New Technologies, Development and Application IV Isak Karabegović,2021-05-11 This book features papers focusing on the implementation of new and future technologies, which were presented at the International Conference on New Technologies, Development, and Application, held at the Academy of Science and Arts of Bosnia and Herzegovina in Sarajevo on June 24-26, 2021. It covers a wide range of future technologies and technical disciplines, including complex systems such as Industry 4.0; patents in industry 4.0; robotics; mechatronics systems; automation; manufacturing; cyber-physical and autonomous systems; sensors; networks; control, energy, renewable energy sources; automotive and biological systems; vehicular networking and connected vehicles; effectiveness and logistics systems; smart grids; nonlinear systems; power, social and economic systems; education; and IoT. The book **New Technologies, Development and Application III** is oriented toward Fourth Industrial Revolution "Industry 4.0, "implementation which improves many aspects of human life in all segments and leads to changes in business paradigms and production models. Further, new business methods are emerging and transforming production systems, transport, delivery, and consumption, which need to be monitored and implemented by every company involved in the global market.

Complaints, Controversies and Grievances in Medicine Jonathan Reinartz,Rebecca Wynter,2014-12-17 Recent studies into the experiences and failures of health care services, along with the rapid development of patient advocacy, consumerism and pressure groups have led historians and social scientists to engage with the issue of the medical complaint. As expressions of dissatisfaction, disquiet and failings in service provision, past complaining is a vital antidote to progressive histories of health care. This book explores what has happened historically when medicine generated complaints. This multidisciplinary collection comprises contributions from leading international scholars and uses new research to develop a sophisticated understanding of the development of medicine and the role of complaints and complaining in this story. It addresses how each aspect of the medical complaint – between sciences, professions, practitioners and sectors; within politics, ethics and regulatory bodies; from interested parties and patients – has manifested in modern medicine, and how it has been defined, dealt with and resolved. A critical and interdisciplinary humanities and social science perspective grounded in historical case studies of medicine and bioethics, this volume provides the first major and comprehensive historical, comparative and policy-based examination of the area. It will be of interest to historians, sociologists, legal specialists and ethicists interested in medicine, as well as those involved in healthcare policy, practice and management.

Enhancing Biocontrol Agents and Handling Risks Maurizio Vurro,2001 Contains 24 contributions and an additional six abstracts focusing on the use of biocontrol agents in agriculture. Sections address the need for enhanced biocontrol agents and strategies for enhancement; technologies for enhancing biocontrol agents; risks from enhanced biocontrol agents and their mitigation; and genetics and molecular biology of enhancing biocontrol agents. The abstracts address emerging biocontrols including valine excreting isolate of *Pseudomonas syringae* cv. *tagetis* exhibiting enhanced virulence against hounds tongue (*Cynoglossum officinale*); application of fungal polysaccharides in plant protection; and the predisposing of forest weeds by chemical and manual cutting treatments to enhance the efficacy of selected biocontrol agents. Green Parties in Europe Emilie van Haute, 2016-04-28 The emergence of green parties throughout Europe during the 1980s marked the arrival of a new form of political movement, challenging established models of party politics and putting new issues on the political agenda. Since their emergence, green parties in Europe have faced different destinies; in countries such as Germany, Belgium, Finland, France, and Italy, they have accumulated electoral successes, participated in governments, implemented policies and established themselves as part of the party system. In other countries, their political relevance remains very limited. After more than 30 years on the political scene, green parties have proven to be more than just a temporary phenomenon. They have lost their newness, faced success and failure, power and opposition, grassroots enthusiasm and internal conflicts. *Green Parties in Europe* includes individual case studies and a comparative perspective to bring together international specialists engaged in the study of green parties. It renews and expands our knowledge about the green party family in Europe.

The Fish Oocyte Patrick J. Babin, Joan Cerdà, Esther Lubzens, 2007-08-17 This book presents a comprehensive overview on egg production in fish, from the standpoint of the oocyte. It covers oocyte development, maturation, hydration and fertilization. The book places special emphasis on using state-of-the-art tools for discerning the ultra-structure of the follicle and genomic/proteomic tools to fully understand biological basis of fish reproduction.

Boar Reproduction Sergi Bonet, Isabel Casas, William V Holt, Marc Yeste, 2013-02-01 Latent knowledge in the field of pig reproduction is vast but scattered, making it difficult to take in all information at a glance. Moreover, nascent branches in biotechnology cannot grow if deprived of roots. The book *Boar Reproduction: Fundamentals and New Biotechnological Trends* links the past, the present and the emerging scientific research fields on reproductive biotechnology, offering a rigorous but easy to follow compilation of topics, from “old favorites” to the latest advances. The book is organized in three parts. The chapters of the first and second part cover various biological aspects of boar spermatozoa within the male, and within the female environments, respectively. The most common laboratory and artificial insemination techniques are discussed in the third part. As an additional feature, some chapters focus on the basis of a technology transfer to bring research expertise from basic science to the market, making the information provided in this book suitable for academic, research and other professional applications.

Introduction to Mammalian Reproduction Daulat Tulsiani, 2012-12-06 *Introduction to Mammalian Reproduction* is a welcome contribution to the fields of gametogenesis, gamete transport, fertilization, and reproduction technologies. Key topics covered include: *formation and maturation of male gametes; *morphology and physiology of female gametes; *how the sperm meets the egg; *sperm-egg fusion, egg activation, and implantation of fertilized egg; *assisted reproduction and environmental chemicals that have an effect on formation and function of male and female gametes. This book is for both researchers and students involved in reproductive biology.

Andean Tectonics Brian K. Horton, Andres Folguera, 2019-06-19 *Andean Tectonics* addresses the geologic evolution of the Andes

Mountains, the prime global example of subduction-related mountain building. The Andes Mountains form one of the most extensive orogenic belts on Earth, spanning approximately an 8,000-km distance along the western edge of South America, from $\sim 10^{\circ}\text{N}$ to $\sim 55^{\circ}\text{S}$. The tectonic history of the Andes involves a rich record of diverse geological processes, including crustal deformation, magmatism, sedimentary basin evolution, and climatic interactions. This book addresses the range of Andean tectonic processes and their temporal and spatial variations. An improved understanding of these processes is fundamental not only to the Andes but also to other major orogenic systems associated with subduction of the oceanic lithosphere. Andean Tectonics is a critical resource for researchers interested in the causes and consequences of Andean-type orogenesis and the long-term evolution of fold-thrust belts, magmatic arcs, and forearc and foreland basins. Evaluates the history of Andean mountain building over the past 300 million years Integrates recent studies and new perspectives on the complementary records of deformation, magmatism, and sedimentary basin evolution and their interactions in time and space Provides insight into the development of the northern, central, and southern Andes, which have typically been considered in isolation

Delivery of Drugs Ranjita Shegokar, 2020-02-01 Delivery of Drugs: Expectations and Realities of Multifunctional Drug Delivery Systems, Volume Two examines the formulation of micro-nanosized drug delivery systems and recaps opportunities for using physical methods to improve efficacy via mechano-, electroporation. The book highlights innovative delivery methods like PIPAC, including discussions on the regulatory aspects of complex injectables. Written by a diverse range of international researchers from industry and academia, the chapters examine specific aspects of characterization and manufacturing for pharmaceutical applications as well as regulatory and policy aspects. This book connects formulation scientists, regulatory experts, engineers, clinical experts and regulatory stakeholders. This level of discussion makes it a valuable reference resource for researchers in both academia and the pharmaceutical industry who want to learn more about the status of drug delivery systems. Delivery of Drugs examines the fabrication, optimization, scale-up, biological aspects, regulatory and clinical success of various micro and nano drug delivery systems. The volume covers site and organ specific targeting approaches, technologies used in preparation of micro - nanoparticles, challenges of complex type of drug delivery forms and role of physical methods in achieving targeted drug effect. Written by a diverse range of international researchers the chapters examine the specific aspects of characterization and manufacturing of drug delivery system for pharmaceutical application and its regulatory aspects. The series Expectations and Realities of Multifunctional Drug Delivery Systems examines the fabrication, optimization, biological aspects, regulatory and clinical success of wide range of drug delivery carriers. This series reviews multifunctionality and applications of drug delivery systems, industrial trends, regulatory challenges and in vivo success stories. Throughout the volumes discussions on diverse aspects of drug delivery carriers, such as clinical, engineering, and regulatory, facilitate insight sharing across expertise area and form a link for collaborations between industry-academic scientists and clinical researchers. Expectations and Realities of Multifunctional Drug Delivery Systems connects formulation scientists, regulatory experts, engineers, clinical experts and regulatory stakeholders. The wide scope of the book ensures it as a valuable reference resource for researchers in both academia and the pharmaceutical industry who want to learn more about drug delivery systems.

Carbohydrate Recognition Binghe Wang, Geert-Jan Boons, 2011-09-06 This book contains contributions from interdisciplinary scientists to collectively address the issue of targeting carbohydrate recognition for the development of novel therapeutic and diagnostic agents. The book covers (1) biological problems involving carbohydrate recognition, (2) structural factors mediating

carbohydrate recognition, (3) design and synthesis of lectin mimics that recognize carbohydrate ligands with high specificity and affinity, and (4) modulation of biological and pathological processes through carbohydrate recognition.

Geometric topology William Hilal Kazez, 1996-10-22 This is Part 1 of a two-part volume reflecting the proceedings of the 1993 Georgia International Topology Conference held at the University of Georgia during the month of August. The texts include research and expository articles and problem sets. The conference covered a wide variety of topics in geometric topology. Features: Kirby's problem list, which contains a thorough description of the progress made on each of the problems and includes a very complete bibliography, makes the work useful for specialists and non-specialists who want to learn about the progress made in many areas of topology. This list may serve as a reference work for decades to come. Gabai's problem list, which focuses on foliations and laminations of 3-manifolds, collects for the first time in one paper definitions, results, and problems that may serve as a defining source in the subject area.

Issues in Reproductive Medicine Research: 2011 Edition, 2012-01-09 Issues in Reproductive Medicine Research / 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Reproductive Medicine Research. The editors have built Issues in Reproductive Medicine Research: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Reproductive Medicine Research in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Reproductive Medicine Research: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. Computer Techniques for Electromagnetics R. Mittra, 2013-10-22 Computer Techniques for Electromagnetics discusses the ways in which computer techniques solve practical problems in electromagnetics. It discusses the impact of the emergence of high-speed computers in the study of electromagnetics. This text provides a brief background on the approaches used by mathematical analysts in solving integral equations. It also demonstrates how to use computer techniques in computing current distribution, radar scattering, and waveguide discontinuities, and inverse scattering. This book will be useful for students looking for a comprehensive text on computer techniques on electromagnetics.
