Making Eye Health a Population Health Imperative National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Public Health Approaches to Reduce Vision Impairment and Promote Eye Health, 2017-01-15 The ability to see deeply affects how human beings perceive and interpret the world around them. For most people, eyesight is part of everyday communication, social activities, educational and professional pursuits, the care of others, and the maintenance of personal health, independence, and mobility. Functioning eyes and vision system can reduce an adult's risk of chronic health conditions, death, falls and injuries, social isolation, depression, and other psychological problems. In children, properly maintained eye and vision health contributes to a child's social development, academic achievement, and better health across the lifespan. The public generally recognizes its reliance on sight and fears its loss, but emphasis on eye and vision health, in general, has not been integrated into daily life to the same extent as other health promotion activities, such as teeth brushing; hand washing; physical and mental exercise; and various injury prevention behaviors. A larger population health approach is needed to engage a wide range of stakeholders in coordinated efforts that can sustain the scope of behavior change. The shaping of socioeconomic environments can eventually lead to new social norms that promote eye and vision health. Making Eye Health a Population Health Imperative: Vision for Tomorrow proposes a new population-centered framework to guide action and coordination among various, and sometimes competing, stakeholders in pursuit of improved eye and vision health and health equity in the United States. Building on the momentum of previous public health efforts, this report also introduces a model for action that highlights different levels of prevention activities across a range of stakeholders and provides specific examples of how population health strategies can be translated into cohesive areas for action at federal, state, and local levels.

Star-Crossed Dragons Chris Cannon, 2021-02-01 Sara Sinclair might be a Blue Dragon ice princess, but she certainly doesn't act like one. And she definitely doesn't buy into the Blue Dragon Clan's crap that says marriage should focus on alliances and power. So Sara's furious when her Blue parents sign a contract for her to marry an absolute asshat. She has zero interest in being one half of a snobby Blue power couple—especially when she'd rather bite her obnoxious fiancé's head off and bury it in the garden. There's also

the small problem of Ian McKenna, a fire-breathing Red Dragon who is everything her fiancé is not. Of course, dating Ian is forbidden. Getting involved with anyone outside of your Clan is against Directorate law. Ian could be thrown in jail or executed without a trial. But now that she knows what love feels like, how could she ever marry someone else? Now the only way Ian and Sara can be together is by giving up their dragon way of life. No flying. No magic. No family or friends. And if Sara knows anything, it's that stories like this never turn out well...

The modular approach and richness of content ensure that the book meets the needs of a variety of courses. College Algebra offers a wealth of examples with detailed, conceptual explanations, building a strong foundation in the material before asking students to apply what they've learned. Coverage and Scope In determining the concepts, skills, and topics to cover, we engaged dozens of highly experienced instructors with a range of student audiences. The resulting scope and sequence proceeds logically while allowing for a significant amount of flexibility in instruction. Chapters 1 and 2 provide both a review and foundation for study of Functions that begins in Chapter 3. The authors recognize that while some institutions may find this material a prerequisite, other institutions have told us that they have a cohort that need the prerequisite skills built into the course.
