Armored John Joseph Adams, 2012-04-01 Armor up for a metal-pounding explosion of action, adventure and amazing speculation by topnotch writers¾including Nebula-award winner Jack McDevitt, Sean Williams, Dan Abnett, Simon Green, and Jack Campbell¾on a future warrior that might very well be just around the corner. Science fiction readers and gamers have long been fascinated by the idea of going to battle in suits of powered combat armor or at the interior controls of giant mechs. It's an armor-plated clip of hard-hitting tales featuring exoskeleton adventure with fascinating takes on possible future armors ranging from the style of personal power suits seen in Starship Troopers and Halo to the servo-controlled bipedal beast-mech style encountered in Mechwarrior and Battletech. At the publisher's request, this title is sold without DRM (Digital Rights Management).

Armored Mark Greaney, 2023-04-25 A novel inspired by #1 New York Times best-selling author Mark Greaney's Audible Original drama, Armored. Joshua Duffy is a Close Protection Agent—a professional bodyguard—and he's one of the world's elite operatives. That is, he was until his last mission in Lebanon. Against all odds, Josh got his primary out alive, but the cost was high. Josh lost his lower left leg. There's not much call for an elite bodyguard with such an injury. So, Josh has to support his family working as a mall cop in New Jersey. For a man like Josh, this is purgatory on earth, but miracles can occur even in Paramus. A lucky run-in with an old comrade promises to get Josh back in the field for one last job. The UN is sending a peace mission into the Sierra Madre mountains in Mexico, an area so dangerous it's known as Espinazo del Diablo—the Devil's Spine. Only a fool would think they could broker peace between the

homicidal drug cartels in the region, and only a madman would sign on to keep those fools alive.

How to Rob an Armored Car Iain Levison, 2009-10-01 A comical crime caper about three stoners with a plan: “By turns funny, sad, and insightful” (Booklist). In a dying Pennsylvania coal town, three friends are looking for a way out. Mitch is a rebellious malcontent whose bad attitude gets him fired from a chain big box store. Doug can identify any pill by sight and any eighties rock song by the first three notes, but doesn’t understand credit scores. Kevin got married and had a kid too soon and is now on parole after serving jail time for growing marijuana. The three of them dabble in petty crime and believe they have a talent for it. They start by stealing a high-definition TV. Then they set their sights on bigger scores. But things are about to get out of hand . . . “An honest and humorous romp through lower middle-class frustration.” —Publishers Weekly

Armored Thunderbolt Steve Zaloga, 2008 • Hundreds of photos, including many never published before with riveting accounts of armored warfare in World War II • Compares the Sherman to other tanks, including the Panther and Tiger • Author is a world-renowned expert on the Sherman tank and American armor Some tank crews referred to the American M4 Sherman tank as a death trap. Others, like Gen. George Patton, believed that the Sherman helped win World War II. So which was it: death trap or war winner? Armor expert Steven Zaloga answers that question by recounting the Sherman's combat history. Focusing on Northwest Europe (but also including a chapter on the Pacific), Zaloga follows the Sherman into action on D-Day, among the Normandy hedgerows, during Patton's race across France, in the great tank battle at Arracourt in September 1944, at the Battle of the Bulge, across the Rhine, and in the Ruhr

pocket in 1945.

Armor Command: The Personal Story of a Commander of the 13th Armored Regiment Brig.-Gen. Paul McDonald Robinett, 2017-07-11 “Armor Command is a candid book presenting the activities and observations of an armor commander who was among the first overseas and in action against the European Axis in World War II. All who are interested in the activities of combat troops that make or break the reputations of high military figures and all those who desire an understanding of life in the combat zone will find this book of compelling interest. Military men will find it of professional value for it deals with the problems of a small command in the initial campaign against the German-Italian Allies. Among other things it deals with the problems of the meeting engagement and the withdrawal—two of the most difficult operations in war.”—Foreword

Early US Armor Steven J. Zaloga, 2018-02-22 The first American armoured cars began to emerge around the turn of the century, seeing their first military use in 1916 during the Punitive Expedition against Pancho Villa. When the United States entered World War I, the American Expeditionary Forces used some armoured cars in France, and American armoured cars were used by the French Army. The inter-war years saw considerable innovation and experimentation in armoured car design. Of the 1930s

scout car designs, the M3A1 scout car was good enough to be produced in very large numbers in World War II, and was widely exported to many other armies via Lend-Lease. It also served as the basis for the late M2 and M3 armoured half-tracks. In this study, using detailed full colour plates and rigorous analysis, US armour expert Steven J. Zaloga chronicles the development of the US armoured car in the years leading up to World War II.

Armored Trains Steven J. Zaloga, 2011-07-20 First seen during the American Civil War and later appearing in the Franco-Prussian War and the Anglo-Boer Wars, the armored train came to prominence on the Eastern Front during World War I. It was also deployed during the Russian Civil War and the technology traveled east into the Chinese Civil War, and the subsequent war with Japan. It saw service on the Russian Front in World War II, but was increasingly sidelined because of its vulnerability to air attack. Steven J Zaloga examines the origins and development of the armored train, focusing equally on the technical detail and on the fascinating story of how armored trains were actually used in combat. This title will appeal to armor, military history and railroad enthusiasts alike.

The Armored Dinosaurs Kenneth Carpenter, 2001 Brings together the latest studies by an international group of dinosaur palaeontologists and provides descriptions of the original specimens of *Hyaleosaurus* and *Stegosaurus*

M8 Greyhound Light Armored Car 1941–91 Steven J. Zaloga, 2012-09-20 The M8 light armored car was the only significant wheeled combat vehicle used by the US Army in World War II. In conjunction with the lightly armed utility version, the M20, it was the staple of the army's cavalry squadrons for use in

reconnaissance and scouting. First entering combat in Italy in 1943, it was widely used throughout the campaign in northwest Europe, though its off-road performance was found to be wanting. This title describes the design and development of the M8, covering the many variants that were produced during World War II and afterwards, along with a comprehensive survey of its operational use.

Staghound Armored Car 1942–62 Steven J. Zaloga,2011-12-20 The Staghound was a unique World War II armored vehicle designed and manufactured in the US, but intended solely for the British army. Since its combat debut in Italy in 1943 until the end of the war it had performed particularly valuable service in a reconnaissance role where its speed and armor ensured that it was able to extricate itself from trouble as required without additional support. This book examines the development of this category of armored cars

and offers a detailed analysis of the extensive combat use of the Staghound in British service as well as in the service of other Allied countries including Canada, New Zealand and Poland.

Iron Knights Gordon A. Blaker, 2008-02-12 Combat history of the U.S. Army's oldest armored regiment Tank battles in North Africa, Sicily, Normandy, and the Battle of the Bulge The 66th Armored Regiment is still active today and has served in Iraq From its baptism of fire in the mud of the Western Front in 1918 to its triumphant march into Berlin in July 1945, this is the story of the U.S. 66th Armored Regiment. It was the only American heavy tank unit to see combat in World War I, and between the two wars, the regiment served as a laboratory for new ideas and equipment. After training under Gen. George S. Patton, the 66th distinguished itself in numerous battles during World War II, earning six battle streamers for the unit and a Medal of Honor for one of its officers.

US Armored Divisions Steven J. Zaloga, 2011-03-15 The armored divisions were the shock force of the US Army's combat formations during the fighting in Northwest Europe in the final year of the war. Of the

16 such divisions formed during the war, all but one served in the European Theater of Operations. This book examines the organizational structure, operational doctrine and combat mission of these divisions from D-Day onwards, describing how doctrines and tactics were changed as the divisions were forced to adapt to the battlefield realities of combat against an experienced foe. The lessons drawn by the armored divisions from the bitter fighting in Northwest Europe from 1944 to 1945 strongly shaped postwar US Army doctrine.
