A Long Walk to Water Linda Sue Park, 2010 When the Sudanese civil war reaches his village in 1985, 11-year-old Salva becomes separated from his family and must walk with other Dinka tribe members through southern Sudan, Ethiopia and Kenya in search of safe haven. Based on the life of Salva Dut, who, after emigrating to America in 1996, began a project to dig water wells in Sudan. By a Newbery Medal-winning author.

How I Met My Monster Amanda Noll, 2019-11-03 One night, when Ethan reaches under his bed for a toy truck, he finds this note instead: Monsters! Meet here for final test. Ethan is sure his parents are trying to trick him into staying under the covers, until he sees five colorful sets of eyes blinking at him from beneath the bed. Soon, a colorful parade of quirky, squeaky little monsters compete to become Ethan's monster. But only the little green monster, Gabe, has the perfect blend of stomach-rumbling and snorting needed to get Ethan into bed and keep him there so he falls asleep—which as everyone knows, is the real reason for monsters under beds. With its perfect balance of giggles and shivers, this silly-spooky prequel to the award-winning *I Need My Monster* and *Hey, That's MY Monster!* will keep young readers entertained.

Don't Forget to Remember Ellie Holcomb, 2020-03-03 Do you ever forget to remember what's true? Sometimes remembering is hard to do! But in this lyrical tale, Ellie Holcomb celebrates creation's reminders of God's love, which surrounds us from sunrise to sunset, even on our most forgetful of days.

The Effects of Video Games on Children Barrie Gunter, 1998-01-01 The rapid growth in popularity of computer and video games, particularly among children and teenagers, has given rise to public concern about the effects they might have on youngsters. The violent themes of many of these games, coupled with their interactive nature, have led to accusations that they may be worse than televised violence in affecting children's antisocial behaviour. Other allegations are that they have an addictive quality and that excessive playing results in a diminished social contact and poorer school performance. But how bad are video games? There are strong methodological reasons for not accepting the evidence for video games effects at face value. There are also positive signs that playing these games can enhance particular mental competencies in children. This book provides an up-to-date review and critique of research evidence from around the world in an attempt to put the issue of video game effects into perspective.

The Book of Everything Guus Kuijer, 2012-04-01 Faith is joy is love is hope in this novel of exquisite power and everyday miracles, reminiscent of Barbara Kingsolver's *THE POISONWOOD BIBLE*. Thomas can see things no one else can see. Tropical fish swimming in the canals. The magic of Mrs. Van Amersfoort, the Beethoven-loving witch next door. The fierce beauty of Eliza with her artificial leg. And the Lord Jesus, who tells him, Just call me Jesus. Thomas records these visions in his *Book of Everything*. They comfort him when his father beats him, when the angels weep for his mother's black eyes. And they give him the strength to finally confront his father and become what he wants to be when he grows up: Happy.

Be Kind Pat Zietlow Miller, 2018-02-06 When Tanisha spills grape juice all over her new dress, her classmate contemplates how to make her feel better and what it means to be kind. From asking the new girl to play to standing up for someone being bullied, this moving and thoughtful story explores what a child can do to be kind, and how each act, big or small, can make a difference--or at least help a friend. With award-winning author Pat Zietlow Miller's gentle text and Jen Hill's irresistible art, *Be Kind* is an unforgettable story about how two

simple words can change the world.

Hey, Kiddo: A Graphic Novel Jarrett J. Krosoczka, 2018-10-09 The powerful, unforgettable graphic memoir from Jarrett Krosoczka, about growing up with a drug-addicted mother, a missing father, and two unforgettably opinionated grandparents. A National Book Award Finalist! In kindergarten, Jarrett Krosoczka's teacher asks him to draw his family, with a mommy and a daddy. But Jarrett's family is much more complicated than that. His mom is an addict, in and out of rehab, and in and out of Jarrett's life. His father is a mystery -- Jarrett doesn't know where to find him, or even what his name is. Jarrett lives with his grandparents -- two very loud, very loving, very opinionated people who had thought they were through with raising children until Jarrett came along. Jarrett goes through his childhood trying to make his non-normal life as normal as possible, finding a way to express himself through drawing even as so little is being said to him about what's going on. Only as a teenager can Jarrett begin to piece together the truth of his family, reckoning with his mother and tracking down his father. Hey, Kiddo is a profoundly important memoir about growing up in a family grappling with addiction, and finding the art that helps you survive.

Unruly Media Carol Vernallis, 2013-09-19 Unruly Media argues that we are the crest of a new international style in which sonic and visual parameters become heightened and accelerated. This audiovisual turn calls for new forms of attention. Post-classical cinema, with its multi-plot narratives and flashy style, fragments under the influence of audiovisual numbers and music-video-like sync. Music video becomes more than a way of selling songs. YouTube's brief, low-res clips encompass many forms and foreground reiteration, graphic values and affective intensity. These three media are riven by one another: a trajectory from YouTube through music video to the new digital cinema reveals commonalities, especially in the realms of rhythm, texture and form. This is the first book to account for the current audiovisual landscape across medium and platform, and it demonstrates that attending equally to soundtrack and image reveals how these media work and how they both mirror and shape our experience.

Video Search and Mining Dan Schonfeld, Caifeng Shan, Dacheng Tao, Liang Wang, 2010-05-22 As cameras become more pervasive in our daily life, vast amounts of video data are generated. The popularity of YouTube and similar websites such as Tudou and Youku provides strong evidence for the increasing role of video in society. One of the main challenges confronting us in the era of information technology is to - fectively rely on the huge and rapidly growing video data accumulating in large multimedia archives. Innovative video processing and analysis techniques will play an increasingly important role in resolving the difficult task of video search and retrieval. A wide range of video-based applications have benefited from - vances in video search and mining including multimedia information mana- ment, human-computer interaction, security and surveillance, copyright prot- tion, and personal entertainment, to name a few. This book provides an overview of emerging new approaches to video search and mining based on promising methods being developed in the computer vision and image analysis community. Video search and mining is a rapidly evolving discipline whose aim is to capture interesting patterns in video data. It has become one of the core areas in the data mining research community. In comparison to other types of data mining (e. g. text), video mining is still in its infancy. Many challenging research problems are facing video mining researchers.

The Glass Castle Jeannette Walls, 2007-01-02 A triumphant tale of a young woman and her difficult childhood, The Glass Castle is a remarkable memoir of resilience, redemption, and a revelatory look into a family at once deeply dysfunctional and wonderfully vibrant. Jeannette Walls was the second of four children raised by anti-institutional parents in a household of extremes.

The Dot Peter H. Reynolds, 2022-05-31 Vashti believes that she cannot draw, but her art teacher's encouragement leads her to change her mind and she goes on to encourage another student who feels the same as she had.

The Fourth Turning William Strauss, Neil Howe, 1997-12-29 NATIONAL BESTSELLER • Discover the game-changing theory of the cycles of history and what past generations can teach us about living through times of upheaval—with deep insights into the roles that Boomers, Generation X, and Millennials have to play. First comes a High, a period of confident expansion. Next comes an Awakening, a time of spiritual exploration and rebellion. Then comes an Unraveling, in which individualism triumphs over crumbling institutions. Last comes a Crisis—the Fourth Turning—when society passes through a great and perilous gate in history. William Strauss and Neil Howe will change the way you see the world—and your place in it. With blazing originality, *The Fourth Turning* illuminates the past, explains the present, and reimagines the future. Most remarkably, it offers an utterly persuasive prophecy about how America's past will predict what comes next. Strauss and Howe base this vision on a provocative theory of American history. The authors look back five hundred years and uncover a distinct pattern: Modern history moves in cycles, each one lasting about the length of a long human life, each composed of four twenty-year eras—or “turnings”—that comprise history's seasonal rhythm of growth, maturation, entropy, and rebirth. Illustrating this cycle through a brilliant analysis of the post-World War II period, *The Fourth Turning* offers bold predictions about how all of us can prepare, individually and collectively, for this rendezvous with destiny.

The First 20 Hours Josh Kaufman, 2013-06-13 Forget the 10,000 hour rule—what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition—how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in record time . . . and have more fun along the way.

Encounters in Video Art in Latin America Elena Shtromberg ,Glenn Phillips,2023-02-14 With insightful essays and interviews, this volume examines how artists have experimented with the medium of video across different regions of Latin America since the 1960s. The emergence of video art in Latin America is marked by multiple points of development, across more than a dozen artistic centers, over a period of more than twenty-five years. When first introduced during the 1960s, video was seen as empowering: the portability of early equipment and the possibility of instant playback allowed artists to challenge and at times subvert the mainstream media. Video art in Latin America was—and still is—closely related to the desire for social change. Themes related to gender, ethnic, and racial identity as well as the consequences of social inequality and ecological disasters have been fundamental to many artists' practices. This compendium explores the history and current state of artistic experimentation with video throughout Latin America. Departing from the relatively small body of existing scholarship in English, much of which focuses on individual countries, this volume approaches the topic thematically, positioning video artworks from different periods and regions throughout Latin America in dialogue with each other. Organized in four broad sections—Encounters, Networks and Archives, Memory and Crisis, and Indigenous Perspectives—the book's essays and interviews encourage readers to examine the medium of video across varied chronologies and geographies.

Intelligent Video Event Analysis and Understanding Jianguo Zhang,Ling Shao,Lei Zhang,Graeme A. Jones,2011-01-19 With the vast development of Internet capacity and speed, as well as wide adoption of media technologies in people's daily life, a large amount of videos have been surging, and need to be efficiently processed or organized based on interest. The human visual perception system could, without difficulty, interpret and recognize thousands of events in videos, despite high level of video object clutters, different types of scene context, variability of motion scales, appearance changes, occlusions and object interactions. For a computer vision system, it has been very challenging to achieve automatic video event understanding for decades. Broadly speaking, those challenges include robust detection of events under clutter, event interpretation under complex scenes, multi-level semantic event inference, putting events in context and multiple cameras, event inference from object interactions, etc. In recent years, steady progress has been made towards better models for video event categorisation and recognition, e. g. , from modelling events with bag of spatial temporal features to discovering

event context, from detecting events using a single camera to inferring events through a distributed camera network, and from low-level event feature extraction and description to high-level semantic event classification and recognition. Nowadays, text based video retrieval is widely used by commercial search engines. However, it is still very difficult to retrieve or categorise a specific video segment based on their content in a real multimedia system or in surveillance applications.
