- 📖 **SUCCESSFUL AGING** DANIEL J. LEVITIN, 2020-01-07 INSTANT TOP 10 BESTSELLER • New York Times • USA Today • Washington Post • LA Times “Debunks the idea that aging inevitably brings infirmity and unhappiness and instead offers a trove of practical, evidence-based guidance for living longer and better.”—Daniel H. Pink, author of *When and Drive* **SUCCESSFUL AGING** delivers powerful insights: • Debunking the myth that memory always declines with age • Confirming that health span—not life span—is what matters • Proving that sixty-plus years is a unique and newly recognized developmental stage • Recommending that people look forward to joy, as reminiscing doesn’t promote health **LEVITIN** looks at the science behind what we all can learn from those who age joyously, as well as how to adapt our culture to take full advantage of older people’s wisdom and experience. Throughout his exploration of what aging really means, using research from developmental neuroscience and the psychology of individual differences, **LEVITIN** reveals resilience strategies and practical, cognitive enhancing tricks everyone should do as they age. **SUCCESSFUL AGING** inspires a powerful new approach to how readers think about our final decades, and it will revolutionize the way we plan for old age as individuals, family members, and citizens within a society where the average life expectancy continues to rise.

As baby boomers are aging, they can hope to maintain a quality of life that previous generations have not enjoyed.
- 📖 **THE ENCYCLOPEDIA OF AGING** LINDA S. NOELKER, PhD, KENNETH ROCKWOOD, MD, FRCPC, RICHARD L. SPROTT, Ph.D., 2006-03-17 A comprehensive resource on gerontology and geriatrics Since its inception in 1987, *The Encyclopedia of Aging* has proven to be the definitive resource for scholars and students across the burgeoning and increasingly interdisciplinary fields of gerontology and geriatrics. Like its three esteemed predecessors, the fourth edition contains concise, readable explorations of hundreds of terms, concepts, and issues related to the lives of older adults, as well as timely coverage of the many new programs and services for the elderly. Updated, under the distinguished stewardship of editor-in-chief Richard Schulz to reflect the infusion of new information across the scientific disciplines, this new edition brings readers up-to-the-moment significant advances in biology, physiology, genetics, medicine, psychology, nursing, social services, sociology, economics, technology, and political science. While retaining the format and standard of excellence that marked the first three editions, the fourth edition encompasses a wealth of new information from the social and health sciences. It contains the most current bibliography of an expanding literature, an exhaustive index, and extensive cross references. This much anticipated update of the field’s most authoritative resource will take its place as an indispensable reference for specialists and non-specialists across a broad range of disciplines that now comprise the field of aging. - 📖 **AGING** HARRY R. MOODY, JENNIFER R. SASSER, 2020-07-16 Winner of the 2022 Textbook & Academic Authors Association’s The McGuffey Longevity Award *AGING: Concepts and Controversies* is structured to encourage a style of teaching and learning that goes beyond conveying facts and methods. This innovative text focuses on controversies and questions rather than on assimilating facts or creating a single correct view about aging or older people. Drawing on their extensive expertise, authors Harry R. Moody and Jennifer R. Sasser first provide an overview of aging in three domains: aging over the life course, health care, and socioeconomic trends. Each section then includes data and conceptual frameworks, helping students to make sense of the controversies and understand their origin, engage in critical thinking, and develop their own views. The Tenth Edition of this hallmark textbook includes amplified discussions focused on differences, diversity, structural inequalities, and inclusion, as well as contemporary issues, including climate change and immigration. Included with this title: The password-protected Instructor Resource Site (formally known as SAGE Edge) offers access to all text-specific resources, including a test bank and editable, chapter-specific PowerPoint® slides.
- 📖 **AGING AND OLDER ADULTHOOD** JOAN T. Fresh edition includes updated content such as revised case histories and reworked material on key concepts and research applications Retains the winning format of the second edition, with chapter contents framed by individual histories Dual models add cohesiveness to the presentation of theory Thematic structure facilitates reader comprehension Instructor resources provided online upon publication at www.wiley.com/go/erber
- 📖 **THE MYSTERY OF HUMAN AGING** BJOERN SCHUMACHER, 2017-04-15
- 📖 **THE ART OF GROWING OLD** MARIE DE HENNEZEL, 2012-04-12 A groundbreaking approach to aging from one of France’s best-known clinical psychologists. How should we accept growing old? It’s an inevitable progression and yet in Western society the very subject of aging is often taboo and shrouded in anxiety and shame. Not anymore, says Marie de Hennezel, an internationally renowned clinical psychologist and bestselling author. Now that our lives are longer and richer than ever before, it’s imperative to demystify our greatest fear and cultivate a positive awareness of aging. In this timely and essential book, de Hennezel offers a fresh perspective on the art of growing old. She confronts head-on the inevitable grief we sustain at the loss of our youth and explains how refusing to age and move forward in life is actually what makes us become old. Combining personal anecdotes with psychological theory, philosophy, and eye-opening scientific research from around the world, she shows why we should look forward to embracing everything aging has to offer in terms of human and spiritual enrichment. *The Art of Growing Old* is a thought-provoking, brave, and uplifting meditation on the later years as they should be lived.
- 📖 **MIDDLE AGE AND AGING** BERNICE L. NEUGARTEN, 1968-12-15 The process of aging is receiving an increasing amount of attention from behavioral scientists. *Middle Age and Aging* is an attempt to organize and select from the proliferation of material available in this field. The selections in this volume emphasize some of the major topics that lie closest to the problem of what social and psychological adaptations are required as individuals move through the second half of their lives. Major attention is paid to the importance of age-status and age-sex roles; psychological changes in the life-cycle; social-psychological theories of aging; attitudes toward health; changing family roles; work, retirement, and leisure; certain other dimensions of the immediate social environment such as friendships, neighboring patterns, and living arrangements; differences in cultural settings; and perspectives of time and death.
- 📖 **AGING** LESLIE MORGAN, SUZANNE KUNKEL, 2001 NEW EDITION! More than any other social gerontology texts available, addresses issues of diversity in aging by race, ethnicity, social class, and gender throughout.
- 📖 **ENDING AGING** AUBREY DE GREY, MICHAEL RAE, 2007-09-04 MUST WE AGE? A long life in a healthy, vigorous, youthful body has always been one of humanity’s greatest dreams. Recent progress in genetic manipulations and calorie-restricted diets in laboratory animals hold forth the promise that someday science will enable us to exert total control over our own biological aging. Nearly all scientists who study the biology of aging agree that we will someday be able to substantially slow down the aging process, extending our productive, youthful lives. Dr. Aubrey de Grey is perhaps the most bullish of all such researchers. As has been reported in media outlets ranging from 60 Minutes to The New York Times, Dr. de Grey believes that the key biomedical technology required to eliminate aging-derived debilitation and death entirely—technology that would not only slow but periodically reverse age-related physiological decay, leaving us biologically young into an indefinite future—is now within reach. In *Ending Aging*, Dr. de Grey and his research assistant Michael Rae describe the details of this biotechnology. They explain that the aging of the human body, just like the aging of man-made machines, results from an accumulation of various types of damage. As with man-made machines, this damage can periodically be repaired, leading to indefinite extension of the machine’s fully functional lifetime, just as is routinely done with classic cars. We already know what types of damage accumulate in the human body, and we are moving rapidly toward the comprehensive development of technologies to remove that damage. By demystifying aging and its postponement for the nonspecialist reader, de Grey and Rae systematically dismantle the fatalist presumption that aging will forever defeat the efforts of medical science.
- 📖 **HANDBOOK OF AGING AND THE SOCIAL SCIENCES** LINDA GEORGE, KENNETH FERRARO, 2015-08-18 *Handbook of Aging and the Social Sciences*, Eighth Edition, presents the extraordinary growth of research on aging individuals, populations, and the dynamic culmination of the life course, providing a comprehensive synthesis and review of the latest research findings in the social sciences of aging. As the complexities of population dynamics, cohort succession, and policy changes modify the world and its inhabitants in ways that must be vigilantly monitored so that aging research remains relevant and accurate, this completely revised edition not only includes the foundational, classic themes of aging research, but also a rich array of emerging topics and perspectives that advance the field in exciting ways. New topics include families, immigration, social factors, and cognition, caregiving, neighborhoods, and built environments, natural disasters, religion and health, and sexual behavior,
