Report of the Division of Cancer Treatment, NCI. National Cancer Institute (U.S.). Division of Cancer Treatment,1976

The War on Cancer Guy Faguet,2005-12-01 After reviewing the history of cancer and its impact on the population, Dr. Faguet exposes the antiquated notions that have driven cancer drug development, documents the stagnation in treatment outcomes despite major advances in cancer genomics and growing NCI budgets, and identifies the multiple factors that sustain the status quo. He shows that, contrary to frequent announcements of breakthroughs, our current cancer control model cannot eradicate most cancers and the reasons why. Significantly, this book also delineates a way forward via a shift from the discredited cell-kill approach of the past to an integrated, evidence-driven cancer control paradigm based on prevention, early diagnosis, and pharmacogenomics. The author's views are based on data published in mainstream scientific journals and other reliable references, 432 of which are cited.

Edited by leading clinicians in the field and a stellar contributor list from the US and Europe, this book is written in an easy to understand style by multidisciplinary teams of medical oncologists, radiation oncologists and other specialists, reflecting day-to-day decision-making and clinical practice. Pathways to Progress National Cancer Institute (U.S.), 1995

The Cancer Crisis in Appalachia Nathan L.

Vanderford, Lauren Hudson, Chris Prichard, 2020-04-06

Kentucky has more cancer diagnoses and cancer-related deaths than any other state in the nation, and most of these cases are concentrated in the fifty-four counties that constitute the Appalachian region of the commonwealth. These high rankings can be attributed to factors such as elevated smoking rates, unhealthy eating habits, lower levels of education, and limited access to health care. However, what the facts cannot convey on their own is just how life-changing cancer can be -- something that editors Nathan L. Vanderford, Lauren Hudson, and Chris Prichard have endeavored to address. *The Cancer Crisis in Appalachia* features essays written by a group of twenty high school and five undergraduate students, all of whom are residents of Kentucky's Appalachian region and are participants in the University of Kentucky Markey Cancer Center's Appalachian Career Training in Oncology (ACTION) program. These authentic and candid student essays detail the effects of cancer diagnoses and deaths on individuals, families, friends, and communities, and proclaim these cases as more than nameless statistics. *The Cancer Crisis in Appalachia* seeks to shed light on personal cancer stories, to inspire those engaging in cancer-risk behaviors to change their ways, to motivate people to get involved with cancer-prevention initiatives, and to encourage others to give generously and uplift cancer patients and their loved ones.

Life Over Cancer Keith Block, 2009-04-21 Dr. Keith Block is at the global vanguard of innovative cancer care. As medical director of the Block Center for Integrative Cancer Treatment in Evanston, Illinois, he has treated thousands of patients who have lived long, full lives beyond their original prognoses. Now he has distilled almost thirty years of experience into the first book that gives patients a systematic, research-based plan for developing the physical and emotional vitality they need to meet the demands of treatment and recovery. Based on a profound understanding of how body and mind can work together to defeat disease, this groundbreaking book offers:

- Innovative approaches to conventional treatments, such as “chronotherapy”—chemotherapy timed to patients’ unique circadian rhythms for enhanced effectiveness and reduced toxicity
- Dietary choices that make the biochemical environment hostile to cancer growth and recurrence, and strengthen the immune system’s ability to attack remaining cancer cells
- Precise supplement protocols to tame treatment side effects, relieve disease-related symptoms, and modify processes like inflammation and glycemia that can fuel cancer if left untreated
- A new paradigm for exercise and stress reduction that restores your strength, reduces anxiety and depression, and supports the body’s own ability to heal
- A complete program for remission
