**That Alz Thing** Deb Benson,2012-10-01 Health and ageing. Biography. 'I can't remember anything, ' said my mother. 'Do you think I'm getting that Alz thing?' When she asked me this my heart went into overdrive. I knew nothing about Alzheimer's disease then, but there was something terribly wrong with my mother. This is her journey.

Life on Planet Alz Jack S. Cohen,2017-01-31 This is a true story about coping with my beloved wife's devastating diagnosis of Alzheimer's disease (AD), the terrible scourge of our age. In general, people are living longer and diseases of the aged are becoming more prevalent. The major neurological disease of the aged is in fact AD. There have been many excellent books and descriptions of AD and its ravages upon the minds and lives of people, so why write another account? Whenever a person is diagnosed with AD, their spouse automatically becomes their primary carer and unwittingly also becomes a prisoner of the disease. Each case of AD is unique and two novel aspects of this account are: (i) the focus on the way that AD imprisons both the patient and their spouse in a constant process of deterioration, and (ii) the inclusion of an almost daily journal describing raw incidents that can be enlightening for the reader, and especially for the spouse of an AD sufferer. This illustrates the vicissitudes and the almost total preoccupation that this disease encompasses. The author hopes that his particular take on his predicament as a spouse of an AD patient can help those who are dealing with this situation or who may have to do so in the future. It illustrates how the initial shock of the situation gives way to the realization that one has to learn to deal with it, and finally the acceptance that must come with time and experience. How to describe memory? It's like a landscape where snow has fallen. At first the surface is white and pristine. But as time goes by people trudge across the field and leave footprints. Then a cart goes by leaving parallel tracks, and then a car drives along the lane, leaving tire marks. Then the scene gets busier, children on bikes on the way to school or to play leave their tire tracks and women going shopping and so on, until the surface is criss-crossed with memories of what had happened. The analogy for Alzheimer's disease is that all the tracks get inter-twined and mixed up and confusing, and then it all starts to melt!

The End of Alzheimer's Dale Bredesen,2017-08-22 The instant New York Times and Wall Street Journal bestseller A groundbreaking plan to prevent and reverse Alzheimer's Disease that fundamentally changes how we understand cognitive decline. Everyone knows someone who has survived cancer, but until now no one knows anyone who has survived Alzheimer's Disease. In this paradigm shifting book, Dale Bredesen, MD, offers real hope to anyone looking to prevent and even reverse Alzheimer's Disease and cognitive decline. Revealing that AD is not one condition, as it is currently treated, but three, The End of Alzheimer's outlines 36 metabolic factors (micronutrients, hormone levels, sleep) that can trigger downsizing in the brain. The protocol shows us how to rebalance these factors using lifestyle modifications like taking B12, eliminating gluten, or improving oral

hygiene. The results are impressive. Of the first ten patients on the protocol, nine displayed significant improvement with 3-6 months; since then the protocol has yielded similar results with hundreds more. Now, *The End of Alzheimer's* brings new hope to a broad audience of patients, caregivers, physicians, and treatment centers with a fascinating look inside the science and a complete step-by-step plan that fundamentally changes how we treat and even think about AD.

The End of Alzheimer's Program Dale Bredesen, 2020-08-18 The instant New York Times bestseller The New York Times Best Selling author of The End of Alzheimer's lays out a specific plan to help everyone prevent and reverse cognitive decline or simply maximize brainpower. In The End of Alzheimer's Dale Bredesen laid out the science behind his revolutionary new program that is the first to both prevent and reverse symptoms of Alzheimer's disease. Now he lays out the detailed program he uses with his own patients. Accessible and detailed, it can be tailored to anyone's needs and will enhance cognitive ability at any age. What we call Alzheimer's disease is actually a protective response to a wide variety of insults to the brain: inflammation, insulin resistance, toxins, infections, and inadequate levels of nutrients, hormones, and growth factors. Bredesen starts by having us figure out which of these insults we need to address and continues by laying out a personalized lifestyle plan. Focusing on the Ketoflex 12/3 Diet, which triggers ketosis and lets the brain restore itself with a minimum 12-hour fast, Dr. Bredesen drills down on restorative sleep, targeted supplementation, exercise, and brain training. He also examines the tricky question of toxic exposure and provides workarounds for many difficult problems. The takeaway is that we do not need to do the program perfectly but will see tremendous results if we can do it well enough. With inspiring stories from patients who have reversed cognitive decline and are now thriving, this book shifts the treatment paradigm and offers a new and effective way to enhance cognition as well as unprecedented hope to sufferers of this now no longer deadly disease.
