Based on established principles of the best ways to use ICT in English, this practical resource looks at when and how ICT can be used to engage and inspire students of English, but only when it enhances teaching and learning, never for its own sake. Beginning with an overview of what ICT can offer and how it is changing the way we teach and learn, the authors then give practical examples of activities and ideas to attain key English skills and learning goals in secondary schools. Throughout the book, there are tried-and-tested ideas for tackling the hard-to-teach topics, and there is also a dedicated website with links to useful websites, the authors' favourite tips and downloadable resources.

**Yuva India** Ray Titus,2015-02-25 Yuva India takes a deep dive into the lives of India's young men and women. In unravelling what makes them tick, the book uncovers the phenomenon of 'attitudinal convergence' that is rapidly growing across youth cohorts in India. Tracing its origin to the arrival of and exposure to a 'composite culture', the research behind 'convergence' zeroes in on how a young India is defining itself using new-age sensibilities. Drawing on insights collected over a decade, Ray documents and analyses how young men and women in India approach issues of identity, image, sexuality, spirituality, personal relevance, social connections and community, and professional pursuits. In a one-of-a-kind analysis, using comprehensive data from across the nation, Ray scrutinizes young India's psyche to make sense of their aspirations. Filled with numerous first-person accounts and brand stories, Yuva India provides an insightful understanding of India's most valuable asset, its youth population. **What Teachers Need to Know** Matthew Bruce Etherington,2017-03-31 Every generation has sought to make teaching and learning more inclusive and equitable, but pesky questions always remain, such as, how can teaching and learning be conducted in ways that satisfies and respects everyone? What are the parameters of an inclusive pedagogy? Who defines its principles? How should these principles be taught and by whom? And by what authority shall they be grounded? These types of thorny questions occupy the essence of educators and the authors of this book. This book is about teachers, educators, and topics related to inclusion. Teachers and educators have a lot to know, therefore the topics are broad and relevant to the times. What should teachers know about special needs, religion and spirituality, Aboriginality, the environment, tolerance, and school choice? Although teachers have knowledge of their subject matter, knowledge alone is not sufficient. They must know and understand how people learn. A teacher must also care deeply about who they teach. And this teacher knowledge grows and changes over time as teachers become more experienced, informed, skilled, and wiser. At the same time no teacher preparation will be sufficient because there will always be discussions that were never had and knowledge that was never shared. Time has its costs and there is only so much a formal education can prepare someone. This book helps to satisfy a cavity in learning for teachers and educators in general.

TACCLE Graham Attwell,2009 This book is written for classroom teachers who want to know more about e-learning and who would like to experiment with designing e-learning material to use in their own classrooms. It is primarily targeted at secondary teachers but there is no reason why primary school teachers and adult education teachers should not find it useful too. The other group we had in mind were those of you still undertaking initial teacher training. Although there are some exemplary courses, a depressing number of trainee teachers continue to arrive in the classroom having barely heard the words ‘e-learning’, still less have hands on experience of it.
