Dynamic Stability of Structures George J. Simitzes, Izhak Sheinman, 1982 This report deals primarily with extension of the energy-based concepts of dynamic stability, developed earlier for finite-degree-of-freedom systems, to continuous systems. Moreover, the related criteria for dynamic stability are demonstrated through several structural configurations, such as eccentrically loaded simple two-bar frames, geometrically imperfect, thin, cylindrical shells (of stiffened and unstiffened construction) and subjected to uniform axial compression and lateral pressure, and a pinned, half-sine, shallow arch loaded transversely. All of these systems are subject to violent buckling under static application of the loads. Moreover, the developed concepts are extended, so as to apply to structural systems, which are either subject to smooth buckling or are not subject to buckling at all under static loading.

Woollen and Worsted Woven Fabric Design E Grant Gilligan, 2004-01-06 Woollen and Worsted Woven Fabric Design explains and provides answers to many of the technical and practical problems encountered in the development and design of woollen and worsted woven fabrics. Today it is as essential as ever to design, develop and produce saleable and commercially sound woven fabrics within considerable financial restraints. However, in the teaching of woven fabric design, emphasis appears to have shifted away from the practicalities of cloth construction and design development. The formulae and calculations used in the weaving industry are clearly set out in the text, with numerous worked examples.

New Research on Hazardous Materials Phillip B. Warey, 2007 Hazardous waste is a waste with properties that make it dangerous or potentially harmful to human health or the environment. Hazardous waste generally exhibits one or more of these characteristics: ignitability, corrosivity, reactivity or toxicity. The universe of hazardous wastes is large and diverse. Hazardous wastes can be liquids, solids, contained gases, or sludges. They can be the by-products of manufacturing processes or simply discarded commercial products, like cleaning fluids or pesticides. One major type is radioactive waste. This book brings together the latest research in this diverse field.

Operations Research '93 Achim Bachem, Ulrich Derigs, Michael Jünger, Rainer Schrader, 2012-12-06 This proceedings volume contains extended abstracts of talks presented at the 18th Symposium on Operations Research held at the University of Cologne, September 1-3, 1993. The Symposia on Operations Research are the annual meetings of the Gesellschaft für Mathematik, Ökonometrie und Operations Research (GMOOR), a scientific society providing a link between research and applications in the areas of applied mathematics, economics and operations research. The broad range of interests and scientific activities covered by GMOOR and its members was demonstrated by about 250 talks presented at the 18th Symposium. As in recent years, emphasis was placed on optimization and stochastics, this year with a special focus on combinatorial optimization and discrete mathematics. We appreciate that with sections on parallel and distributed computing and on scientific computing also new fields could be integrated into the scope of the GMOOR. This book contains extended abstracts of most of the papers presented at the conference. Long versions and full papers of the talks are expected to appear elsewhere in refereed periodicals. The contributions were divided into sixteen sections: (1) Theory of Optimization, (2) Computational Methods of Optimization, (3) Combinatorial Optimization and Discrete Mathematics, (4) Scientific Computing, (5) Decision Theory, (6) Mathematical Economics and Game Theory, (7) Banking, Finance and Insurance, (8) Econometrics, (9) Macroeconomics and Economic Theory, (10) Stochastics, (11) Production and Logistics, (12) System and Control Theory, (13) Routing and Scheduling, (14) Knowledge Based Systems, (15) Information Systems and (16) Parallel and Distributed Computing.

Clinical Management of Sex Addiction Patrick J. Carnes, Kenneth M. Adams, 2019-11-28 Clinical Management of Sex Addiction's newest edition updates many of the original chapters from 28 leaders in the field with new findings and treatment methods in the field of sex addiction. With a growing awareness of sex addiction as a problem, plus the advent of cybersex compulsion, professional clinicians are being confronted with sexual compulsion with little clinical or academic preparation. This is the first book distilling the experience of the leaders in this emerging field. It additionally provides new chapters on emerging areas of interest, including partner counseling, trauma and sexual addiction, and adolescent sex addiction. With a focus on special populations, the book creates a current and coherent reference for the therapist who faces quickly escalating new constellations of addictive sexual behavior. Readable, concise and filled with useful interventions, it is a key text for professionals new to the field and a classic reference for all clinicians who treat sex addiction.
