*Flexible Global Ocean-Atmosphere-Land System Model* Tianjun Zhou, Yongqiang Yu, Yimin Liu, Bin Wang, 2013-11-19 Coupled climate system models are of central importance for climate studies. A new model known as FGOALS (the Flexible Global Ocean-Atmosphere-Land System model), has been developed by the State Key Laboratory of Numerical Modeling for Atmospheric Sciences and Geophysical Fluid Dynamics, Institute of Atmospheric Physics, Chinese Academy of Sciences (LASG/IAP, CAS), a first-tier national geophysical laboratory. It serves as a powerful tool, both for deepening our understanding of fundamental mechanisms of the climate system and for making decadal prediction and scenario projections of future climate change. *Flexible Global Ocean-Atmosphere-Land System Model: A Modeling Tool for the Climate Change Research Community* is the first book to offer systematic evaluations of this model's performance. It is comprehensive in scope, covering both developmental and application-oriented aspects of this climate system model. It also provides an outlook of future development of FGOALS and offers an overview of how to employ the model. It represents a valuable reference work for researchers and professionals working within the related areas of climate variability and change. Prof. Tianjun Zhou, Yongqiang Yu, Yimin Liu and Bin Wang work at LASG, the Institute of Atmospheric Physics, Chinese Academy of Sciences, China.

*Ending Africa's Energy Deficit and the Law* Yinka Omorogbe, Ada Ordor, 2018-02-22 With the inclusion of access to energy in the sustainable development goals, the role of energy to human existence was finally recognized. Yet, in Africa, this achievement is far from realized. Omorogbe and Ordor bring together experts in their fields to ask what is stalling progress, examining problems from institutions catering to vested interests at the continent's expense, to a need to develop vigorous financial and fiscal frameworks. The ramifications and complications of energy law are labyrinthine: this volume discusses how energy deficits can burden disabled people, women, and children in excess of their more fortunate counterparts, as well as considering environmental issues, including the delicate balance between the necessity of water for drinking and cleaning and the use of water in industrial processes. A pivotal work of scholarship, the book poses pressing questions for energy law and international human rights.

**Reinforced-concrete Slab-column Structures** Andrzej Ajdukiewicz, Włodzimierz Starosolski, 1990 This book presents a review of the whole field of flat plates and slab-column structures, also known as beamless structures, encompassing their analysis, design and detailed construction from both the theoretical and practical aspects. Methods of analysis and design for slabs and entire slab-column structures are compared and assessed both for elastic and post-elastic phases with recommendations for practical use. The review and comparison of the techniques of design for joints between slabs and columns together with test results presents the reader with a choice of applications. The outline of international construction solutions used in monolithic prefabricated structures, including lift-slab structures, includes examples of real buildings and provides a wealth of information for designers. An integral part of the book consists of tables and nomograms for the direct calculation of bending moments, deflections and support reactions in slabs locally supported.

**Anatomy of State Capture** Nina Callaghan, Robyn Foley, Mark Swilling, 2021-11-26 Following the release of the Public Protector's State of Capture Report in November 2016, South Africans have been witness to an explosion of almost daily revelations of corruption, mismanagement and abuses by those entrusted to lead the nation. The extent of this betrayal is overwhelming and it is often difficult to distil what actually happened during the Zuma administration. This book draws on the insights and expertise of 19 contributors from various sectors and disciplines to provide an account of what transpired at strategic sites of the state capture project. The ongoing threat of state capture demands a response that probes beyond what happened to understanding how it was allowed to happen. The stubborn culture of corruption and misgovernance continue to manifest unabated and the predatory practices which enable state capture have not yet been disrupted. It is our hope that the various case studies and analyses presented in this book will contribute to confronting these shortcomings in current discourse, and open avenues for progressive deliberation on how to collectively reclaim the prospects of a just and prosperous South Africa for all.

**South Africa: Wind Energy Barriers** Richard Ganter, 2011-04 The rapid adoption of wind energy in the renewable energy mix can be seen in many industrialized nations in the past decade, in particular the need to agreed greenhouse gas reduction and stable energy supply are seen as a sound vision for a sustainable energy policy'. In an emerging market such as South Africa there are abundant renewable resources including wind energy, however there is low adoption observed to date. This study investigates barriers to entry in the South African wind energy sector and what the priorities are to remove such barriers for successful deployment of wind technology. Therefore, it was required to examine successful deployment of wind energy in the European Union and how such barriers were removed; this was set in the current status of the renewable energy sector and existing barriers in South Africa. It was necessary to gain insight of the inter-related issues on opening a traditional fossil fuel based energy market to a transitional implementation of renewable energy provisioning, considering the current utility monopoly based energy landscape in South Africa.

RE , Idasa makes this submission solely in its own capacity, but many of the comments presented here build on the findings of the forthcoming assessment report of the Electricity Governance Initiative, South Africa, produced in collaboration of WWF-South Africa, the Energy Research Center of the University of Cape Town, Sustainable Energy Africa, Green Connections, Earth Life Africa, and the Internatio. [...] Given the wide- ranging impacts of these choices for the economy, the environment, and for social welfare of all South Africans, the IEP should be considered a legitimate basis for future electricity choices only if it has been subject to some form of public participation and comment consistent with the provisions of the Promotion of Administrative Justice Act (PAJA) 3 of 2000. [...] THE APPLICABLE LEGAL FRAMEWORK FOR NERSA'S DECISION 13 When exercising its discretion to determine the price of electricity, NERSA is bound by the principles of administrative justice in s 33 of the Constitution of the Republic of South Africa, 1996 (the Constitution) and the Promotion of Administrative Justice Act (PAJA) 3 of 2000.9 These principles, together with other legislative requiremen. [...] 18 In light of the above, we submit that any increase in Eskoms tariff which is premised on the need to promote infrastructural development, cannot be meaningfully considered in anticipation of the consideration of all the above issues in the IRP and IEP. [...] 22 In the circumstances we submit that the multi-year price determination in its current form is premature, and furthermore: 22.1 would be unlawful and ultra vires the powers of NERSA, in that NERSA will be employing assumptions of its own (or of Eskom) which should be determined in the IRP and IEP; 22.2 is tantamount to accepting the dictates of Eskom regarding the need for additional electricity.
