Military History. Office of the Chief

**Armor** John Steakley, 1984-12-04 The military sci-fi classic of courage on a dangerous alien planet The planet is called Banshee. The air is unbreathable, the water is poisonous. It is home to the most implacable enemies that humanity, in all its interstellar expansion, has ever encountered. Body armor has been devised for the commando forces that are to be dropped on Banshee—the culmination of ten thousand years of the armorers' craft. A trooper in this armor is a one-man, atomic powered battle fortress. But he will have to fight a nearly endless horde of berserk, hard-shelled monsters—the fighting arm of a species which uses biological technology to design perfect, mindless war minions. Felix is a scout in A-team Two. Highly competent, he is the sole survivor of mission after mission. Yet he is a man consumed by fear and hatred. And he is protected, not only by his custom-fitted body armor, but by an odd being which seems to live within him, a cold killing machine he calls "The Engine." This is Felix's story—a story of the horror, the courage, and the aftermath of combat, and the story, too, of how strength of spirit can be the greatest armor of all.

**Armor** John Steakley, 1984 The planet was called A-9. The air was unbreathable, the water poisonous. But it had to be conquered, for it was the home world of the most implacable enemies that cosmically expanding humanity had yet encountered.

**Native North American Armor, Shields, and Fortifications** David E. Jones, 2010-01-01 The first systematic comparative study of the defensive armor and fortifications of aboriginal Native Americans. From the Chickasaw fighting the Choctaw in the Southeast to the Sioux battling the Cheyenne on the Great Plains, warfare was endemic among the North American Indians when Europeans first arrived on this continent. An impressive array of offensive weaponry and battle tactics gave rise to an equally impressive range of defensive technology. Native Americans constructed very effective armor and shields using wood, bone, and leather. Their fortifications ranged from simple refuges to walled and moated stockades to multiple stockades linked in strategic defensive networks. In this book, David E. Jones offers the first systematic comparative study of the defensive armor and fortifications of aboriginal Native Americans. Drawing data from ethnohistorical accounts and archaeological evidence, he surveys the use of armor, shields, and fortifications both before European contact and during the historic period by American Indians from the Southeast to the Northwest Coast, from the Northeast Woodlands to the desert Southwest, and from the Sub-Arctic to the Great Plains. Jones also demonstrates the sociocultural factors that affected warfare and shaped the development of different types of armor and fortifications. Extensive eyewitness descriptions of warfare, armor, and fortifications, as well as photos and sketches of Indian armor from museum collections, add a visual dimension to the text. "This succinct book is well written and systematically organized and it will serve as the starting point for any future studies on the subject." —Military History of the West "This book provides the first and only comprehensive survey of armor,

shields, and fortifications [of American Indians]. . . . It has left me with a new appreciation for the sheer diversity of warfare, armor, and fortifications used by Native Americans, and it shatters stereotypes about the nature of aboriginal warfare.” —Wayne Van Horne, associate professor of Anthropology, Kennesaw State University
