The Man Who Couldn't Sleep Arthur Stringer, 2021-01-22 The Man Who Couldn't Sleep by Arthur Stringer We had just turned into the suburbs of Brooklyn when my swinging headlights revealed the figure of a man, an unstable and swaying man, obviously drunk, staggers and falls directly in front of my car. I heard the screeching of the brakes and the shrill screams of a crowd of young people along the sidewalk. But it was too late. I could feel the impact as we hit. I could hear the sickening thud and jolt as the wheels pounded on that fallen body. Latreille, I said, breathing heavily as we slowed down, did we ... did we kill him? My driver turned and studied my face. Then he carefully looked back, to make sure we weren't being followed. This is a heavy car, sir, he finally admitted.

Almost a Man Mary Wood-allen, 2015-02-24 [...] "Almost a man," said Dr. Barrett softly as she looked thoughtfully into the fire. After a moment's silence she asked, "Carl, what is it to be a man?" The boy drew himself up with a self-conscious air as he replied. "Why, to have your growth, and get into business for yourself." "Well, that is not quite it," said the Doctor smiling, "for I have my growth and am in business for myself, [...]."

Reflections of a Man Morgan Andrew-Morganson, 2019-11-28 Morgan Andrew-Morganson (also known as spoken word artist Master Morganson, The Melancholic) grew up lower-middle class in Detroit, Michigan. His upbringing, much like the city which birthed him, is one combining joyous and heartrending moments. Yet ultimately, both the light and the dark contributed to his character and outlook on life. *Reflections of a Man*, a story containing fact, fiction, and commentary, is a semi-autobiographical work chronicling Andrew-Morganson's life. His birth and early childhood years, awkward adolescence, and post college quarter life crisis all find themselves detailed within, along with his own thoughts concerning the people and situations he's encountered throughout the years. From family members, crushes, bad teachers, and even evil bosses, all the prominent figures in Andrew-Morganson's life find themselves described within his story. Morgan Andrew-Morganson's tale is one aiming to make its readers humored, saddened, overjoyed, angered, confused, and ultimately ... contemplative.

Numeralia Jorge Luján, 2014 A lyrically abstract celebration of numbers depicts a world where three is for bedtime kisses, five is for secret creatures hiding in a glove, and an ugly duckling that proves to be not so unattractive.

Moses Jonathan Kirsch, 2009-10-07 Lawgiver and liberator. Seer and prophet. The only human permitted to converse with God face-to-face. Moses is the most commanding presence in the Old Testament. Yet as Jonathan Kirsch shows in this brilliant, stunningly original volume, Moses was also an enigmatic and mysterious figure--at once a good shepherd and a ruthless warrior, a spiritual leader and a magician, a lawgiver who broke his own laws, God's chosen friend and hounded victim. Now, in *Moses: A Life*, Kirsch accomplishes the wondrous feat of revealing the real Moses, a strikingly modern figure who steps out from behind the facade of Sunday school lessons and movie matinees. Drawing on the biblical text and a treasury of both scholarship and storytelling, Kirsch examines all that is known and all that has been imagined of Moses. In these vivid pages, we see the marvels and mysteries of Moses's life in a new light--his rescue in infancy and adoption by an Egyptian princess; his reluctant assumption of the role of liberator; his struggles to wrest his people from the pharaoh's dominion; his desperate vigil on Mount Sinai. Here too is the darker, more ominous Moses--the sorcerer, the husband of a pagan woman, the military commander who cold-bloodedly ordered the slaying of innocent people; the beloved of God whom God sought twice to murder. Jonathan Kirsch brings both prodigious knowledge and a keen imagination to one of the most compelling stories of the Bible, and the results are fascinating. A figure of mystery, passion, and contradiction,

Moses emerges from this book very much a hero for our time.

Competition Law as Regulation Josef Drexler, Fabiana Di Porto, 2015-10-30 To what extent should competition agencies act as market regulators? Competition Law as Regulation provides numerous insights from competition scholars on new trends at the interface of competition law and sector-specific regulation. By relying on the experiences of a considerable number of different jurisdictions, and applying a comparative approach to the topic, this book constitutes an important addition to international research on the interface of competition and regulation. It addresses the fundamental issues of the subject, and contributes to legal theory and practice. Topics discussed include foundations of the complex relationship of competition law and regulation, new forms of advocacy powers of competition agencies, competition law enforcement in regulated industries in general, information and telecommunications markets, and competition law as regulation in IP-related markets. Scholars in the two fields of law and economics will find the research aspects of the book to be of interest. Officials in competition and regulatory agencies will benefit from the practical relevance of the book.

Piracy in the Indian Film Industry Arul George Scaria, 2014-05-15 Provides insights into the copyright law by analysing the social, cultural, historical, legal, and economic dimensions of copyright piracy in the Indian film industry--

Smart Urban Mobility Michèle Finck, Matthias Lamping, Valentina Moscon, Heiko Richter, 2020-09-28 This book adds a critical perspective to the legal dialogue on the regulation of 'smart urban mobility'. Mobility is one of the most visible sub-domains of the 'smart city', which has become shorthand for technological advances that influence how cities are structured, public services are fashioned, and citizens coexist. In the urban context, mobility has come under pressure due to a variety of different forces, such as the implementation of new business models (e.g. car and bicycle sharing), the proliferation of alternative methods of transportation (e.g. electric scooters), the emergence of new market players and stakeholders (e.g. internet and information technology companies), and advancements in computer science (in particular due to artificial intelligence). At the same time, demographic changes and the climate crisis increase innovation pressure. In this context law is a seminal factor that both shapes and is shaped by socio-economic and technological change. This book puts a spotlight on recent developments in smart urban mobility from a legal, regulatory, and policy perspective. It considers the implications for the public sector, businesses, and citizens in relation to various areas of public and private law in the European Union, including competition law, intellectual property law, contract law, data protection law, environmental law, public procurement law, and legal philosophy. Chapter 'Location Data as Contractual Counter-Performance: A Consumer Perspective on Recent EU Legislation' of this book is available open access under a CC BY 4.0 license at link.springer.com.

The Economic Characteristics of Developing Jurisdictions Michal S. Gal, Mor Bakhoun, Josef Drexler, Eleanor M. Fox, David J. Gerber, 2015-06-29 There is ongoing debate as to what competition law and policy is most suitable for developing jurisdictions. This book argues that the unique characteristics of developing jurisdictions matter when crafting and enforcing competition law and these should

Mechanisms to Enable Follow-On Innovation Alina Wernick, 2021-05-13 The patent system is based on one-patent-per-product presumption and therefore fails to sustain complex follow-on innovations that contain a number of patents. The book explains that follow-on innovations may be subject to market failures such as hold-ups and excessive royalties. For decades, scholars have debated whether the market problems can be solved with voluntary licensing i.e., open innovation, or with compulsory liability rules. The book concludes that neither approach is sufficient. On the one hand, incentives to engage in open innovation practices involving patents are

insufficient. On the other hand, the existing compulsory liability rules in patent and competition law are not tailored to address follow-on innovator's interests. To transcend this problem, the author proposes a compulsory liability rule against the suppression of follow-on innovation, that paradoxically, fosters early-on voluntary licensing between patent holders and follow-on innovators. The book is aimed at patent and competition law scholars and practitioners, patent attorneys, managers, engineers and economists who either engage in open innovation involving patents or conduct research on the topic. It also offers insights to policy and law-makers reviewing the possibilities to foster open innovation initiatives or adapt the scope of patent remedies or employ compulsory licenses for patents.

Competition on the Internet Gintarė Surblytė, 2014-11-24 Undeniably widespread and powerful as it is, the Internet is not almighty: it can reach as high as the skies (cloud computing), but it cannot escape competition. Yet, safeguarding competition in "the network of networks" is not without challenges: not only are competitive processes in platform-based industries complex, so is competition law analysis. The latter is often challenged by the difficulties in predicting the outcome of competition, in particular in terms of innovation. Do the specific competition law issues in a digital environment presuppose a reconsideration of competition law concepts and their application? Can current competition law tools be adjusted to the rush pace of dynamic industries? To what extent could competition law be supplemented by regulation – is the latter a foe or rather an ally? This book provides an analysis of recent developments in the most relevant competition law cases in a digital environment on both sides of the Atlantic (the EU and the US) and assesses platform competition issues from a legal as well as an economic point of view.

Chinese Merger Control Law Tingting Weinreich-Zhao, 2014-11-19 On 1 August 2008 the Chinese Anti-Monopoly Law entered into force, introducing a comprehensive framework for competition law to the Chinese market. One set of the new rules pertains to merger control. China's Ministry of Commerce (MOFCOM) was nominated as the authority responsible for enforcing merger control in China and has been actively doing so ever since. Recent years have established China as one of the most important merger filing jurisdictions for cross-border mergers alongside the EU and USA. This work evaluates the Chinese merger control law regime and MOFCOM's decision-making practice after more than five years of application. In particular, it assesses which policy goals (competition policy goals or industrial policy considerations) prevail in the written law and its application and provides suggestions for a further improvement of the law – with the aim to develop a transparent merger control regime that promotes long-term economic growth in China.

Kurt Westergaard – The Man Behind the Mohammed Cartoon John Lykkegaard, 2012-05 Kurt Westergaard The Man Behind the Mohammed Cartoon In September 2005 Kurt Westergaard drew one of the twelve cartoons of Mohammed published by the Danish newspaper Jyllands-Posten. At this point nobody could have foreseen that the publication of the cartoons would generate hatred and that Danish embassies in the Middle East would soon go up in flames. Since then Kurt Westergaard has been on Al-Qaida's death list. On the first of January 2010 a fanatic Muslim broke into his house in order to kill him. Today he lives surrounded by bodyguards 24/7/365. The name Kurt Westergaard is now well-known across the globe, and he is loved and hated because of his cartoon. However, very few people know the man behind the Mohammed cartoon. In this autobiography he tells the story of his life and explains why he cannot give up the struggle for freedom of speech. The book has 275 pages and contains 82 of Kurt Westergaard's Cartoons including the famous Mohammed Cartoon in a new version. The author John Lykkegaard is a qualified journalist. Until 2005 he worked on various newspapers. He then founded his own publishing house My Memoirs – Forlaget Mine Erindringer – and specializes in writing biographies. So far he has written and published seventeen

autobiographies. The Publishing House My Memoirs - Forlaget Mine Erindringer, Denmark, www.mine-erindringer.dk

Liability Rules in Patent Law Daniel Krauspenhaar, 2014-10-06 The primary purpose of a patent law system should be to enhance economic efficiency, in particular by providing incentives for making inventions. The conventional wisdom is that patents should therefore be strictly exclusive rights. Moreover, in practice patent owners are almost never forced to give up their right to exclude others and receive only a certain amount of remuneration with, for instance, compulsory licensing. Other economically interesting patent-law objectives, however, include the transfer and dissemination of knowledge. Mechanisms exist by which the patent owner decides if he or she would prefer exclusive or non-exclusive rights, for instance the opportunity to declare the willingness to license and create patent pools. But it is questionable whether these mechanisms are sufficient and efficient enough in view of the existence of patent trolls and other problems. This work challenges the conventional wisdom to a certain extent and makes proposals for improvements.

FairEconomy Wolfgang Fikentscher, Philipp Hacker, Rupprecht Podszun, 2015-02-08 FairEconomy is a concept for a free and fair market economy. In response to the financial and economic crises of the past years, the authors develop fundamental ideas of how a market economy works, what rules markets need and who safeguards fairness and equal opportunity in such an economy. The book sets out the design of a sustainable market order: Going back to the very roots of doing business it offers a fascinating insight into the cultural and anthropological premises of the market economy. Fairness and free competition can be identified as key elements of successful markets, sometimes neglected in politics and business. Legal rules need to ensure that fairness and economic freedom work. The same holds true for the relationship of risk and liability that has been overlooked in the banking sector. The ideas of a FairEconomy, sketched in this book, are fit to become a reality: The authors point to institutions and mechanisms that could integrate the concept into global law. They place their trust less upon ever-larger institutions and more on private entitlement and enforcement at the global, regional, and local levels.

Incentives for Collaboration and Competition Jonas Heite, 2020-02-25 Individuals and firms can improve their performance through collaboration and competition. However, it is still an open question how collaboration and competition schemes can be optimally designed and incentivized in order to exploit their full potential. Jonas Heite investigates this question by assessing efforts to stimulate R&D collaboration and by examining properties as well as underlying mechanisms (e.g., effort, risk, confidence and stress) of ability configurations in contests. Based on three large-scale economic studies covering laboratory, field and natural experiments, the author applies novel and sophisticated econometric methods to provide causal empirical evidence that yields important implications for policymakers, managers and researchers.

Managing Digital Transformation Daniel Wittenstein, 2022-02-25 The digital transformation of the business environment and its impact on firm performance is of central interest in economics and management. However, it is still an open question how firms should optimally align their business models and strategies for the digital era. Daniel Wittenstein investigates this question by generating novel insights from hidden champions and by developing a machine learning-based approach for measuring firm-level digitalization.

Intellectual Property and Private International Law Josef Drexler, Annette Kur, 2005-02-23 The relationship between intellectual property and private international law is a fascinating and multi-faceted one. Both fields are inherently international, but it is the exponential increase in conflicts involving trans-border elements, in a world characterised by global trade and borderless communication structures, that has, in modern times, drawn the two

disciplines close. The essays contained in this book, first presented at a Symposium in Munich, set out possible visions for a future system of international and regional jurisdiction and applicable law that is better adapted to the increasingly supranational character of IP rights. A second feature of the book is its treatment of 'harmonisation' of choice-of-law issues. Framed by these two elements - international jurisdiction on the one hand and perspectives for harmonised choice of law rules in an international context on the other - specific European themes are also addressed; jurisdiction, the establishment of a European judiciary in the patent field, the relationship between regional (European) systems and an international jurisdiction convention, and the recent proposal for a Regulation on applicable law in non-contractual relationships (Rome II).

The Notion of Secrecy Teresa Trallero Ocaña, 2021 This book examines the legal framework for the protection of trade secrets in three European Union jurisdictions. On the basis of such analysis, this book aims to identify whether there is a common ground that would allow a potential harmonization of the secrecy requirement at the EU level. The author examines the requirements for the protection of information as trade secrets in three selected European jurisdictions: the United Kingdom, Germany, and Italy. In particular, this book focuses on the study of the so-called secrecy requirement and the divergent standards adopted in each of the above mentioned jurisdictions. On the basis of such analysis, this work identifies and examines whether there is a common ground that would allow a potential harmonization of the secrecy requirement at the EU level. Finally, it studies the legal consequences of establishing an exclusive proprietary regime for the protection of trade secrets, instead of relying on the traditional unfair competition regime set forth in Article 10bis of the Paris Convention and 39(2) TRIPS.
