Patrice was the product of a one-night stand between Raoul (47) and Marcelle (24), who went on to marry in 1951. Both parents had a complicated past. Raoul was Jewish, and a decorated soldier under General de Gaulle’s French Free Forces and had lost his wife in the war. He was father to their teenage daughter, and now in a relationship with Marianne, with whom he had a baby daughter. Marcelle was a Catholic, separated from Jean, and mother to a 6-year-old daughter. Marcelle had been in a relationship with a German commandant during the Occupation of Paris, who had looked after her and her daughter. Raoul wanted a son and Marcelle wanted security. Patrice was adored by his father and Marcelle had finally got the identity and security she craved. She had become Madame Saiman, the wife of a prolific Paris lawyer and distinguished soldier. The first four years and three months of Patrice’s life were seemingly idyllic until Raoul’s sudden death aged fifty-three... Those years defined Patrice’s future and character. His childhood was spent at ten different schools and boarding schools and living alone in Paris as a 17-year-old, his teenage life was consumed by feeling responsible for his mother. From market seller to door to door salesman, from washer up to waiter, from acting in student plays and on Lebanese television, to helping in his mother’s soon-to-go-bankrupt hotel, it was all a long way from the first four years and three months of his life. An escape from his mother to Bristol - where his half-sister was working illegally - would further define Patrice’s future. At the age of 22 nothing could frighten him. Possibly...

[!\[\]\(339a16584d5da0f0a3ca4e9ec17bf6a1\_img.jpg\) \*Staircases\*](#) James W. P. Campbell,Michael Tutton,2013-11-07 The staircase dates back to the very beginning of architectural history. Virtually every significant building from the ziggurats of ancient Mesopotamia to the present day, has not only contained one or more staircases, but has celebrated them. For such an apparently simple part of a building they have been made in a bewildering variety of forms and from a wide range of materials. Every age has sought to out-perform the previous to produce ever more spectacular and gravity-defying designs. ‘Staircases: History, Repair and Conservation’ is the first major reference volume devoted entirely to the understanding of staircases and the issues surrounding their repair and conservation. Each chapter has been especially written by experts in their respective fields. The book is essential reading for professionals and anyone with an interest in staircases. It deals with the history; dating; archaeology; surveying and recording; engineering; curating; repair and conservation of the staircase in a single volume. No other book offers such a wide range of detail. The book is divided into three parts: Part 1 covers the history, development, identification and dating of staircases, providing detailed drawings and photographs and an introduction to the scientific techniques available to enable the accurate dating of staircases. Part 2 covers the design, engineering and maintenance of the staircase, giving a clear guide to the latest research into the design of safe staircases and their structural stability. Part 3 focuses on the materials commonly used to make stairs, detailing the appropriate techniques for their conservation and repair. The result is a comprehensive study encompassing considerable and far reaching research which aims to inform our understanding and advance the scholarship of the subject for years to come.
