Mello Yello Walker Smith,2015-05-05 Mello Yello is the intimate life story of music industry legend Jack Gibson a/k/a “Jack the Rapper.” Launching the careers of countless superstars, Gibson forged enduring friendships with some of the most illustrious African American personalities of the twentieth century. His long reaching influence began in 1949, when he and J.B. Blayton established the first black-owned radio station in the United States. As an emcee and promoter, he built enduring friendships with the early black royalty of the entertainment world, among them, Sammy Davis, Jr., Billie Holiday, Erroll Garner, Sarah Vaughan, Nat King Cole, Pearl Bailey, Dinah Washington, Nancy Wilson, and Ray Charles. When he was hired by Berry Gordy to head up promotion at a fledgling record company called Motown, Gibson befriended a new crop of stars, including Stevie Wonder, The Supremes, and Smokey Robinson. Moving on to the Revelot label, and then to Stax, Gibson’s uncanny timing once again positioned him to further the careers of Otis Redding, Jackie Wilson, Isaac Hayes, The Staple Singers, Rufus Thomas, Carla Thomas and many others. In addition to his involvement in the music scene, Gibson gave voice to the history as he lived it—covering the Civil Rights Movement, interviewing Malcolm X, and conducting a man-on-the-street report from Detroit as it burned following Dr. King’s assassination. With the publication of his influential Black trade magazine called The Mello Yello, The Rapper established a forum for discussions and contributed to sweeping changes for African Americans in radio and the recording industry. But his most long-reaching achievement was his glittering “Family Affair”—an annual black music convention that provided a springboard for new talent. Each year, without fail, the heavy hitters of the music industry cleared their schedules to lend their talents to the Family Affair: Prince, Tina Turner, Nancy Wilson, Janet Jackson, James Brown, Whitney Houston, Eddie Murphy, Hammer, Toni Braxton, Sinbad, L.L. Cool J. And the list goes on like a “Who’s Who” of entertainment superstars. After being honored by the Rock and Roll Hall of Fame, other accolades began to roll in from the United States Congress, the Smithsonian Institution, and countless other organizations. But The Rapper wasn’t finished yet. With decades of stories and music still alive in his soul, he returned to his roots—radio. Nearly fifty years after his beginnings at WERD, Jack The Rapper’s voice once again crackled across the airwaves in Las Vegas, Nevada, proclaiming three simple words: “I’m still here.”

The YELLO Chronicles by JONAS WARSTAD The Early Years Part I 1976 - 1979 Jonas Warstad, Carlos Peron, 2018-04-04 Yello was formed in 1978, so 2018 marks Yello's 40th anniversary! To celebrate that, we present to you The Yello Chronicles: The Early Years - Part 1 (1976-1979) which covers the years that preceded the release of Yello's first LP Solid Pleasure. Most of the information has never been published before in any book. It reveals all the secrets, all the mysteries, straightens out myths and misconceptions, and contains lots of surprises! It also features over 200 pictures, including many previously unpublished and original photographs from Carlos' private archives, as well as several early and very rare articles, all translated into English. It is written and meticulously researched by renowned Yello expert Jonas Warstad, and is based on his interviews with original founders Boris Blank and Carlos Perón. Like Ralph Records would say: Buy or Die! PS, stand by for Part 2 (1980-1981) next year!

Boris Blank, Dieter Meier: Oh Yeah--Yello 40 Boris Blank, 2022-04-19 A documentary history of the great Swiss electronic music duo Yello, famed for their '80s hits The Race and Oh Yeah Forty years ago, armed with tape, scissors and a hefty dose of wit, Zurich band Yello--aka Boris Blank, Dieter Meier and, initially, Carlos Perón--set out to write their very own chapter of music history. In no time at all they found themselves playing the Roxy club in New York. Today, thanks to albums such as Solid Pleasure, You Gotta Say Yes to Another Excess and Flag, and singles like Oh Yeah (famously included in the soundtracks to American films Ferris Bueller's Day Off and The Secret of My Success), Yello are enshrined among the pantheon of electropop pioneers. For Oh Yeah--Yello 40, the two original members dug deep into their archives to come up with an intriguing haul of Polaroids, posters, letters, fanzine reviews, sketches, pictures of their trip to Cuba and even the handwritten sheet music to Bostich, their seminal early single.

Approximate Solutions of Common Fixed-Point Problems Alexander J. Zaslavski, 2016-06-30 This book presents results on the convergence behavior of algorithms which are known as vital tools for solving convex feasibility problems and common fixed point problems. The main goal for us in dealing with a known computational error is to find what approximate solution can be obtained and how many iterates one needs to find it. According to known results, these algorithms should converge to a solution. In this exposition, these algorithms are studied, taking into account computational errors which remain consistent in practice. In this case the convergence to a solution does not take place. We show that our algorithms generate a good approximate solution if computational errors are bounded from above by a small positive constant. Beginning with an introduction, this monograph moves on to study: · dynamic string-averaging methods for common fixed point problems in a Hilbert space · dynamic string methods for common fixed point problems in a metric space · dynamic string-averaging version of the proximal algorithm · common fixed point problems in metric spaces · common fixed point problems in the spaces with distances of the Bregman type · a proximal algorithm for finding a common zero of a family of maximal monotone operators · subgradient projections algorithms for convex feasibility problems in Hilbert spaces

The New Strategic Brand Management Jean-Noël Kapferer, 2012-01-03 Adopted internationally by business schools and MBA programmes, this book is the ultimate resource for senior strategists, positioning professionals and postgraduate students to understand and overcome the challenges of brand management and strategy today, written by the leading international expert of branding, Jean-Noël Kapferer. The New Strategic Brand Management is simply the reference source for branding professionals and postgraduate students. Over the years it has not only established a

reputation as one of the leading works on brand strategy, but also has become synonymous with the topic itself. Using an array of international case studies, this book covers all the leading issues faced by brand strategists today, with both gravitas and intelligent insight. It reveals new thinking on topics such as putting culture and content into brands, the impact of private labels and the comeback of local brands. This updated fifth edition builds on the book's already impressive reputation, including new content that will help students and practitioners stay up to date with targeting, with relevant research and market knowledge to support the discipline. With dedicated sections for specific types of brands (luxury, corporate and retail), international examples and case studies from companies such as Audi, Nivea, Toyota and Absolut Vodka; plus models and frameworks such as the Brand Identity Prism; The New Strategic Brand Management remains at the forefront of strategic brand thinking.

Beyond the Basic Stuff with Python Al Sweigart,2020-12-22 BRIDGE THE GAP BETWEEN NOVICE AND PROFESSIONAL You've completed a basic Python programming tutorial or finished Al Sweigart's bestseller, Automate the Boring Stuff with Python. What's the next step toward becoming a capable, confident software developer? Welcome to Beyond the Basic Stuff with Python. More than a mere collection of advanced syntax and masterful tips for writing clean code, you'll learn how to advance your Python programming skills by using the command line and other professional tools like code formatters, type checkers, linters, and version control. Sweigart takes you through best practices for setting up your development environment, naming variables, and improving readability, then tackles documentation, organization and performance measurement, as well as object-oriented design and the Big-O algorithm analysis commonly used in coding interviews. The skills you learn will boost your ability to program--not just in Python but in any language. You'll learn: Coding style, and how to use Python's Black auto-formatting tool for cleaner code Common sources of bugs, and how to detect them with static analyzers How to structure the files in your code projects with the Cookiecutter template tool Functional programming techniques like lambda and higher-order functions How to profile the speed of your code with Python's built-in timeit and cProfile modules The computer science behind Big-O algorithm analysis How to make your comments and docstrings informative, and how often to write them How to create classes in object-oriented programming, and why they're used to organize code Toward the end of the book you'll read a detailed source-code breakdown of two classic command-line games, the Tower of Hanoi (a logic puzzle) and Four-in-a-Row (a two-player tile-dropping game), and a breakdown of how their code follows the book's best practices. You'll test your skills by implementing the program yourself. Of course, no single book can make you a professional software developer. But Beyond the Basic Stuff with Python will get you further down that path and make you a better programmer, as you learn to write readable code that's easy to debug and perfectly Pythonic Requirements: Covers Python 3.6 and higher

Juxinseason (Respect The Jux Prt, 1, 2, & 3) O.G. YELLO/Raymond James,2010-05-13 The Order Of Thieves is a band of criminals formed with one thing in mind; to prey on the criminal underworld by way of The JUX. The JUX is the craft practiced by the men of The Order Of Thieves. Started by a group of Jamaicans, The Order Of Thieves created a legend in the streets that made it an honor to have this group of men relieve you of your personal wealth. No one was safe from the season of the JUX. If you were dealing in any part of the criminal world then you were fare game for The Order. From Drug dealers to politicians and even a priminister found the season of the JUX upon them. From Jamaica to New York and the Eastern Sea Board to the long arm of the law reaching even across seas for them; one thing was certain, if your wealth became a reason then nothing could protect you from the JUXINSEASON.

You Don't Like the Sea Aimua Edosomwan,2011-09-30 Book Description: This remorseless collection of short stories and two novellas comes up against a background of arbitrary arrests and summary executions carried out at the behest of the strongman. but rather than being a profile on the abuses of power it is the individuals who are caught in the despoiling tyranny that enliven these stories. Thus we have the old pensioner in 'You May Hang Me Now'who in seeking to impress a starry-

eyed cub reporter finds himself the target of a survivalist group and deadly agents of state. While 'The temptation to forgive Jacob' examines a boy's reaction to a doting father implicated in mass murder. 'Roach's demise captures a boy's grief and transformation following the death of his only surviving sibling, the ruthless leader of a street gang. Though set in a failing state, these stories where the emotions and arbitrariness of the human character play a much larger part than one would ordinarily imagine, might well have been framed in any urban jungle of the 21st century.

Cognitive Technology J.L. Mey, B. Gorayska, 1995-12-01 In this book the editors have gathered a number of contributions by persons who have been working on problems of Cognitive Technology (CT). The present collection initiates explorations of the human mind via the technologies the mind produces. These explorations take as their point of departure the question What happens when humans produce new technologies? Two interdependent perspectives from which such a production can be approached are adopted: • How and why constructs that have their origins in human mental life are embodied in physical environments when people fabricate their habitat, even to the point of those constructs becoming that very habitat • How and why these fabricated habitats affect, and feed back into, human mental life. The aim of the CT research programme is to determine, in general, which technologies, and in particular, which interactive computer-based technologies, are humane with respect to the cognitive development and evolutionary adaptation of their end users. But what does it really mean to be humane in a technological world? To shed light on this central issue other pertinent questions are raised, e.g. • Why are human minds externalised, i.e., what purpose does the process of externalisation serve? • What can we learn about the human mind by studying how it externalises itself? • How does the use of externalised mental constructs (the objects we call 'tools') change people fundamentally? • To what extent does human interaction with technology serve as an amplification of human cognition, and to what extent does it lead to a atrophy of the human mind? The book calls for a reflection on what a tool is. Strong parallels between CT and environmentalism are drawn: both are seen as trends having originated in our need to understand how we manipulate, by means of the tools we have created, our natural habitat consisting of, on the one hand, the cognitive environment which generates thought and determines action, and on the other hand, the physical environment in which thought and action are realised. Both trends endeavour to protect the human habitat from the unwanted or uncontrolled impact of technology, and are ultimately concerned with the ethics and aesthetics of tool design and tool use. Among the topics selected by the contributors to the book, the following themes emerge (the list is not exhaustive): using technology to empower the cognitively impaired; the ethics versus aesthetics of technology; the externalisation of emotive and affective life and its special dialectic ('mirror') effects; creativity enhancement: cognitive space, problem tractability; externalisation of sensory life and mental imagery; the engineering and modelling aspects of externalised life; externalised communication channels and inner dialogue; externalised learning protocols; relevance analysis as a theoretical framework for cognitive technology.

Evaluating Econometric Forecasts of Economic and Financial Variables M.

Clements, 2005-01-21 Financial econometrics is one of the greatest on-going success stories of recent decades, as it has become one of the most active areas of research in econometrics. In this book, Michael Clements presents a clear and logical explanation of the key concepts and ideas of forecasts of economic and financial variables. He shows that forecasts of the single most likely outcome of an economic and financial variable are of limited value. Forecasts that provide more information on the expected likely ranges of outcomes are more relevant. This book provides a comprehensive treatment of the evaluation of different types of forecasts and draws out the parallels between the different approaches. It describes the methods of evaluating these more complex forecasts which provide a fuller description of the range of possible future outcomes.

The YELLO Chronicles the Early Years Part II 1980-1981 Carlos Perón, Jonas

Warstad, 2019-01-11 In the previous volume in this series, Part I (1976-1979), you learned all the secrets and mysteries of how Yello started. Here, in Part II, you will learn all about how Yello recorded their two first LPs, Solid Pleasure and Claro Que Si, and other exciting projects that Yello worked on during this period such as Dieter's film Jetzt und Alles and Carlos' first solo LP Impersonator. Just like Volume I, it is written and meticulously researched by renowned Yello expert Jonas Warstad and is based on his interviews with original founders Boris Blank and Carlos Perón. Most of the information has never been published before in any book. It includes Boris' and Carlos' own memories and comments about all the tracks on the two LPs; it reveals all the secrets, all the mysteries, straightens out myths and misconceptions, and contains lots of surprises! It also features over 200 scans and pictures, including previously unpublished and original photographs from Carlos' private archives of Yello working in Platinum One Studio, an extremely rare photo of Boris as a 20-year old hippie, as well as a large number of articles and reviews, all translated into English. Like Ralph Records would say: Buy or Die! PS, stand by for the last volume in this series, Part III (1982-1984), which is scheduled for 2020.

An Alternate Reality Where Mello Yello Is More Popular Than Mtn Dew Christian

Patterson, 2016-06-01 Christian Patterson (b. 1991, Auburn WA) Multicolored clouds converging--pyrotechnic arrows slamming into the chest--an apology that no one hears--Christian Patterson has crafted a strange kind of light orb that feels totally, 100% extraterrestrial. His poems oscillate between ego and id and disembodied bedroom and Taco Bell, and the whole time, it's like he's not even paying attention. He could be blindfolded. What an honor to be alive with these poems. -Luis Neer, author of Extinction Patterson's book comes from a world in which Berenstain Bears is spelled like Berenstein Bears and young people on drugs fear the sound of Beach House. A map would depict an alternate version of pre-pangea in which Seattle and Seoul are nearly touching and there are 7-11s and Taco Bells on every block. In every parking lot, there is a blond girl experiencing a fresh sense loss. -Shy Watson, author of Away Status
