CMJ New Music Report ,2003-10-27 CMJ New Music Report is the primary source for exclusive charts of non-commercial and college radio airplay and independent and trend-forward retail sales. CMJ's trade publication, compiles playlists for college and non-commercial stations; often a prelude to larger success.

Seedlings Ty Spencer Vossler,2018-03-09 Aliens, monsters, lunatics, and unlikely heroes abound in *Seedlings*, revealing the human condition in its raw glory. Aided by their own self-destructive nature, humans become an endangered species. In the near future a trio of events shape a perfect storm, altering life on Earth forever. A corrupt agreement with the Mexican bureaucracy gives North America mining rights to an extinct volcano in Tlaxcala, which they claim to use as a radioactive waste storage site. Instead, the greatest technological achievement in the history of man, *Esperanza*, is built inside. *Esperanza* is a starship designed to carry seedlings of the richest 1% to the closest exoplanet. A small, covert military alien population known as, The Collective, are stationed on Earth. For many years they've been waiting patiently for humans to annihilate themselves so that they can use Earth as a staging ground to conquer other (more important) planets. The Collective considers humans as parasitic—cattle to be driven into the slaughterhouse. Earth will make a suitable place for soldiers to take R&R. A brilliant, unhinged, computer software engineer facilitates the domino effect when he invents a drinkable nanochip, linking users to the Internet with a blink of an eye. The chip is engineered so that, with time, users can't disconnect, resulting in unimaginable horrors. After the damage is done, a few amazing survivors are left to fight against the alien presence. *Seedlings*, is beautifully written, begging the question: Can we overcome our self-indulgent ways to become truly human again?

Wall of Destruction James Grimm,2014-10-12 Do you know how fabled Atlantis fell? It was said it sank beneath the waves. What if it happened like this? During the last ice age, a global war between the empire of Atlantis and their arch-rival, the Rama Empire, is tearing the world apart. Atlantis, driven by the hunger for world domination, unleash their versions of weapons of mass destruction. Facing annihilation, in a last desperate gambit, Rama strikes back in a way that destroys the Ice Age world they knew. In the aftermath of Rama's desperation, the survivors of one remote Atlantean colony decide it's time to leave the power hungry, war mongers ruling Atlantis. The problem is, Atlantis is not willing for them to leave.

NIGERIAN COALS: TECHNICAL PROPERTIES AND UTILIZATION POTENTIALS Adeniyi A.

Afonja,2017-07-30 Three fossil fuels - coal, oil and gas supply over 80% of the global primary energy requirements and, in spite of concerns about environmental pollution, the dominance of fossil fuels in the world's energy mix is unlikely to change very much in the foreseeable future. Coal, the highest pollutant of them all fuels over 40% of the global electric power generation and, while considerable effort is being made to diversify to less anthropogenic fuels , various projections show that there will be little change for many years. Most of the increase in power generation in the next few decades will be accounted for by emerging countries and, for many, coal is the only available or affordable source of primary energy. Also, some developed countries depend on coal for up to 90% of power generation. The contribution of cleaner energies (solar, wind, biofuels, etc.), to the global primary energy mix is not likely to exceed 10% in the next two or three decades and it is now widely accepted that the only feasible option in the foreseeable future is to 'clean-up' coal. For over fifty years Nigeria depended on coal for over 70% of primary energy requirements but, with the discovery of oil and gas in early 1960s the demand for coal began to decline. However, in view of perpetual and intractable problems with gas supply and the hydrodams, there has been renewed interest in the country's vast coal resources and many coal-fired power plants are scheduled to come on stream by 2020. It is noteworthy that all the proposed plants will adopt clean coal technologies.

True Tales Hugh Coghill,2014 Poking a sleeping tiger with a stick is not always a wise thing to do, but that act, along with rescuing animals from abusive or neglectful owners, is what this book is about. A house full of rabbits running loose, wolves sloshing around in flooded cages at a so-called sanctuary, and people with odd and unusual pets are all stories that the author has encountered during his more than thirty-year career as an SPCA inspector. Who knows what animals their neighbor is keeping in their house, garage, or garden shed? Perhaps a six-foot long boa constrictor is loose in the crawl space, an adult cougar is tearing up the sofa, or the house is full of Pomeranians! These are the animals that make up some of the fascinating stories shared in this book by a man who has spent a lifetime working with and on behalf of all animals.

Xenophobia and Nativism in Africa, Latin America, and the Caribbean Sabella O.

Abidde,Michael R. Hall,José de Arimatéia da Cruz,2023-07-31 This book historicises and analyses the increasing incidence of xenophobia and nativism in Africa, Latin America, and the Caribbean. It examines how xenophobia and nativism impact the political cohesion and social fabric of states and societies in the regions and offers solutions to aid policy formation and implementation. Rather than utilising an overarching framework, individual theory is applied to chapters to analyse the diverse connections between xenophobia and nativism in the regions. The book explores the economic, nationalistic, political, social, cultural, and psychological triggers for xenophobia and nativism and their impact on an increasingly interconnected and interrelated world. In addition to the individual and comparative examination of these triggers, the book outlines how they can be decreased or altered and argues that Pan-Africanism and the unity of purpose among diverse groups in the western hemisphere is still an ideal to which Africa, Latin America, and the Caribbean can aspire. This book will be of interest to academics in the field of African history, African Studies, Caribbean and Latin American studies, cultural anthropology and comparative sociology.

Zuma ,2003

Piranha James Adair,1992 An explosive novel of high-tech savagery and high-seas justice. With awesome weapons and brutal skill, modern pirates sabotage the luxury liners and yachts in the Caribbean--taking no prisoners. Now a special team of the U.S. Coast Guard--handpicked by an ex-Navy SEAL--is going undercover. And both hunter and hunted are in for a surprise, as the calm waters explode into a bloody battlefield.

Umkhonto we Sizwe Thula Simpson,2016-03-01 The armed struggle waged by the ANC's military wing, Umkhonto we Sizwe (MK), was the longest sustained insurgency in South African history. This book offers the first full account of the rebellion in its entirety, from its early days in the 1950s to the inauguration of Nelson Mandela as South African president in 1994. Vast in scope, this story traverses every corner of South Africa and extends throughout southern Africa, where MK's largest campaigns and heaviest engagements occurred, as well as to the solidarity networks that the rebellion mobilised around the world. Drawing principally from previously unpublished writings and testimonies by the men and women who fought the armed struggle, this book recreates the drama, heroism and tragedy of their experiences. It tells the story of leaders like Nelson Mandela, Oliver Tambo, Joe Slovo and Chris Hani, whose reputations were forged in the crucible of the armed struggle, but it is also a tale of martyrs such as Looksmart Ngudle, Ashley Kriel and Phila Ndwandwe, as well as of MK cadres such as Leonard Nkosi and Glory Sedibe, who would ultimately turn against the ANC and collaborate with the state in hunting down their former comrades. Written in a fresh, immediate style, Umkhonto we Sizwe is an honest account of the armed struggle and a fascinating chronicle of events that changed South African history.

Revisiting State Personhood and World Politics Bianca Naude,2021-12-16 Breathing fresh air into debates surrounding foreign policy and interstate relations, Bianca Naude presents a holistic theory of states as collectives of people that cannot be reduced to their individual constituents. Moving among current research on the ontological status of the state alongside important arguments in support of the state personhood thesis, Naude begins by exploring Freud's personality theory and the ways in which this theory has evolved over time in response to newer insights from the field of experimental psychology. Recognizing that Freud's work is in many ways outdated, she considers more recent literature on narcissism as an aspect of self-esteem rather than a form of psychopathology, drawing specifically on Kohut's expansion of the concept of narcissism as a normal feature of personality development. Using the South African state as a case study, Naude demonstrates the various ways in which the state presents itself to the outside world on the one hand, and how it wishes to see itself on the other. She further considers how narcissistic defenses help protect the state's ego from criticism and self-judgments. *Revisiting State Personhood and World Politics* will help readers understand how the state sees itself, why or when the state experiences shame, humiliation, guilt or pride, and how it responds to these self-conscious emotions. It will be a valuable resource to researchers and students of International Relations.
