Holidays on Display William L. Bird, 2007-08-30 For millions of people the world over, the annual visit to a department store to view the festive window displays and visit Santa in his winter wonderland is a treasured holiday tradition. In America, the Thanksgiving holiday is almost inconceivable without Macy's annual parade. But how did holiday traditions like this begin? Who are the behind-the-scenes magicians that conjure up this unique blend of imagination, showmanship, and salesmanship? Holidays on Display is a comprehensive overview of the art and industry of the holiday display. Author William L. Bird, Jr., traces its evolution as holiday decorations moved from shop windows to building exteriors and out into the street in the form of parade floats. In this fascinating and colorful history we are introduced to turn-of-the-century trimmers hired by merchants to maintain product displays, and we marvel as advances in lighting, animation, and miniaturization lead to the incredible feats of creative self-expression practiced by today's window artists. Packed with rarely seen photographs and ephemera, Holidays on Display makes it easy to see why we have such lasting emotional attachments to animated Christmas windows, passing parades, and the ambient glow of holiday lights.

Subject to Display Jennifer A. Gonzalez, 2011-03-04 An exploration of the visual culture of "race" through the work of five contemporary artists who came to prominence during the 1990s. Over the past two decades, artists James Luna, Fred Wilson, Amalia Mesa-Bains, Pepón Osorio, and Renée Green have had a profound impact on the meaning and practice of installation art in the United States. In Subject to Display, Jennifer González offers the first sustained analysis of their contribution, linking the history and legacy of race discourse to innovations in contemporary art. Race, writes González, is a social discourse that has a visual history. The collection and display of bodies, images, and artifacts in museums and elsewhere is a primary means by which a nation tells the story of its past and locates the cultures of its citizens in the present. All five of the American installation artists González considers have explored the practice of putting human subjects and their cultures on display by staging elaborate dioramas or site-specific interventions in galleries and museums; in doing so, they have created powerful social commentary of the politics of space and the power of display in settings that mimic the very spaces they critique. These artists' installations have not only contributed to the transformation of contemporary art and museum culture, but also linked Latino, African American, and Native American subjects to the broader

spectrum of historical colonialism, race dominance, and visual culture. From Luna's museum installation of his own body and belongings as "artifacts" and Wilson's provocative juxtapositions of museum objects to Mesa-Bains's allegorical home altars, Osorio's condensed spaces (bedrooms, living rooms; barbershops, prison cells) and Green's genealogies of cultural contact, the theoretical and critical endeavors of these artists demonstrate how race discourse is grounded in a visual technology of display.

Handbook of Display Technology Joseph A. Castellano, 2012-12-02 This book presents a comprehensive review of technical and commercial aspects of display technology. Ubiquitous Display Environments Antonio Krüger, Tsvi Kuflik, 2012-06-12 Our increasingly smart environments will sense, track and model users and provide them with personalized services. We can already embed computers in everyday objects such as shirt buttons and pencils; objects of all sizes, from wristwatches to billboards, will soon incorporate high-quality flexible displays; we have improved access to wireless Internet communication; and we are now transitioning from traditional linear to targeted interactive media. The convergence of these factors - miniaturization, display technologies, wireless communication, and interactive media - will allow us to leave our desktop computers and move to a radical computing paradigm, the ubiquitous display environment, where media and visual content will support a rich variety of display devices that enable users to interact with information artifacts in a seamless manner. This is one of the most exciting and important areas of technology development and this book addresses the challenge within the context of an educational and cultural experience. This is inherently a multidisciplinary field and the contributions span the related research aspects, including system architecture and communications issues, and intelligent user interface aspects such as aesthetics and privacy. On the scientific side, the authors integrate artificial intelligence, user modeling, temporal and spatial reasoning, intelligent user interfaces, and user-centric design methodologies in their work, while on the technological side they integrate mobile and wireless networking infrastructures, interfaces, group displays, and context-driven adaptive presentations. This book is of value to researchers and practitioners working on all aspects of ubiquitous display environments, and we hope it leads to innovations in human education, cultural heritage appreciation, and scientific development.

E-Paper Displays Bo-Ru Yang, 2022-08-15 E-PAPER DISPLAYS An in-depth introduction to a promising technology, curated by one of its pioneering inventors Electronic paper (e-paper) has one of the most promising futures in technology. E-paper's potential is unlimited, as the displays require extremely low power and imitate the aesthetic of ink on the page. This allows e-paper devices to have a wider range of viewing angles than traditional LED products and are capable of being viewed in direct sunlight—and without any additional power. As a result, e-paper displays create less eye strain, have a greater flexibility in their use, and have the potential to be used in place of paper for billboard advertising, educational applications, and transport signage, and more. In E-Paper Displays, editor Bo-Ru Yang and his team of experts present a detailed view into the important technologies involved in e-paper displays, with a particular emphasis on how this technology's unique properties make possible a wide range of personal and professional electronic products. As climate change makes efficient energy use more important than ever, e-paper can become an essential tool for future products on a large scale. As we rely more and more on technology, having lightweight devices with long battery life will become critical. This book provides engineers and innovators with an introduction to this important technology and shows new pathways for development. E-Paper Displays readers will also find: The editor is one of the leading pioneers in this technology Contributions from an international team of experts in e-paper technology Descriptions of many advanced display types that rely on different principles than the widely used LCD and OLED types Another innovative title from Wiley-SID (Society for Information Displays) series As we enter a new stage in our industrial development, E-Paper Displays is an essential reference for computer engineers and developers, as well as innovators and scientists, and their students.

Jefferson on Display G. S. Wilson, 2018-06-26 When we think of Thomas Jefferson, a certain picture comes to mind for some of us, combining his physical appearance with our perception of his character. During Jefferson's lifetime this image was already taking shape, helped along by his own assiduous cultivation. In *Jefferson on Display*, G. S. Wilson draws on a broad array of sources to show how Jefferson fashioned his public persona to promote his political agenda. During his long career, his image shifted from cosmopolitan intellectual to man of the people. As president he kept friends and foes guessing: he might appear unpredictably in old, worn, and out-of-date clothing with hair unkempt, yet he could as easily play the polished gentleman in a black suit, as he hosted small dinners in the President's House that were noted for their French-inspired food and fine European wines. Even in retirement his image continued to evolve, as guests at Monticello reported being met by the Sage clothed in rough fabrics that he proudly claimed were created from his own merino sheep, leading Americans by example to manufacture their own clothing, free of Europe. By paying close attention to Jefferson's controversial clothing choices and physical appearance--as well as his use of portraiture, architecture, and the polite refinements of dining, grooming, and conversation--Wilson provides invaluable new insight into this perplexing founder.

Display and Interface Design Kevin B. Bennett, John M. Flach, 2011-03-09 Technological advances in hardware and software provide powerful tools with the potential to design interfaces that are powerful and easy to use. Yet, the frustrations and convoluted work-arounds often encountered make it clear that there is substantial room for improvement. Drawn from more than 60 years of combined experience studying, implementing, and teaching about performance in human-technology systems, *Display and Interface Design: Subtle Science, Exact Art* provides a theoretically-based yet practical guide for ecological display and interface design. Written from the perspective of cognitive systems engineering and ecological interface design, the book delineates how to design interfaces tailored to specific work demands, leverage the powerful perception-action skills of the human, and use powerful interface technologies wisely. This triadic approach (domain, human, interface) to display and interface design stands in sharp contrast to traditional dyadic (human, interface) approaches. The authors describe general principles and specific strategies at length and include concrete examples and extensive design tutorials that illustrate quite clearly how these principles and strategies can be applied. The coverage spans the entire continuum of interfaces that might need to be developed in today's work places. The reason that good interfaces are few and far between is really quite simple: they are extremely difficult to design and build properly. While there are many books available that address display design, most of them focus on aesthetic principles but lack scientific rigor, or are descriptive but not prescriptive. Whether you are exploring the principles of interface design or designing and implementing interfaces, this book elucidates an overarching framework for design that can be applied to the broad spectrum of existing domains.

Pervasive Displays Nigel Davies, Sarah Clinch, Florian Alt, 2014-05-01 Fueled by falling display hardware costs and rising demand, digital signage and pervasive displays are becoming ever more ubiquitous. Such systems have traditionally been used for advertising and information dissemination, with digital signage commonplace in shopping malls, airports and public spaces. While advertising and broadcasting announcements remain important applications, developments in sensing and interaction technologies are enabling entirely new classes of display applications that tailor content to the situation and audience of the display. As a result, signage systems are beginning to transition from simple broadcast systems to rich platforms for communication and interaction. In this lecture, we provide an introduction to this emerging field for researchers and practitioners interested in creating state-of-the-art pervasive display systems. We begin by describing the history of pervasive display research, providing illustrations of key systems, from pioneering work on supporting collaboration to contemporary systems designed for personalized information delivery. We then consider what the near future might hold for display networks -- describing a series of compelling applications that are being postulated for future display networks. Creating such systems raises a wide range of challenges and requires designers to make a series of important trade-offs. We dedicate four chapters to key aspects of pervasive display design: audience engagement, display interaction, system software, and system evaluation. These chapters provide an overview of current thinking in each area. Finally, we present a series of case studies of display systems and our concluding remarks.

Displays Rolf R. Hainich, Oliver Bimber, 2011-07-05 In the last decade, new displays have been developed at an ever-increasing pace: bulky cathode ray tubes have been replaced by flat panels and mobile phones, tablets, and navigation systems have proliferated. Seeing this explosion raises tantalizing questions about the future evolution of visual displays: Will printed displays be sold by the square yard and glued to the wall? Will disposable displays, powered by printed batteries and with built-in storage chips, talk to us from cereal boxes? Will we begin wearing display glasses that simulate any kind or number of virtual displays we would ever need? Will chip implants directly interface to our brains, eliminating the need for any displays at all? These and other questions are explored in *Displays: Fundamentals & Applications*, which describes existing and emerging display technology. The book begins by presenting the basics of wave optics, geometric optics, light modulation, visual perception, and display measures, along with the principles of holography. It then describes the technology and techniques behind projection displays, projector-camera systems, stereoscopic and autostereoscopic displays,

computer-generated holography, and near-eye displays. In addition, the authors discuss how real-time computer graphics and computer vision enable the visualization of graphical 2D and 3D content. The text is complemented by more than 400 rich illustrations, which give readers a clear understanding of existing and emerging display technology.

Use of Visual Displays in Research and Testing Matthew T. McCrudden, Gregory Schraw, Chad Buckendahl, 2015-05-01
Visual displays play a crucial role in knowledge generation and communication. The purpose of the volume is to provide researchers with a framework that helps them use visual displays to organize and interpret data; and to communicate their findings in a comprehensible way within different research (e.g., quantitative, mixed methods) and testing traditions that improves the presentation and understanding of findings. Further, this book includes contributions from leading scholars in testing and quantitative, qualitative, and mixed methods research, and results reporting. The volume's focal question is: What are the best principles and practices for the use of visual displays in the research and testing process, which broadly includes the analysis, organization, interpretation, and communication of data? The volume is organized into four sections. Section I provides a rationale for this volume; namely, that including visual displays in research and testing can enhance comprehension and processing efficiency. Section II includes addresses theoretical frameworks and universal design principles for visual displays. Section III examines the use of visual displays in quantitative, qualitative, and mixed methods research. Section IV focuses on using visual displays to report testing and assessment data.

Displaying Women Maureen E. Montgomery, 2016-04-29
Displaying Women explores the role of women in the representation of leisure in turn-of-the-century New York. To see and be seen--on Fifth Avenue and Broadway, in Central Park, and in the fashionable uptown hotels and restaurants--was one of the fundamental principles in the display aesthetic of New York's fashionable society. Maureen E. Montgomery argues for a reconsideration of the role of women in the bourgeois elite in turn-of-the-century America. By contrasting multiple images of women drawn from newspapers, magazines, private correspondence, etiquette manuals and the New York fiction of Edith Wharton, Henry James and others, she offers a convincing antidote to the long-standing tendency in women's history to overlook women whose class affiliations have put them in a position of power.
