The Builders Daniel Polansky,2015-11-03 A missing eye. A broken wing. A stolen country. The last job didn't end well. Years go by, and scars fade, but memories only fester. For the animals of the Captain's company, survival has meant keeping a low profile, building a new life, and trying to forget the war they lost. But now the Captain's whiskers are twitching at the idea of evening the score. PRAISE FOR THE BUILDERS A living, breathing world of vivid, winsome characters hellbent on their blaze of glory and as unforgiving as a runaway train carrying all your friends over a cliff. I haven't cared about animals this much since *Watership Down*. – Delilah S. Dawson, author of *Hit and Wicked as They Come Nobody* does dark like Polansky. *The Builders* is *Redwall* meets *Unforgiven*, combining the endearing wit of Disney's *Robin Hood*

with all the grit and violence of a spaghetti western. – Myke Cole, author of the Shadow Ops series If Sam Peckinpah and Brian Jacques had a strange peyote ritual and shared a collective dream, it might look something like this. Brutish, nasty, short – much like life – Polansky's *The Builders* is also funny, exciting, and extremely original. **The Bread Builders** Alan Scott, Daniel Wing, 1999-07-01 Creating the perfect loaf of bread--a challenge that has captivated bakers for centuries--is now the rage in the hippest places, from Waitsfield, Vermont, to Point Reyes Station, California. Like the new generation of beer drinkers who consciously seek out distinctive craft-brewed beers, many people find that their palates have been reawakened and re-educated by the taste of locally baked, whole-grain breads. Today's village bakers are finding an important new role--linking tradition with a sophisticated new understanding of natural leavens, baking science and oven construction. Daniel Wing, a lover of all things artisanal, had long enjoyed baking his own sourdough bread. His quest for the perfect loaf began with serious study of the history and chemistry of bread baking, and eventually led to an apprenticeship with Alan Scott, the most influential builder of masonry ovens in America. Alan and Daniel have teamed up to write this thoughtful, entertaining, and authoritative book that shows you how to bake superb healthful bread and build your own masonry oven. The authors profile more than a dozen small-scale bakers around the U.S. whose practices embody the holistic principles of community-oriented baking based on whole grains and natural leavens. *The Bread Builders* will appeal to a broad range of readers, including: Connoisseurs of good bread and good food. Home bakers interested in taking their bread and pizza to the next level of excellence. Passionate bakers who fantasize about making a living by starting their own small bakery. Do-it-yourselfers looking for the next small construction project. Small-scale commercial bakers seeking inspiration, the most up-to-date knowledge about the entire bread-baking process, and a marketing edge.

*Builders of the Pacific Coast* Lloyd Kahn, 2008 In 2004, Lloyd Kahn discovered a group of unique carpenters along the Pacific Coast of North America. Over a two-year period, he made four trips north from his home in the San Francisco Bay Area, up the coast, shooting the photos that appear in this book. To preserve homeowners' privacy, specific locations are not given, but suffice to say this book focuses on the Pacific Coast north from San Francisco up to and around Vancouver Island, British Columbia, latitudes 37 to 49 degrees. There's been a vortex of creative carpentry energy in this part of the world over the last 30 years. Many of the builders shown here got started in the countercultural era of the '60s and '70s, and their work has never been shown in books or magazine articles.--BOOK JACKET.

**Mound-builders** Darryl Jones, Ann Goth, 2008-11-03 Mound-builders are unique in being the only birds that do not incubate their eggs using body heat; rather, a variety of naturally occurring sources of heat is exploited such as solar energy and the heat generated by decomposing organic matter. This book shows how this remarkable adaptation influences every part of these birds' lives, including the development of the embryo, the parentless life of the hatchlings, their social organisation and their survival. Twenty-two species of mound-builders exist within the Megapode family. Mound-builders examines the three occurring in Australia: the Scrubfowl in the humid tropics; the Brush turkey in dense forested areas from Cape York to Sydney; and most remarkable of all, the Malleefowl in the arid interior. Scientific interest in these birds has increased considerably in recent decades, and Mound-builders summarises many significant discoveries. With a strong emphasis on conservation and changing interactions between mound-builders and people, this is an excellent introduction to one of the most unusual bird families.
