Mass Media Advertising Edith Smit, 1999 For most consumers, advertising is less important than advertisers might think. Advertising appears to function as something in the background that is hardly noticed, as wallpaper. But mass-mediated advertising should at least function as a reminder when people are making choices. Smit addresses these questions through in-depth interviews, a nation-wide telephone survey with follow-up mail and a face-to-face survey. Edith Smit is associate professor at the Department of Communication at the University of Amsterdam and at the Amsterdam School of Communications Research (ascor). She is also Deputy Director of swocc, the Dutch Foundation for Fundamental Research on Commercial Communication.

Ad Nauseam Carrie McLaren, Jason Torchinsky, 2009-06-23 With the style and irreverence of Vice magazine and the critique of the corporatocracy that made Naomi Klein's *No Logo* a global hit, the cult magazine *Stay Free!*—long considered the *Adbusters* of the United States—is finally offering a compendium of new and previously published material on the impact of consumer culture on our lives. The book questions, in the broadest sense, what happens to human beings when their brains are constantly assaulted by advertising and corporate messages. Most people assert that advertising is easily ignored and doesn't have any effect on them or their decision making, but *Ad Nauseam* shows that consumer pop culture does take its toll. In an engaging, accessible, and graphically appealing style, Carrie McLaren and Jason Torchinsky (as well as contributors such as David Cross, The Onion's Joe Garden, The New York Times's Julie Scelfo, and others) discuss everything from why the TV program *CSI* affects jury selection, to the methods by which market researchers stalk shoppers, to how advertising strategy is like dog training. The result is an entertaining and eye-opening account of the many ways consumer culture continues to pervade and transform American life.

Your Ad Here Michael Serazio, 2013-04-05 2015 Susanne K. Langer Award for Outstanding Scholarship, Media Ecology Association 2013 Book of the Year, Visual Communication Division, National Communication Association Amidst the profound upheavals in technology, economics, and culture that mark the contemporary moment, marketing strategies have multiplied, as brand messages creep ever deeper into our private lives. In *Your Ad Here*, an engaging and timely new book, Michael Serazio investigates the rise of “guerrilla marketing” as a way of understanding increasingly covert and interactive flows of commercial persuasion. Digging through a decade of trade press coverage and interviewing dozens of agency CEOs, brand managers, and creative directors, Serazio illuminates a diverse and fascinating set of campaign examples: from the America's Army video game to Pabst Blue Ribbon's “hipster hijack,” from buzz agent bloggers and tweeters to The Dark Knight's “Why So Serious?” social labyrinth. Blending rigorous analysis with eye-opening reporting and lively prose, *Your Ad Here* reveals the changing ways that commercial culture is produced today. Serazio goes behind-the-scenes with symbolic creators to appreciate the professional logic informing their work, while giving

readers a glimpse into this new breed of “hidden persuaders” optimized for 21st-century media content, social patterns, and digital platforms. Ultimately, this new form of marketing adds up to a subtle, sophisticated orchestration of consumer conduct and heralds a world of advertising that pretends to have nothing to sell.

The Language of Pictures in Print Media Advertising Wilfried Pichler, 2002-03-07 Inhaltsangabe: Abstract: Today we observe a development in which the role of language is

steadily decreasing whereas the impact of pictures is increasing. This goes hand in hand with a development in which information relies more and more on visual concepts. More and more language takes the part of explaining how to read the visual presentations, more and more language takes the part of providing the background information which is necessary to understand the meaning of the visual foreground. Kress and van Leeuwen (1998) argue that Today, we seem to move towards a decrease of control over language (e.g. the greater variety of accents allowed on the public media, the increasing problems in enforcing normative spelling), and towards an increase in codification and control over the visual (e.g. the use of image banks from which ready-made images can be drawn for the construction of visual texts, and, generally, the effect of computer imaging technology). Although we may be aware of this tendency, we have not been taught in school how to read visual concepts and so most of us share some degree of illiteracy concerning a critical reading of information presented by images. This is remarkable because we all agree about their influence on our lives but at the same time when we do not develop analytical tools for describing what kinds of strategies, what kinds of concepts are working in visual presentations of information. We tend to overlook the importance of visual concepts simply because we generally do not know enough about their code. This paper analyses photos and language which are parts of ads, which have definitely been designed for transferring messages because they have been made to advertise one specific product. Images and the text of advertisements never are casual products like family pictures. Although the photo in the family album is coded its coding is less elaborated than the coding of pictures in ads. We have to keep in mind that many people, experts in advertising, experts in public relations were involved in the process of designing an ad before we can look at the final result. This is why ads are definitely conceptually designed because they are meant to create a specific meaning in the viewer's mind. It is a truism that no visual concept, no photo of an ad was chosen by chance. Photographs and language of ads are more likely to have been carefully constructed and selected according to the meaning they are supposed to create. This is [...]

Advertising Design by Medium Robyn Blakeman, 2022-03-28 Conceived to give readers the principles and the tools to create successful advertisements in a variety of mediums, this book is a detailed exploration of how visual and verbal elements of design work together to solve a business goal. Effective visual and verbal design solutions are more than just a good idea; they are purposeful, on-target, on-strategy, and recognizable no matter where, or in what form, they appear. Success depends on creative teams' understanding of ideation, layout, type, color, varied image formats, copywriting, media advantages and limitations, and production procedures for varied media formats. The step-by-step approach of this book goes beyond broad theoretical discussions on copy and design. Instead, the book dissects the creative process into individualized and detailed discussions both creative and non-creative students alike can understand and employ. This book is ideal as a textbook for design courses within programs in advertising, graphic design, integrated marketing communication, strategic marketing, entrepreneurship, business, and mass communication. Accompanying the text are online materials for instructors: lecture slides, a testbank, and an instructor manual.
