Riot at the Calc Exam and Other Mathematically Bent Stories Colin Conrad
Adams, 2009 What's so funny about math? Lots! Especially if you're
mathematically bent. In the world of Colin Adams, differential equations
bring on tears of laughter. Hollywood producers hire algebraic geometers to
punch up a script. In this world, math and humor are synonymous. Riot at the
Calc Exam is a proof of this fact. A collection of humorous math stories,
this book gives a window into mathematics and the culture of mathematicians.
Appropriate for mathematicians, math students, math teachers, lay people with
an interest in mathematics, and indeed everyone else. This book is a romp
through the wild.

The Cosmic Calculator Kenneth Williams, Mark Gaskell, 2002 The remarkable
system of Vedic mathematics was created after careful study of ancient -
Sanskrit texts early last century. The Vedic system with its direct, easy and
flexible approach forms a complete system of mental, mathematics (though the
methods can also be written down) and brings out the naturally coherent and
unified structure of mathematics. Many of the features and techniques of this
unique system are truly amazing in their efficiency and originality. Being a
mental system, Vedic Mathematics encourages creativity and innovation. Mental
mathematics increases mental agility, improves memory, the ability to hold
ideas in the mind and promotes confidence, as well as being of great
practical use. This course consists of three textbooks an Answer Book and a
Teacher's Guide. The course is aimed at 11-14 year old pupils though some of
it is very suitable for children from 8 years. Vedic Mathematics is being
taught in many schools world-wide with great success: many top mathematics
prizes have been won by students of this system.
