Inclusive Designing P. M. Langdon, J. Lazar, A. Heylighen, H. Dong, 2014-07-08 'Inclusive Designing' presents the proceedings of the seventh Cambridge Workshop on Universal Access and Assistive Technology (CWUAAT '14). It represents a unique multi-disciplinary workshop for the Inclusive Design Research community where designers, computer scientists, engineers, architects, ergonomists, policymakers and user communities can exchange ideas. The research presented at CWUAAT '14 develops methods, technologies, tools and guidance that support product designers and architects to design for the widest possible population for a given range of capabilities, within a contemporary social and economic context. In the context of developing demographic changes leading to greater numbers of older people and people with disabilities, the general field of Inclusive Design Research strives to relate the capabilities of the population to the design of products. Inclusive populations of older people contain a greater variation in sensory, cognitive and physical user capabilities. These variations may be co-occurring and rapidly changing leading to a demanding design environment. Recent research developments have addressed these issues in the context of: governance and policy; daily living activities; the workplace; the built environment, Interactive Digital TV and Mobile communications. Increasingly, a need has been identified for a multidisciplinary approach that reconciles the diverse and sometimes conflicting demands of Design for Ageing and Impairment, Usability and Accessibility and Universal Access. CWUAAT provides a platform for such a need. This book is intended for researchers, postgraduates, design practitioners, clinical practitioners, and design teachers.

The Internet Is Not the Answer Andrew Keen, 2015-01-06 The renowned Internet commentator and author of *How to Fix the Future* "expos[es] the greed, egotism and narcissism that fuels the tech world" (Chicago Tribune). The digital revolution has contributed to the world in many positive ways, but we are less aware of the Internet's deeply negative effects. *The Internet Is Not the Answer*, by longtime Internet skeptic Andrew Keen, offers a comprehensive look at what the Internet is doing to our lives. The book traces the technological and economic history of the Internet, from its founding in the 1960s through the rise of big data companies to the increasing attempts to monetize almost every human activity. In this sharp, witty narrative, informed by the work of other writers, reporters, and academics, as well as his own research and interviews, Keen shows us the tech world, warts and all. Startling and important, *The Internet Is Not the Answer* is a big-picture look at what the Internet is doing to our society and an investigation of what we can do to try to make sure the decisions we are making about the reconfiguring of our world do not lead to unpleasant, unforeseen aftershocks. "Andrew Keen has written a very powerful and daring manifesto questioning whether the Internet lives up to its own espoused values. He is not an opponent of Internet culture, he is its conscience, and must be heard." —Po Bronson, #1 New York Times bestselling author

Don't Waste Your Cancer John Piper, 2011-01-27 How are we as Christians called to respond when cancer invades our lives, whether our own bodies or those of our friends and family? On the eve of his own cancer surgery, John Piper writes about cancer as an opportunity to glorify God. With pastoral sensitivity, compassion, and strength, Piper gently but firmly acknowledges that we can indeed waste our cancer when we don't see how it is God's good plan for us and a hope-filled path for making much of Jesus. *Don't Waste Your Cancer* is for anyone touched by a life-threatening illness. It first appeared as an appendix in *Suffering and the Sovereignty of God*. Repackaged and republished, it will serve as a hope-giving resource for healthcare workers, pastors, counselors, and others caring for those with cancer and other serious illnesses. The booklets are also available in packs of ten.

Corporate Cultures and Global Brands Albrecht Rothacher, 2004-10-25 ' This interesting book covers the development of 19 prominent European, American and Asian companies from their humble origins to their current status as global operators. The case studies review the changes of their corporate structures and the successes and failures of their marketing and branding strategies. A wide range of business sectors is covered, including foodstuffs, drinks, retail, apparel, electronics, aviation, cars and entertainment. Of prime importance for corporate survival and growth in all sectors and countries is the crucial shift from owner-founder-run companies to consolidated management-led corporations. The wide range of sectors and countries of origin featured also permits valid conclusions on the persistence of distinctive national management styles and brand images. This clearly proves that there are corporate limits to globalization, which companies during thoughtless cross-national mergers ignore at their peril. The elusive conditions for global corporate and marketing success — and failure — are made clearer in 18 readable case studies, covering key sectors in Europe, Asia and the US. Reviews: "This book is required reading for practitioners and students of global branding. It gives informed and valuable insights into culture-specific elements in the international business arena. The editor brings these insights to bear admirably in this remarkable collection of essays on products and services that achieved a global reach." Dr Tom Hardiman Chairman, IBM International Treasury Services Company Fellow of the Irish Management Institute and of the Marketing Institute of Ireland "A remarkable study with valuable contributions which explore the decisive soft factors of international mergers. Sex, Drugs, and Rock 'n' Roll Zoe Cormier, 2015-03-24 What led scientists to have acrobats copulate inside an MRI machine? Why do wordless patterns of sound send shivers down our spines and tickle ancient parts of our brains? How did a chemist's quest to create a drug to ease the pain of childbirth result in the creation of LSD? And did it change our understanding of the brain forever? From tortoiseshell condoms to superstar athletes on hallucinogens, science writer Zoe Cormier dissects these and other burning questions, amplifying them with insights from some of the world's bravest, cleverest, and downright weirdest scientists. Sex, Drugs, and Rock 'n' Roll explores science at the edge, where scientists ask big, strange questions -- and sometimes experiment on themselves to find answers. It shines a light into the lesser-known corners of scientific research to gain insight into the nature of consciousness, happiness, and humanity. Not to mention our parties. Here are stories of unconventional scientists, innovative inquiries, hedonistic impulses -- and how the renegades of science have illuminated the secrets of our baser impulses.

Management in Ten Words Terry Leahy, 2012-06-19 From one of the world's most admired business leaders, here is a remarkable book that will forever change the way you think about management. The meteoric rise of UK supermarket chain Tesco from humble beginnings to its current status as one of the largest retailers in the world can be largely credited to one man—its recently departed CEO, Terry Leahy. Leahy's unflagging drive and commitment to progress, his no-nonsense approach to leadership, and his visionary perspective on the manager's role made him a transformative figure not only within his company but within the culture at large—he was voted Business Person of the Year by the Sunday Times in 2010. But what's Leahy's secret? How did a workingclass kid whose first job with Tesco was stocking shelves rise to become his company's most dynamic leader—quadrupling the firm's profits and creating a new job every twenty minutes for more than ten years? How did he steer a midlevel supermarket chain to such success that it now accounts for one-seventh of all British spending on consumer goods, with truly global reach and thriving departments in everything from mobile-phone operation to financial services? The answer can be found in ten deceptively simple words—words such as truth, loyalty, courage, and balance. Everyone thinks they understand what these words mean. But what Leahy learned in his fourteen years as the world's greatest turnaround artist was that there is far more to actually practicing these time-honored values than most people know. Management in 10 Words is Terry Leahy's unflinchingly honest, deeply insightful account of the most valuable, hard-won lessons of his career. For any leader who aspires to be truly exceptional, this book is a must-read.

When I Were a Meerkat Andrew Davies, 2011-10 A spinoff of When I Were a Lad featuring sad and adorable images of meerkats as they do their best to escape grinding poverty and make a better life for themselves Already it has generated spin-offs--When I Were a School Lad and When I Were a Nipper. Here, instead of ragged trousered children scrabbling around the streets, getting put in perilous positions--the stock in trade of the previous books--the north of England is populated with a small number of meerkats. Meerkats get put to work down the mines, go to seaside for their holidays, and mess about on trams. The meerkat world and the human world easily intermingle in a reworking of many of the photos first used in When I Were a Lad.

The Self-Made Billionaire Effect John Sviokla, Mitch Cohen, 2015-01-01 Discover and cultivate the secret traits of self-made billionaires with THE SELF-MADE BILLIONAIRE EFFECT by John Sviokla and Mitch Cohen Imagine what Atari might have achieved if Steve Jobs had stayed there. Or what Steve Case could have done for Pepsi if he hadn't left for a start-up that eventually became AOL. Scores of billionaires worked for established corporations before they struck out on their own. People like Michael Bloomberg and Mark Cuban went on to build iconic household brands. Why didn't their former employers hang onto to these people? And why are most big companies unable to create as much value as the world's 800 self-made billionaires? Billionaires aren't necessarily luckier, smarter or harder working than the rest of us - and they rarely build something brand-new. The key difference is their mindset. They redefine what's possible - and they are critical to any company looking to create massive value. The Self-Made Billionaire Effect breaks down the five critical habits of massive value-creators, so you can learn how to identify, encourage, and retain them - and even become one yourself. It will forever change the way you think about talent and business value. John J. Sviokla is the head of Global Thought Leadership with PricewaterhouseCoopers. He is a frequent speaker on innovation, growth, and customer behavior. In addition to working with clients, John serves on PwC's Advisory Leadership Group and Global Thought Leadership Council. He was on the faculty of the Harvard Business School for ten years and has written for Harvard Business Review, The Wall Street Journal, Financial Times, and Sloan Management Review. Mitch Cohen is PwC's Vice Chairman. During his 33 years at the firm and 20 years as a partner, Cohen has held a variety of leadership roles and served numerous Fortune 500 clients.
