The Greenwood Encyclopedia of Children's Issues Worldwide [6 volumes] Irving Epstein, 2007-12-30 From the skyrocketing AIDS rate in Haiti to the oppressive pollution in industrial China, from the violent street culture of Nigeria to the crippling poverty in Nicaragua, from child trafficking in Thailand to child marriages in India, this jam-packed six-volume set explores all these issues and more in an unprecedented look at the world's children at the dawn of the 21st century. In recent years, while many countries have enjoyed a higher standard of living and improved working conditions, others have been torn apart by war and incapacitated by famine, and are struggling to improve life for their children and their future. Recent concern over the world's children has resulted in a global attempt to define what constitutes an acceptable childhood. New attention has been paid, not only to healthcare and secondary education, but also to the right to play and increased access to technology. The UN's codification of children's rights has done much to expand our understanding of what is needed for healthy growth and development of children and youth. Organized by region, The Greenwood Encyclopedia of Children's Issues Worldwide is the first globally focused set of this magnitude, offering extensive, up-to-date coverage of these critical issues. Original chapters accessibly synthesize current data on key topics, including education, play and recreation, child labor, family, health, laws and legal status, religious life, abuse and neglect, and growing up in the 21st century.

Emerging Business Online Lara Fawzy,Lucas Dworski,2010-10-04 In this first comprehensive guide to Internet B2B marketing in emerging markets, the authors introduce their proprietary ebocube ("Emerging Business Online") approach: a comprehensive, applications-oriented method that covers every stage of the marketing process. Using their framework and methodology, business leaders can implement a low-risk, high-reward business model, penetrate the world's fastest-growing markets, and create significant value where it never existed before. The authors begin with an up-to-date introduction to emerging markets, including economic potential, languages, culture, time zones, economies, politics, and Internet/mobile penetration. Next, they review emerging market best practices for branding, distribution, segmentation, and collaboration. Then, in the heart of the book, they introduce the powerful, three-phase Internet-based ebocube B2B marketing and sales model. Readers will learn how to establish metrics and dashboards to stay on track through the entire commercial cycle; how to plan and manage campaigns, from selling propositions to media mix; how to utilize email, webcasts, websites, and banner ads in emerging markets; how to mix in offline media and channels; how to budget and manage marketing operations; and much more. *Emerging Business Online* concludes with detailed case studies showing ebocube at work driving real profits.

Rural Areas Between Regional Needs and Global Challenges Walter Leimgruber,Chang-yi David Chang,2019-01-01 This book provides an up-to-date account of the many processes shaping and transforming rural space in various parts of the world. The various case studies focus on the multi-functionality of the rural world and the driving forces behind it. The book demonstrates that rural areas are no longer simply characterized by an agricultural economy, and instead accommodate multiple complementary activities. It also touches upon two major changes that have taken place. The first is the process of rurbanization, which has led to the clear distinction between town and countryside becoming blurred: urban traits have penetrated rural areas, and rural traits have invaded towns. The second change is that rural areas are increasingly seen as multi-functional, providers not only of food and other natural resources but also locations for the generation of renewable energy (wind farms, solar farms, biogas) and regions for the preservation of biodiversity. These transformations have resulted in a new understanding and self-image of rural areas and their populations.

Biofuel and Bioenergy Technology Wei-Hsin Chen,Keat Teong Lee,Hwai Chyuan Ong,2019-03-14 The subject of this book is “Biofuel and Bioenergy Technology”. State-of-the-art studies of advanced techniques of biorefinery for biofuel production are also included. Research involving experimental studies, recent developments, and novel and emerging technologies in this field are covered. This book contains twenty-seven technical papers which cover diversified biofuel and bioenergy technology-related research that have shown critical results and contributed significant findings to the fields of biomass processing, pyrolysis, bio-oil and its emulsification; transesterification and biodiesel, gasification and syngas, fermentation and biogas/methane, bioethanol and alcohol-based fuels, solid fuel and biochar, and microbial fuel cell and power generation development. The published contents relate to the most important techniques and analyses applied in the biofuel and bioenergy technology.

Numerical Mathematics and Advanced Applications 2011 Andrea Cangiani,Ruslan L Davidchack,Emmanuil Georgoulis,Alexander N. Gorban,Jeremy Levesley,Michael V. Tretyakov,2013-01-20 The European Conferences on Numerical Mathematics and Advanced

Applications (ENUMATH) are a series of conferences held every two years to provide a forum for discussion of new trends in numerical mathematics and challenging scientific and industrial applications at the highest level of international expertise. ENUMATH 2011 was hosted by the University of Leicester (UK) from the 5th to 9th September 2011. This proceedings volume contains more than 90 papers by speakers of the conference and gives an overview of recent developments in scientific computing, numerical analysis, and practical use of modern numerical techniques and algorithms in various applications. New results on finite element methods, multiscale methods, numerical linear algebra, and finite difference schemes are presented. A range of applications include computational problems from fluid dynamics, materials, image processing, and molecular dynamics.

Flexible Query Answering Systems Troels Andreassen, Ronald R. Yager, Henrik Bulskov, Henning Christiansen, Henrik Legind Larsen, 2009-11-03 This book constitutes the refereed proceedings of the 8th International Conference on Flexible Query Answering Systems, FQAS 2009, held in Roskilde, Denmark, in October 2009. The 57 papers included in this volume were carefully reviewed and selected from 90 submissions. They are structured in topical sections on database management, information retrieval, extraction and mining, ontologies and semantic web, intelligent information extraction from texts, advances in fuzzy querying, personalization, preferences, context and recommendation, and Web as a stream.

High Order Nonlinear Numerical Schemes for Evolutionary PDEs Rémi Abgrall, H  lo  se Beaugendre, Pietro Marco Congedo, C  cile Dobrzynski, Vincent Perrier, Mario Ricchiuto, 2014-05-19 This book collects papers presented during the European Workshop on High Order Nonlinear Numerical Methods for Evolutionary PDEs (HONOM 2013) that was held at INRIA Bordeaux Sud-Ouest, Talence, France in March, 2013. The central topic is high order methods for compressible fluid dynamics. In the workshop, and in this proceedings, greater emphasis is placed on the numerical than the theoretical aspects of this scientific field. The range of topics is broad, extending through algorithm design, accuracy, large scale computing, complex geometries, discontinuous Galerkin, finite element methods, Lagrangian hydrodynamics, finite difference methods and applications and uncertainty quantification. These techniques find practical applications in such fields as fluid mechanics, magnetohydrodynamics, nonlinear solid mechanics, and others for which genuinely nonlinear methods are needed.

It provides an overview of recent developments in numerical analysis, computational mathematics and applications

from leading experts in the field. New results on finite element methods, multiscale methods, numerical linear algebra and discretization techniques for fluid mechanics and optics are presented. Finite Volumes for Complex Applications VII-Elliptic, Parabolic and Hyperbolic Problems Jürgen Fuhrmann, Mario Ohlberger, Christian Rohde, 2014-05-16 The methods considered in the 7th conference on Finite Volumes for Complex Applications (Berlin, June 2014) have properties which offer distinct advantages for a number of applications. The second volume of the proceedings covers reviewed contributions reporting successful applications in the fields of fluid dynamics, magnetohydrodynamics, structural analysis, nuclear physics, semiconductor theory and other topics. The finite volume method in its various forms is a space discretization technique for partial differential equations based on the fundamental physical principle of conservation. Recent decades have brought significant success in the theoretical understanding of the method. Many finite volume methods preserve further qualitative or asymptotic properties, including maximum principles, dissipativity, monotone decay of free energy, and asymptotic stability. Due to these properties, finite volume methods belong to the wider class of compatible discretization methods, which preserve qualitative properties of continuous problems at the discrete level. This structural approach to the discretization of partial differential equations becomes particularly important for multiphysics and multiscale applications. Researchers, PhD and masters level students in numerical analysis, scientific computing and related fields such as partial differential equations will find this volume useful, as will engineers working in numerical modeling and simulations.
