Burning the Books Richard Ovenden,2020-10-13 The director of the famed Bodleian Libraries at Oxford narrates the global history of the willful destruction—and surprising survival—of recorded knowledge over the past three millennia. Libraries and archives have been attacked since ancient times but have been especially threatened in the modern era. Today the knowledge they safeguard faces purposeful destruction and willful neglect; deprived of funding, libraries are fighting for their very existence. *Burning the Books* recounts the history that brought us to this point. Richard Ovenden describes the deliberate destruction of knowledge held in libraries and archives from ancient Alexandria to contemporary Sarajevo, from smashed Assyrian tablets in Iraq to the destroyed immigration documents of the UK Windrush generation. He examines both the motivations for these acts—political, religious, and cultural—and the broader themes that shape this history. He also looks at attempts to prevent and mitigate attacks on knowledge, exploring the efforts of librarians and archivists to preserve information, often risking their own lives in the process. More than simply repositories for knowledge, libraries and archives inspire and inform citizens. In preserving notions of statehood recorded in such historical documents as the Declaration of Independence, libraries support the state itself. By preserving records of citizenship and records of the rights of citizens as enshrined in legal documents such as the Magna Carta and the decisions of the US Supreme Court, they support the rule of law. In *Burning the Books*, Ovenden takes a polemical stance on the social and political importance of the conservation and protection of knowledge, challenging governments in particular, but also society as a whole, to improve public policy and funding for these essential institutions.

Burning Books M. Fishburn,2008-05-21 This provocative new work examines the years between the Nazi book fires and the publication of Ray Bradbury's *Fahrenheit 451* (1953), a period when book burning captured the popular imagination. It explores how embedded the myths of book burning have become in our cultural history, and illustrates the enduring appeal of a great cleansing bonfire.

Having just graduated from high school, Ben is set to leave Gypsum, Nevada. The timing is perfect since the gypsum mine that is the lifeblood of the area is closing and along with it: the entire town. Ben's lucky as he's headed to San Diego to the University of California on a track scholarship. But his best friends, Pete and Hog Boy, don't have college to look forward to, so to make them happy, Ben goes with them to check out the hot chick parked on the side of Highway 447. Lala and her Gypsy family earn money by telling fortunes. Some customers choose Tarot cards; others have their palms read. The thousands of people attending the nearby Burning Man festival spend lots of cash—especially as Lala gives uncanny readings. And the day she reads Ben's cards is the day that everything changes for her ... and for him. A spellbinding summer page-turner about self-determination. Dreamland Burning Jennifer Latham, 2017-02-21 A compelling dual-narrated tale from Jennifer Latham that questions how far we've come with race relations. Some bodies won't stay buried. Some stories need to be told. When seventeen-year-old Rowan Chase finds a skeleton on her family's property, she has no idea that investigating the brutal century-old murder will lead to a summer of painful discoveries about the present and the past. Nearly one hundred years earlier, a misguided violent encounter propels seventeen-year-old Will Tillman into a racial firestorm. In a country rife with violence against blacks and a hometown segregated by Jim Crow, Will must make hard choices on a painful journey towards self-discovery and face his inner demons in order to do what's right the night Tulsa burns. Through intricately interwoven alternating perspectives, Jennifer Latham's lightning-paced page-turner brings the Tulsa race riot of 1921 to blazing life and raises important questions about the complex state of US race relations--both yesterday and today.

Home Fires Burning Belinda J. Davis, 2003-06-19 Challenging assumptions about the separation of high politics and everyday life, Belinda Davis uncovers the important influence of the broad civilian populace--particularly poorer women--on German domestic and even military policy during World War I. As Britain's wartime blockade of goods to Central Europe increasingly squeezed the German food supply, public protests led by women of little means broke out in the streets of Berlin and other German cities. These street scenes riveted public attention and drew urban populations together across class lines to make formidable, apparently unified demands on the German state. Imperial authorities responded in unprecedented fashion in the interests of beleaguered consumers, interceding actively in food distribution and production. But officials' actions were far more effective in legitimating popular demands than in defending the state's right to rule. In the end, says Davis, this dynamic fundamentally reformulated relations between state and society and contributed to the state's downfall in 1918. Shedding new light on the Wilhelmine government, German subjects' role as political actors, and the influence of the war on the home front on the Weimar state and society, *Home Fires Burning* helps rewrite the political history of World War I Germany.

Burning Books and Leveling Libraries Rebecca Knuth, 2006-05-30 In her previous book *Libricide*, Knuth focused on book destruction by authoritarian regimes: Nazis, Serbs in Bosnia, Iraqis in Kuwait, Maoists during the Cultural Revolution in China, and the Chinese Communists in Tibet. But authoritarian governments are not the only perpetrators. Extremists of all stripes--through terrorism, war, ethnic cleansing, genocide, and other forms of mass violence--are also responsible for widespread cultural

destruction, as she demonstrates in this new book. Whether the product of passion or of a cool-headed decision to use ideas to rationalize excess, the decimation of the world's libraries has occurred throughout the 20th century, and there is no end in sight. Cultural destruction is, therefore, of increasing concern to the library community, educators, human rights and civil rights activists, and caring citizens.
