**Alpha Girls** Julian Guthrie, 2019-04-30 An unforgettable story of four women who, through grit and ingenuity, became stars in the cutthroat, high-stakes, male dominated world of venture capital in Silicon Valley, and helped build some of the foremost companies of our time. In Alpha Girls, award-winning journalist Julian Guthrie takes readers behind the closed doors of venture capital, an industry that transforms economies and shapes how we live. We follow the lives and careers of four women who were largely written out of history - until now. Magdalena Yesil, who arrived in America from Turkey with \$43 to her name, would go on to receive her electrical engineering degree from Stanford, found some of the first companies to commercialize internet access, and help Marc Benioff build Salesforce.

Mary Jane Elmore went from the corn fields of Indiana to Stanford and on to the storied venture capital firm IVP - where she was one of the first women in the U.S. to make partner - only to be pulled back from the glass ceiling by expectations at home. Theresia Gouw, an overachieving first-generation Asian American from a working-class town, dominated the foosball tables at Brown (she would later reluctantly let Sergey Brin win to help Accel Partners court Google), before she helped land and build companies including Facebook, Trulia, Imperva, and ForeScout. Sonja Hoel, a Southerner who became the first woman investing partner at white-glove Menlo Ventures, invested in McAfee, Hotmail, Acme Packet, and F5 Networks. As her star was still rising at Menlo, a personal crisis would turn her into an activist overnight, inspiring her to found an all-women's investment group and a national nonprofit for girls. These women, juggling work and family, shaped the tech landscape we know today while overcoming unequal pay, actual punches, betrayals, and the sexist attitudes prevalent in Silicon Valley and in male-dominated industries everywhere. Despite the setbacks, they would rise again to rewrite the rules for an industry they love. In *Alpha Girls*, Guthrie reveals their untold stories.

*Alpha Status* Nathan Ikon Crumpton, 2021-12-26 If capitalism were a person, who would it be? Where would it live? Who, how, and what would it love? Dive into the salacious world of hedge funds, high finance, and penthouse sex dungeons. This raucous tale of a wildly successful New York fund manager and his globetrotting adventures reflects the stark new reality of contemporary uber-wealth, and the capitalist system which created it. Become enraptured with - or repulsed by - the heinously opulent world of the anonymous protagonist and his class of modern billionaires. But challenging the protagonist's high-flying escapades in finance and sexual conquest is his twin brother, a maudlin

comparative literature professor and single father. With a life defined by tragedy, the brother becomes the countervailing voice of reason and social tranquility. Filled with equal parts fictitious plotline and broadly researched non-fiction sources, this book offers pointed analysis of the 21st century socio-economic landscape, and begs critical questions about how capitalism can try to reconcile its avaricious nature with a world demanding a more equitable division of resources. Enlightening yet critical. Serious yet absurd. Fictitious yet factual. This non-fiction novel provides graphic and unapologetic scrutiny from both extremes of the contemporary socio-economic spectrum.

The Innovator's Method Nathan Furr, Jeff

Dyer, 2014-08-19 Have you ever come up with an idea for a new product or service but didn't take any action because you thought it would be too risky? Or at work, have you had what you thought could be a big idea for your company—perhaps changing the way you develop or distribute a product, provide customer service, or hire and train your employees? If you have, but you haven't known how to take the next step, you need to understand what the authors call the innovator's method—a set of tools emerging from lean start-up, design thinking, and agile software development that are revolutionizing how new ideas are created, refined, and brought to market. To date these tools have helped entrepreneurs, designers, and software developers manage uncertainty—through cheap and rapid experiments that systematically lower failure rates and risk. But many managers and leaders struggle to apply these powerful tools within their organizations, as they often run counter to traditional managerial thinking and practice. Authors Nathan Furr and Jeff Dyer wrote this book to address that very problem. Following the breakout success of *The Innovator's DNA*—which Dyer wrote with Hal Gregersen and bestselling author Clay Christensen to provide a framework for generating ideas—this book shows how to make those ideas actually happen, to commercialize them for success. Based on their research inside corporations and successful start-ups, Furr and Dyer developed the innovator's method, an end-to-

end process for creating, refining, and bringing ideas to market. They show when and how to apply the tools of their method, how to adapt them to your business, and how to answer commonly asked questions about the method itself, including: How do we know if this idea is worth pursuing? Have we found the right solution? What is the best business model for this new offering? This book focuses on the “how”—how to test, how to validate, and how to commercialize ideas with the lean, design, and agile techniques successful start-ups use. Whether you’re launching a start-up, leading an established one, or simply working to get a new product off the ground in an existing company, this book is for you.
