The Camera Ansel Adams, 2018-03-20 Ansel Adams (1902-1984) produced some of the 20th century's most iconic photographic images and helped nurture the art of photography through his creative innovations and peerless technical mastery. The Camera--the first volume in Adams' celebrated series of books on photographic techniques--has taught generations of photographers how to harness the camera's artistic potential. This time-honored handbook distills the knowledge gained through a lifetime in photography and remains as vital today as when it was first published. Along with visualization, image management, Adams' famous Zone System, and other keys to photographic artistry, The Camera covers 35mm, medium-format, and large-format view cameras, while offering detailed advice on camera components such as lenses, shutters, and light meters. Beautifully illustrated with photographs as well as instructive line drawings, this classic manual belongs on every serious photographer's bookshelf. Adams is a clear-thinking writer whose concepts cannot but help the serious photographer. - New York Times A master-class kind of guide from an undisputed master. - Publishers Weekly Over 1 million copies sold. Publisher's Note: This ebook of The Camera works best as a digital companion to the print edition. The ebook was produced by electronically scanning and digitizing a print edition, and as a result, your reading device may display images with halftone or moiré patterns.

In Camera: How to Get Perfect Pictures Straight Out of the Camera Gordon Laing, 2020-03-05 With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. Most photographers can take competent shots in a range of conditions, or fix imperfect exposures in Photoshop or Lightroom, but very few have the skill to push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required. In Camera is the perfect way to take your photography to that level; to master your camera, understand light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of Gordon's beautiful photos are given with his own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment.

The Soul of the Camera David duChemin, 2017-06-14 As both an art form and a universal language, the photograph has an extraordinary ability to connect and communicate with others. But with over one trillion photos taken each year, why do so few of them truly connect? Why do so few of them grab our emotions or our imaginations? It is not because the images lack focus or proper exposure; with advances in technology, the

camera does that so well these days. Photographer David duChemin believes the majority of our images fall short because they lack soul. And without soul, the images have no ability to resonate with others. They simply cannot connect with the viewer, or even—if we're being truthful—with ourselves.

In *The Soul of the Camera: The Photographer's Place in Picture-Making*, David explores what it means to make better photographs. Illustrated with a collection of beautiful black-and-white images, the book's essays address topics such as craft, mastery, vision, audience, discipline, story, and authenticity. *The Soul of the Camera* is a personal and deeply pragmatic book that quietly yet forcefully challenges the idea that our cameras, lenses, and settings are anything more than dumb and mute tools. It is the photographer, not the camera, that can and must learn to make better photographs—photographs that convey our vision, connect with others, and, at their core, contain our humanity. *The Soul of the Camera* helps us do that.

The Best Camera Is The One That's With You Chase Jarvis,2009-09-18 A beacon of creativity with boundless energy, Chase Jarvis is well known as a visionary photographer, director, and social artist. In *The Best Camera Is The One That's With You*, Chase reimagines, examines, and redefines the intersection of art and popular culture through images shot with his iPhone. The pictures in the book, all taken with Chase's iPhone, make up a visual notebook—a photographic journal—from the past year of his life. The book is full of visually-rich iPhone photos and peppered with inspiring anecdotes. Two megapixels at a time, these images have been gathered and bound into a book that represents a stake in the ground. With it, Chase underscores the idea that an image can come from any camera, even a mobile phone. As Chase writes, “Inherently, we all know that an image isn't measured by its resolution, dynamic range, or anything technical. It's measured by the simple—sometimes profound, other times absurd or humorous or whimsical—effect that it can have upon us. If you can see it, it can move you.” This book is geared to inspire everyone, regardless of their level of photography knowledge, that you can capture moments and share them with our friends, families, loved ones, or the world at the press

of a button. Readers of *The Best Camera Is The One That's With You* will also enjoy the iPhone application Chase Jarvis created in conjunction with this book, appropriately named Best Camera. Best Camera has a unique set of filters and effects that can be applied at the touch of a button. Stack them. Mix them. Remix them. Camera Lucida Roland Barthes, 1981 Examining the themes of presence and absence, the relationship between photography and theatre, history and death, these 'reflections on photography' begin as an investigation into the nature of photographs. Then, as Barthes contemplates a photograph of his mother as a child, the book becomes an exposition of his own mind.--Alibris.

Camera, 1907

Dad's Camera Ross Watkins, 2020-12-01 A moving portrayal of love and loss captures who — and what — we leave behind once we're gone. One day Dad comes home with one of those old cameras, the kind that uses film. But he doesn't take photos of the regular things people photograph. He takes pictures of his keys, his coffee cup, the objects scattered on his desk. He starts doing a lot of things that are hard to understand, like putting items that belong in the fridge in the cupboard and ones that belong in the cupboard in the fridge. In a sensitive, touching tale about losing a family member to a terminal illness, Ross Watkins and Liz Anelli prove that love is the one thing that can never be forgotten.

Cold War Camera Thy Phu, Erina Duganne, Andrea Noble, 2022-11-14 *Cold War Camera* explores the visual mediation of the Cold War and illuminates photography's role in shaping the ways it was prosecuted and experienced. The contributors show how the camera stretched the parameters of the Cold War beyond dominant East-West and US-USSR binaries and highlight the significance of photography from across the global South. Among other topics, the contributors examine the production and circulation of the iconic figure of the "revolutionary Vietnamese woman" in the 1960s and 1970s; photographs connected with the coming of independence and decolonization in West Africa; family photograph archives in China and travel snapshots by Soviet citizens; photographs of apartheid in South Africa; and the circulation of photographs of Inuit Canadians who were relocated to the extreme Arctic in the 1950s. Highlighting the camera's capacity to envision possible decolonized futures, establish visual affinities and solidarities, and advance calls for justice to redress violent proxy conflicts, this volume demonstrates that photography was not only crucial to conducting the Cold War, it is central to understanding it. Contributors. Ariella Azoulay, Jennifer Bajorek, Erina Duganne, Evyn Lê Espiritu Gandhi, Eric Gottesman, Tong Lam, Karinha Lowe, Ángeles Donoso Macaya, Darren Newbury, Andrea Noble, Sarah Parsons, Gil Pasternak, Thy Phu, Oksana Sarkisova, Olga Shevchenko, Laura Wexler, Guigui Yao, Donya Ziaee, Marta Ziętkiewicz
