Make Time Jake Knapp,John Zeratsky,2018-09-25 From the New York Times bestselling authors of Sprint comes “a unique and engaging read about a proven habit framework [that] readers can apply to each day” (Insider, Best Books to Form New Habits). “If you want to achieve more (without going nuts), read this book.”—Charles Duhigg, author of *The Power of Habit* Nobody ever looked at an empty calendar and said, The best way to spend this time is by cramming it full of meetings! or got to work in the morning and thought, Today I'll spend hours on Facebook! Yet that's exactly what we do. Why? In a world where information refreshes endlessly and the workday feels like a race to react to other people's priorities faster, frazzled and distracted has become our default position. But what if the exhaustion of constant busyness wasn't mandatory? What if you could step off the hamster wheel and start taking control of your time and attention? That's what this book is about. As creators of Google Ventures' renowned design sprint, Jake and John have helped hundreds of teams solve important problems by changing how they work. Building on the success of these sprints and their experience designing ubiquitous tech products from Gmail to YouTube, they spent years experimenting with their own habits and routines, looking for ways to help people optimize their energy, focus, and time. Now they've packaged the most effective tactics into a four-step daily framework that anyone can use to systematically design their days. Make Time is not a one-size-fits-all formula. Instead, it offers a customizable menu of bite-size tips and strategies that can be tailored to individual habits and lifestyles. Make Time isn't about productivity, or checking off more to-dos. Nor does it propose unrealistic solutions like throwing out your smartphone or swearing off social media. Making time isn't about radically overhauling your lifestyle; it's about making small shifts in your environment to liberate yourself from constant busyness and distraction. A must-read for anyone who has ever thought, If only there were more hours in the day..., Make Time will help you stop passively reacting to the demands of the modern world and start intentionally making time for the things that matter.

**Burner** Mike Trigg,2024-04-16 What if your social media addiction jeopardized the person you love? Inspired by the explosive events of our polarized political climate, *Burner* is an all-too plausible contemporary thriller that examines the social and personal consequences of the lost sense of identity, trust, and truth itself that characterizes our technology-obsessed culture. Shane Stoller has just been arrested for domestic terrorism, accused of being the mastermind behind the online profile *Burner\_911*—the anonymous leader of a massive populist movement. Chloe Corbin has just been abducted by *Burner\_911*'s followers in a lawless uprising on the streets of San Francisco, targeted as the socialite daughter of a tech billionaire. What nobody knows is that Shane and Chloe are secretly in love despite coming from opposite worlds. Plagued with regret but unable to communicate with his followers from prison, Shane tries desperately to find a way to save Chloe from the forces he has unleashed. From her own captivity, Chloe becomes more sympathetic to *Burner\_911*'s cause—and transitions from victim to conspirator in an effort to free herself and exonerate Shane. Part tragic love story, part mind-bending psychological thriller, *Burner* dives headfirst into the modern zeitgeist of politically motivated disinformation, toxic internet subcultures, and our continuing need for belonging, purpose, and love in an age of distorted online personas.

For twenty years, the sisters have lived different lives. In different places. Then there's the wild card, Ryker, a burner, who has no memories of his own past. In what was left of the world after the Chaos, mankind surrendered control to Dealer, a powerful computer that has kept society running for centuries. But truths don't come easy. And everyone and everything is not as they appear. The mantra in following Dealer's edicts: It is what it is. Until today.

*Design of Atmospheric Gas Burners* Walter Matho Berry,Isaac Vernon Brumbaugh,George Franklin Moulton,George Beaven Shawn,1921

**Boilers and Burners** Prabir Basu,Cen Kefa,Louis Jestin,2012-12-06 A joint effort of three continents, this book is about rational utilization of the fossil fuels for generation of heat or power. It provides a synthesis of two scientific traditions: the high-performance, but often proprietary, Western designs, and the elaborate national standards based on less advanced Eastern designs; it presents both in the same Western format. It is intended for engineers and advanced undergraduate and graduate students with an interest in steam power plants, burners, or furnaces. The text uses a format of practice based on theory: each chapter begins with an explanation of a process, with basic theory developed from first principles; then empirical relationships are presented and, finally, design methods are explained by worked out examples. It will thus provide researchers with a resource for applications of theory to practice. Plant operators will find solutions to and explanations of many of their daily operational problems. Designers will find this book ready with required data, design methods and equations. Finally, consultants will find it very useful for design evaluation.
