Advanced Recorder Technique Gudrun Heyens,2020-10-22

Advanced Recorder Technique is intended for advanced players of the alto recorder who are seeking rigorous practise material for developing their instrumental and musical skills. The aim is that within the purely technical material the player will be able to discover and transform the musical parameters of sound, movement, tension/relaxation, and from that learn to deal musically with the individual technical elements (scales, arpeggios, trills etc.). In accordance with the requirements of the recorder's original literature the exercises are intended mainly for the alto recorder. However, numerous recent arrangements of early baroque violin music for soprano recorder, which have become an established part of the repertoire, have necessitated the serious treatment of this instrument, too. A number of the chapters can therefore be played not only on the alto but transposed for the soprano recorder as well. The term technique should not be misunderstood: the objectives of the exercises are musical expression, inspiration, emotion and creative note-shaping. This two-volume method deals with four aspects of recorder playing: finger and tonguing technique as well as breathing and sound production.

Advanced Recorder Technique Gudrun Heyens, 2020-10-22

This technical volume is addressed to advanced treble recorder players looking for repertoire that is suited for consistent work on the foundations of their instrumental and musical abilities. In accordance with the original literature for the treble recorder, the exercises are mainly tailored to this instrument. Some technical chapters can be practised on both the treble and descant recorder (with transposed fingering). The term 'technical' must not be misunderstood here: ultimately, the exercises aim at artistic expression, emotion, and tonal interpretation.
