The Not-So-Intelligent Designer Abby Hafer,2016-09-29 Why do men's testicles hang outside the body? Why does our appendix sometimes explode and kill us? And who does the Designer like better, anyway - us, or squid? These and other questions are addressed in *The Not-So-Intelligent Designer*. Dr. Abby Hafer argues that the human body has many faulty design features that would never have been the choice of an intelligent creator. She also points out other animals that got better body parts, which makes the Designer look a bit strange; discusses the history and politics of Intelligent Design and creationism; reveals animals that shouldn't exist according to Intelligent Design; and disposes of the idea of irreducible complexity. Her

points are illustrated with pictures (by Alexander Winkler), wit, and erudition.

The Designs of Love Joyce Armintrout,2016-11-18 This is the story of a young girl and two unrequited loves. When the one she loves, Tyler, announces his engagement to someone else, she is forced to leave her home to try to mend her broken heart, leaving behind Witt, the one who loves her. Circumstances draw her back home. She learns Tyler's engagement has been called off, so she has new hopes of getting his attention. She soon learns that she will have a decision to make when her brother tells her of Witt's feelings, something she was unaware of. She knows she shouldn't see Tyler, but her heart won't let her say no to him. Their affair and an unfortunate decision made by her nearly ruins her reputation. She flees back to the city to devote her life to her career. She is once again drawn back home to open a dress shop with her best friend. By then, she knows who her true love is, but a simple misunderstanding causes her to lose him. If it weren't for two very determined friends, their story might have had a very different ending.

How to Make Sense of Any Mess Abby Covert, 2014 Everything is getting more complex. It is easy to be overwhelmed by the amount of information we encounter each day. Whether at work, at school, or in our personal endeavors, there's a deepening (and inescapable) need for people to work with and understand information. Information architecture is the way that we arrange the parts of something to make it

understandable as a whole. When we make things for others to use, the architecture of information that we choose greatly affects our ability to deliver our intended message to our users. We all face messes made of information and people. This book defines the word mess the same way that most dictionaries do: A situation where the interactions between people and information are confusing or full of difficulties. - Who doesn't bump up against messes made of information and people every day? How to Make Sense of Any Mess provides a seven step process for making sense of any mess. Each chapter contains a set of lessons as well as workbook exercises architected to help you to work through your own mess.
