The Big Book of Concepts Gregory Murphy, 2004-01-30 Concepts embody our knowledge of the kinds of things there are in the world. Tying our past experiences to our present interactions with the environment, they enable us to recognize and understand new objects and events. Concepts are also relevant to understanding domains such as social situations, personality types, and even artistic styles. Yet like other phenomenologically simple cognitive processes such as walking or understanding speech, concept formation and use are maddeningly complex. Research since the 1970s and the decline of the classical view of concepts have greatly illuminated the psychology of concepts. But persistent theoretical disputes have sometimes obscured this progress. The Big Book of Concepts goes beyond those disputes to reveal the advances that have been made, focusing on the major empirical discoveries. By reviewing and evaluating research on diverse topics such as category learning, word meaning, conceptual development in infants and children, and the basic level of categorization, the book develops a much broader range of criteria than is usual for evaluating theories of concepts.

Marisa Meltzer began her first diet at the age of five. Growing up an indoors-loving child in Northern California, she learned from an early age that weight was the one part of her life she could neither change nor even really understand. Fast forward nearly four decades. Marisa, also a contributor to the New Yorker and the New York Times, comes across an obituary for Jean Nidetch, the Queens, New York housewife who founded Weight Watchers in 1963. Weaving Jean's incredible story as weight loss maven and pathbreaking entrepreneur with Marisa's own journey through Weight Watchers, she chronicles the deep parallels, and enduring frustrations, in each woman's decades-long efforts to lose weight and keep it off. The result is funny, unexpected, and unforgettable: a testament to how transformation goes far beyond a number on the scale.
