Fab Neil Gershenfeld,2011-02 What if you could someday put the manufacturing power of an automobile plant on your desktop? According to Neil Gershenfeld, the renowned MIT scientist and inventor, the next big thing is personal fabrication-the ability to design and produce your own products, in your own home, with a machine that combines consumer electronics and industrial tools. Personal fabricators are about to revolutionize the world just as personal computers did a generation ago, and Fab shows us how.

Linux Desktop Pocket Guide David Brickner,2005-09-23 While Mac OS X garners all the praise from pundits, and Windows XP attracts all the viruses, Linux is quietly being installed on millions of desktops every year. For programmers and system administrators, business users, and educators, desktop Linux is a breath of fresh air and a needed alternative to other operating systems. The Linux Desktop Pocket Guide is your introduction to using Linux on five of the most popular distributions: Fedora, Gentoo, Mandriva, SUSE, and Ubuntu. Despite what you may have heard, using Linux is not all that hard. Firefox and Konqueror can handle all your web browsing needs; GAIM and Kopete allow you to chat with your friends on the AOL, MSN, and Yahoo! networks; and the email programs Evolution and Kontact provide the same functionality as Microsoft Outlook, with none of the cost. All of these programs run within the beautiful, feature-

packed, and easy-to-use GNOME or KDE desktop environments. No operating system truly just works, and Linux is no exception. Although Linux is capable of running on most any computing hardware that Microsoft Windows can use, you sometimes need to tweak it just a little to make it work the way you really want. To help you with this task, Linux Desktop Pocket Guide covers essential topics, such as configuring your video card, screen resolution, sound, and wireless networking. And laptop users are not left out--an entire section is devoted to the laptop issues of battery life, sleep, and hibernate modes.

The Desktop Studio ,2002 Home recording using computers is one of the fastest growth segments in music. Over a half-dozen new magazines addressing this market have launched in the last five years alone, helping make the computer the dominant tool of the audio industry and the at home recordist. With the right software, your computer can be a recorder, mixer, editor, video production system, and even a musical instrument. The Desktop Studio will help you get the most out of your computer and turn it - and you - into a creative powerhouse. It is a fully illustrated, comprehensive look at software and hardware, and provides expert tips for getting the most out of your music computer.   Graphic Design on the Desktop Marcelle Lapow Toor,1998-08-25 The complete and user-friendly introduction to graphic design--in a new edition Now with information on Web site design, plus examples, exercises, and more! Today, anyone with a good basic computer setup can produce a newsletter or a Web page--but to create effective, professional-quality pieces that stand out from the competition, you need more than a hard drive and some decent software. You need an understanding of how visual communication works and a solid grasp of the principles of design, composition, and typography. You need Graphic Design on the Desktop. Written specifically for those who have little or no design background or experience, this accessible guide teaches you the fundamentals of sound graphic design and gives you the practical know-how to put them to work on your own projects, from initial concept through final production. This new edition covers every key element of the design process, including format, layout and page design, typesetting, color, and illustrations--and offers clear explanations of type terminology, printing terms, and more. It guides you step-by-step through the design and production of ads, posters, brochures, and other promotional materials, as well as newsletters and magazines. A separate chapter on designing for the Web helps you make the most of home page and

Web site designs. Complete with helpful examples, exercises, hints, and checklists, plus tips on common pitfalls and how to avoid them, Graphic Design on the Desktop is the ideal design partner for projects that get attention and get results.

Cross-platform Desktop Application Development: Electron, Node, NW.js, and React Dmitry Sheiko,2017-07-27 Build powerful cross-platform desktop applications with web technologies such as Node, NW.JS, Electron, and React About This Book Build different cross-platform HTML5 desktop applications right from planning, designing, and deployment to enhancement, testing, and delivery Forget the pain of cross-platform compatibility and build efficient apps that can be easily deployed on different platforms. Build simple to advanced HTML5 desktop apps, by integrating them with other popular frameworks and libraries such as Electron, Node.JS, Nw.js, React, Redux, and TypeScript

Who This Book Is For This book has been written for developers interested in creating desktop applications with HTML5. The first part requires essential web-master skills (HTML, CSS, and JavaScript). The second demands minimal experience with React. And finally for the third it would be helpful to have a basic knowledge of React, Redux, and TypeScript. What You Will Learn Plan, design, and develop different cross-platform desktop apps Application architecture with React and local state Application architecture with React and Redux store Code design with TypeScript interfaces and specialized types CSS and component libraries such as Photonkit, Material UI, and React MDL HTML5 APIs such as desktop notifications, WebSockets, WebRTC, and others Desktop environment integration APIs of NW.js and Electron Package and distribute for NW.JS and Electron In Detail Building and maintaining cross-platform desktop applications with native languages isn't a trivial task. Since it's hard to simulate on a foreign platform, packaging and distribution can be quite platform-specific and testing cross-platform apps is pretty complicated. In such scenarios, web technologies such as HTML5 and JavaScript can be your lifesaver. HTML5 desktop applications can be distributed across different platforms (Window, MacOS, and Linux) without any modifications to the code. The book starts with a walk-through on building a simple file explorer from scratch powered by NW.JS. So you will practice the most exciting features of bleeding edge CSS and JavaScript. In addition you will learn to use the desktop environment integration API, source code protection, packaging, and auto-updating with NW.JS. As the second application you will build a chat-system example implemented with Electron and React. While developing the chat app, you will get Photonkit. Next, you will create a screen capturer with NW.JS, React, and Redux.

Finally, you will examine an RSS-reader built with TypeScript, React, Redux, and Electron. Generic UI components will be reused from the React MDL library. By the end of the book, you will have built four desktop apps. You will have covered everything from planning, designing, and development to the enhancement, testing, and delivery of these apps. Style and approach Filled with real world examples, this book teaches you to build cross-platform desktop apps right from scratch using a step-by-step approach.
