The 11th Michigan Volunteer Infantry in the Civil War Eric R. Faust,2015-11-26 The hard-fighting 11th Michigan Volunteer Infantry was recruited from sparsely settled southwest Michigan shortly after the Civil War broke out. Mainly composed of young farmers and tradesmen, the regiment rapidly evolved into one of the Army of the Cumberland's elite combat units, tenaciously fighting its way through some of the war's bloodiest engagements. This book—featuring a complete unit roster—chronicles the regiment through the words of the veterans, tracing their development from a rabble of idealists into a fine-tuned fighting machine that executed successful bayonet charges against superior numbers. The narrative continues into the postwar period, discussing the ex-soldiers' careers through Reconstruction and the Gilded Age. Photographs, maps, illustrations and a statistical analysis round out the work.

adolescents throughout the country, despite being physically distant from the event. Issue 2 includes a study of separation anxiety in school age children in New York City following the attacks, the results from two national surveys of parents' roles in helping children respond to or process the attacks, and a study of the impact of such a distant trauma on rural youth.

The 11th North Carolina Infantry in the Civil War William Thomas Venner,2015-09-02 This history of the 11th North Carolina Infantry in the Civil War— civilian soldiers and their families—follows the regiment from their 1861 mustering-in to their surrender at Appomattox, covering action at Gettysburg, Bristoe Station, The Wilderness, Spotsylvania, Cold Harbor and Petersburg. Drawing on letters, journals, memoirs, official reports, personnel records and family histories, this intensely personal account features Tar Heels relating their experiences through over 1,500 quoted passages. Casualty lists give the names of those killed, wounded, captured in action and died of disease. Rosters list regimental officers and staff, enlistees for all 10 companies and the names of the 78 men who stacked arms on April 9, 1865.

The 11th Airborne Brick Marvin Miller,2011-07-24 Memoirs of country boy Wayne Miller who was assigned to the 11th Airborne Division, 187th Glider Infantry Regiment serving in the Pacific Theater in World War II on Leyte and Luzon in the Philippines.

The Authority and Suitability of Military Commissions to Try the September 11th Terrorists Michele McAninch Miller,2002 In response to the horrific terrorist attacks of September 11th, the President as Commander-in-Chief issued an order directing the trial of al Qaeda members and other terrorists before military commissions. The order provoked a hornets' nest of reactions from the press, the legal community, and the public. Based on the rhetoric of many pundits and press, it was immediately apparent that little of substance is known about military commissions, which were last used following World War II. This paper traces the historical role and origins of these tribunals, their legal authority, and the advantages they offer over alternative means to try the September 11th terrorists. It concludes that military commissions are more than just appropriate forums for trying these perpetrators; they are, in fact, singularly suited for this purpose. Our nation is at war. Under the law, the al Qaeda terrorists are unlawful combatants who perpetrated monumental war crimes. The use of military commissions to successfully try such war crimes has been consistent throughout the history of war-fighting. There is constitutional authority and jurisdiction for their use, authority that the Supreme Court has upheld. Given the implementing procedures recently

announced by the Department of Defense, military commissions will comport with due process and the rule of law, while ensuring the needs of national defense are well protected.

Proceedings of the 11th International Congress for Applied Mineralogy (ICAM) Faqin Dong,2015-03-25 These proceedings comprise the peer-reviewed contributions submitted to the 11th International Congress for Applied Mineralogy (ICAM) held July 5-10, 2013, at the Southwest University of Science and Technology (SWUST) in Mianyang, China. The biennial ICAM is the most important gathering of applied mineralogists, organized every other year by the ICAM-Council. The multidisciplinary research presented in this book will be of interest to scientists and professionals dealing with topics like environmental and medical mineralogy; industrial minerals; bio-minerals and biomaterials; advanced materials; process mineralogy; mining and metallurgy; cultural heritage; the interaction of minerals with microorganisms; and solid waste treatment and recycling, including genetic mineralogy. “The field of applied mineralogy has been able to match society’s pace by continuously reinventing itself, quickly adopting new technologies and instrumentation as they became available and putting them to work for the service of mankind living in a world that heavily relies on minerals. Over the past few decades, applied mineralogy has evolved into a cutting- edge discipline that leads the way for science, engineering and research and development to benefit society. Contrary to popular belief, mineral resources are limited, and we have an obligation to our heirs to use them responsibly.” Dr. Maarten A.T.M. Broekmans Post-President ICAM Council
