*Amadeus* Peter Shaffer,2007 Wolfgang Amadeus Mozart is a genius, the most brilliant musician the world will ever see. But the court of eighteenth-century Vienna doesn't recognize his talents - only Antonio Salieri, the Court Composer, does, and he is tortured by what he hears. Seething with rage at the genius of this flippant buffoon and suddenly aware of his own mediocrity, Salieri declares war and sets out to destroy the man he sees as God's instrument on earth. Peter Shaffer's award-winning play is a rich, exuberant portrayal of a God-like man among mortals, and lives destroyed by envy.

**Environmental Management Accounting for Cleaner Production** Stefan Schaltegger,Martin Bennett,Roger L. Burritt,Christine M.

Jasch,2008-10-10 Sustainability requires companies to develop in an economically, environmentally and socially sustainable manner. Corporate sustainable development in turn requires movement towards cleaner production. In order to recognize the potential from cleaner production - reduced costs and fewer environmental impacts through the reduced use of materials - environmental management accounting (EMA) is a necessary information management tool. Environmental Management Accounting for Cleaner Production reveals a set of tools for companies to collect, evaluate and interpret the information they need to estimate their potential to use cleaner production to realize cost savings and to make the best decisions about the available cleaner production options. EMA is therefore the key for driving environmental progress, cost savings, increased competitiveness and corporate sustainability through the means of cleaner production.

*Handbook on Energy and Climate Change* Roger Fouquet,2013-01-01 Some of us have spent our professional lives on energy and climate change but any new researcher or policy maker must find it daunting to even approach the subject. If so, this encyclopedic Handbook provides a wonderful and necessary introduction. It is creative and up to date, yet also takes the reader by the hand and introduces one topic after another while also providing much of the historical context that is so necessary to a deeper understanding. Thomas Sterner, Environmental Defense Fund This timely Handbook reviews many key issues in the economics of energy and climate change, raising new questions and offering solutions that might help to minimize the threat of energy-induced climate change. Constructed around the objectives of displaying some of the best of current thinking in the economics of energy and climate change, this groundbreaking volume brings together many of the world's leading and most innovative minds in the field to cover issues related to: ¥ fossil fuel and electricity markets ¥ environment-related energy policy ¥ international climate agreements ¥ carbon mitigation policies ¥ low carbon behaviour, growth and governance. Serving as an indispensable guide to one of the fastest growing fields of economics, this invaluable resource will strongly appeal to students, academics and policy makers interested in energy, environmental and climate change issues.

*Corporate Social Responsibility Reporting in China* Jieqi Guan,Carlos Noronha,2017-10-25 In recent years, Corporate Social Responsibility (CSR) reporting in China has been experiencing a rapid development and the number of social reports issued by Chinese enterprises shows a sharp increasing trend. This book investigates the evolution of such reporting practice in the country and the reasons behind it. In addition, it also examines the reporting quantity and quality of Chinese enterprises by applying the GRI (Global Reporting Initiative) as an evaluation tool. In response to policy documents so as to obtain the government's recognition and to strive for more resources, state-owned enterprises, private enterprises and foreign-invested companies have made substantial efforts in social reporting in terms of quantity and coverage. However, it appears that there is still room for enhancing the quality of disclosure. The book also highlights the central government's economic, political and social roles in promoting, encouraging

and controlling the development of CSR reporting.
