human factors, auditing and QA, more examples and a discussion of major incidents, HAZID and task analysis. Outlines HAZOP - a tried and tested technique Discusses HAZID - a newer technique which has not been adequately described elsewhere Includes eight new techniques not in first edition Illustrates each tool with practical examples Shows how many techniques are used under the larger umbrella of hazard identification

Hardware and Software: Verification and Testing Valeria Bertacco, Axel Legay, 2013-10-28 This book constitutes the refereed proceedings of the 9th International Haifa Verification Conference, HVC 2013, held in Haifa, Israel in November 2013. The 24 revised full papers presented were carefully reviewed and selected from 49 submissions. The papers are organized in topical sections on SAT and SMT-based verification, software testing, supporting dynamic verification, specification and coverage, abstraction and model presentation.

Superstition and Force Henry Charles Lea, 1892

Student's Book of College English David Skwire, Harvey S. Wiener, 2006 This classic rhetoric-reader-handbook offers a complete course in writing in the rhetorical modes in one comprehensive volume.

Handbook of Test Security James A. Wollack, John J. Fremer, 2013-09-02 High stakes tests are the gatekeepers to many educational and professional goals. As such, the incentive to cheat is high. This Handbook is the first to offer insights from experts within the testing community, psychometricians, and policymakers to identify and develop best practice guidelines for the design of test security systems for a variety of testing genres. Until now this information was scattered and often resided inside testing companies. As a result, rather than being able to learn from each other's experiences, each testing entity was left to re-create their own test security wheel. As a whole the book provides invaluable insight into the prevalence of cheating and "best practices" for designing security plans, training personnel, and detecting and investigating misconduct, to help develop more secure testing systems and reduce the likelihood of future security breaches. Actual case studies from a variety of settings bring to life how security systems really work. Examples from both domestic and international programs are provided. Highlights of coverage include: • Best practices for designing secure tests • Analysis of security vulnerabilities for all genres of testing • Practical cheating prevention and detection strategies • Lessons learned in actual security violations in high profile testing programs. Part I focuses on how tests are delivered for paper-and-pencil, technology-based, and classroom testing and writing assessment. Each chapter addresses the prevalence of the problem and threats to security, prevention, and detection. Part II addresses issues essential to maintaining a secure testing program such as planning and monitoring, physical security, the detection of group-based cheating, investigating misconduct, and communicating about security-related issues. Part III examines actual examples of cheating-- how the cheating was done, how it was detected, and the lessons learned. Part III provides insight into security issues within each of the Association of Test Publishers' four divisions: certification/licensure, clinical, educational, and industrial/organizational testing. Part III's conclusion revisits the issues addressed in the case studies and identifies common themes. Intended for organizations, professionals, educators, policy makers, researchers, and advanced students that design, develop, or use high stakes tests, this book is also ideal for graduate level courses on test development, educational measurement, or educational policy.

Gleanings in Bee Culture , 1928

Live Without Pain: A New Theory on What's Wrong with You and How to Fix It Simon King, 2008-12-04 This is the UK version. Do you have an illness or injury that just won't heal? Do you suffer from unexplained aches, pains,

stiffness, or fatigue that won't go away, no matter what you try? The culprit may literally be right under your nose or hanging around your neck. Simon King explains his theory, based on careful observation, that many necklaces, rings, watches, piercings, and dental work affect your sensory nervous system and muscle reflexes - whether you can feel anything happening or not! Based on a well-known but under-appreciated mechanism called Proprioception, Live without Pain reveals how many common items activate proprioceptive mechanisms which leave you vulnerable to pain, and how you can remedy these without drugs, surgery or exercises. It offers individuals and health practitioners alike simple solutions that build health; sometimes resolving even long-term health issues in the process. For more information, go to www.live-without-pain.com

Warman's Costume Jewelry Pamela Y. Wiggins,2014-07-14 Provides descriptions and prices for more than seven hundred-fifty pieces of costume jewelry, including background information, dating tips, and manufacturer facts.

Handbook of Data Intensive Computing Borko Furht,Armando Escalante,2011-12-10 Data Intensive Computing refers to capturing, managing, analyzing, and understanding data at volumes and rates that push the frontiers of current technologies. The challenge of data intensive computing is to provide the hardware architectures and related software systems and techniques which are capable of transforming ultra-large data into valuable knowledge. Handbook of Data Intensive Computing is written by leading international experts in the field. Experts from academia, research laboratories and private industry address both theory and application. Data intensive computing demands a fundamentally different set of principles than mainstream computing. Data-intensive applications typically are well suited for large-scale parallelism over the data and also require an extremely high degree of fault-tolerance, reliability, and availability. Real-world examples are provided throughout the book. Handbook of Data Intensive Computing is designed as a reference for practitioners and researchers, including programmers, computer and system infrastructure designers, and developers. This book can also be beneficial for business managers, entrepreneurs, and investors.

The Thing About Bees Shabazz Larkin,2020-11-10 An exploration of the importance of bees in our world is offered through the author's lyrical observations to his young sons, often with analogies between the insects and children, and always beautifully presented with unconditional love for them both.

Official Gazette of the United States Patent and Trademark Office ,1991

Medical Law in Ireland Deirdre Madden,2019-10-23 Derived from the renowned multi-volume International Encyclopaedia of Laws, this convenient volume provides comprehensive analysis of the law affecting the physician-patient relationship in Ireland. Cutting across the traditional compartments with which lawyers are familiar, medical law is concerned with issues arising from this relationship, and not with the many wider juridical relations involved in the broader field of health care law. After a general introduction, the book systematically describes law related to the medical profession, proceeding from training, licensing, and other aspects of access to the profession, through disciplinary and professional liability and medical ethics considerations and quality assurance, to such aspects of the physician-patient relationship as rights and duties of physicians and patients, consent, privacy, and access to medical records. Also covered are specific issues such as organ transplants, human medical research, abortion, and euthanasia, as well as matters dealing with the physician in relation to other health care providers, health care insurance, and the health care system. Succinct and practical, this book will prove to be of great value to professional organizations of physicians, nurses, hospitals, and relevant government agencies. Lawyers representing parties with interests in Ireland will welcome this very useful guide, and academics and researchers will appreciate its comparative value as a contribution to the study of medical law in the international context.

Access Denied Ronald Deibert,John Palfrey,Rafal Rohozinski,Jonathan Zittrain,2008-01-25 A study of Internet blocking and filtering around the world: analyses by leading researchers and survey results that document filtering practices in dozens of countries. Many countries around the world block or filter Internet content, denying access to information that they deem too sensitive for ordinary citizens--most often about politics, but sometimes relating to sexuality, culture, or religion. Access Denied documents and analyzes Internet filtering practices in more than three dozen countries, offering the first rigorously conducted study of an accelerating trend. Internet filtering takes place in more than three dozen states worldwide, including many countries in Asia, the Middle East, and North Africa. Related Internet content-control mechanisms are also in place in Canada, the United States and a cluster of countries in Europe. Drawing on a just-completed survey of global Internet filtering undertaken by the OpenNet Initiative (a collaboration of the Berkman Center for Internet and Society at Harvard Law School, the Citizen Lab at the University of Toronto, the Oxford Internet Institute at Oxford University, and the University of Cambridge) and relying on work by regional experts and an extensive network of researchers, Access Denied examines the political, legal, social, and cultural contexts of Internet filtering in these states from a variety of perspectives. Chapters discuss the mechanisms and politics of Internet filtering, the strengths and limitations of the technology that powers it, the relevance of international law, ethical considerations for corporations that supply states with the tools for blocking and filtering, and the implications of Internet filtering for activist communities that increasingly rely on Internet technologies for communicating their missions. Reports on Internet content regulation in forty different countries follow, with each two-page country profile outlining the types of content blocked by category and documenting key findings. Contributors Ross Anderson, Malcolm Birdling, Ronald Deibert, Robert Faris, Vesselina Haralampieva [as per Rob Faris], Steven Murdoch, Helmi Noman, John Palfrey, Rafal Rohozinski, Mary Rundle, Nart Villeneuve, Stephanie Wang, Jonathan Zittrain

Distributed Artificial Intelligence, Agent Technology, and Collaborative Applications Sugumaran, Vijayan,2008-12-31 This book is a catalyst for emerging research in intelligent information, specifically artificial intelligent technologies and applications to assist in improving productivity in many roles such as assistants to human operators and autonomous decision-making components of complex systems--Provided by publisher.

Corporate Governance and Business Ethics in Iceland Throstur Olaf Sigurjonsson,Robert H. Haraldsson,Jordan Mitchell,2023-01-23 Corporate Governance and Business Ethics in Iceland provides real-world case studies of how institutions approach governance and ethics in a country where one organization's actions often have a massive ripple effect throughout the entire nation.

Selected Topics in Group IV and II-VI Semiconductors E.H.C. Parker,Peter Rudolph,G. Müller-Vogt,Robert Triboulet,E. Kasper,2012-12-02 This book contains the proceedings of two symposia which brought together crystal growers, chemists and physicists from across the world. The first part is concerned with silicon molecular beam

epitaxy and presents an overview of the most research being done in the field. Part two discusses the problems dealing with purification, doping and defects of II-VI materials, mainly of the important semiconductors CdTe and ZnSe. The focus is on materials science issues which are the key for a better understanding of these materials and for any industrial application.

Data Science Live Book Pablo Casas,2018-03-16 This book is a practical guide to problems that commonly arise when developing a machine learning project. The book's topics are: Exploratory data analysis Data Preparation Selecting best variables Assessing Model Performance More information on predictive modeling will be included soon. This book tries to demonstrate what it says with short and well-explained examples. This is valid for both theoretical and practical aspects (through comments in the code). This book, as well as the development of a data project, is not linear. The chapters are related among them. For example, the missing values chapter can lead to the cardinality reduction in categorical variables. Or you can read the data type chapter and then change the way you deal with missing values. You'll find references to other websites so you can expand your study, this book is just another step in the learning journey. It's open-source and can be found at <http://livebook.datascienceheroes.com>
