**Carom Billiards: MORE Riddles & Puzzles** Allan P. Sand,2019-10-01 These Full-Table Carom Billiards layouts offer an excellent variety of table setups that show up in game after game. For Half-Table layouts, see the book “Carom Billiards: Some Riddles & Puzzles”. The layouts are designed to allow experimentation to try various cue ball speeds, spins, and angles. This provides significant personal competitive benefits: • Intellectual training – Evaluate the layouts and consider how many pathway options are available. Make sketches of paths and cue ball speeds & spins for the practice table. This increases your analytic and tactical skills. • Skills confirmation – As you attempt each path, your experimentation helps to determine whether it is viable (within your skills) or useless (too difficult or fantastic). This comparison between mental imagery and physical attempts helps determine the width and breadth of your abilities. • Skills advancement – If a path looks promising, but execution fails, work with various speeds/spins to discover what works. Several consecutive successes will add this to your personal library of competencies. ++++++ HOW TO STUDY Start with armchair analysis. Look at each table layout and consider possible playing options. Imagine shooting your ideas, concentrating on the appropriate speed and spin. Make sketches and notes, as needed. Alternately, take this book to your practice table, put the donuts down, and (without shooting anything), mentally figure out how many different ways you can play the shot. Make notes of your ideas. If this is a printed book, use a pencil and sketch out pathways. Make sketches, and when you get to the practice table, give them a shot. At the practice table, apply the paper reinforcement rings for the three ball positions. Think through the shot before you get down and stroke the cue ball. When shots get close, experiment with different speeds/spins and angles until you can consistently score (3 of 4 attempts). This is how you become a tougher and more dangerous player.

**Carom Billiards: Cushion First Patterns** Allan P. Sand,2019-10-01 There are a set of cue ball pattern shots that are fascinating. These are the shots where the cue ball goes into one or more cushions before contacting the first object ball. These are most common when the two object balls are close together. The player sends the cue ball into three cushions first. But there are many variations including one cushion first and two cushions first. This book assembles large variety of these types of shots. For each shot, there are two table layouts. The first is the ball positions on the table. The second is how the pro player made the point. There are two ways you can use these examples. First - as a mental exercise. Study the ball layout and the ball paths to determine how the shot was played. Second - as a table exercise. Set the balls up in the positions. Try to duplicate the shot. It may take only a few attempts, or a lot before you learn how to consistently score the point. You will do a lot of experimentation with different speeds and spins. The result will be a better understanding on how to play similar shots during your competitions. Enjoy the learning process and good luck!!

*Carom Billiards: Small Table Circle Patterns* Allan P. Sand,2019-10-01 This is a collection of shots that occur within the quarter table at the short rail. The cue ball goes off the long rail, short rail, and the opposite long rail - but only within a two diamond area. For each shot, there are two table layouts. The first is the ball positions on the table. The second is how the pro player made the point. There are two ways you can use these examples. First - as a mental exercise. Study the ball layout and the ball paths to determine how the shot was played. Second - as a table exercise. Set the balls up in the positions. Try to duplicate the shot. It may take only a few attempts, or a lot before you learn how to consistently score the point. You will do a lot of experimentation with different speeds and spins. The result will be a better understanding on how to play similar shots during your competitions. Enjoy the learning process and good luck!!

**Carom Billiards: Over the Hill Patterns** Allan P. Sand,2019-10-01 These shots are very common. The cue ball comes out of one corner to contact the middle of the opposite long rail. It then travels into the corner on the same side at the other end of the table. This creates a path that looks like the cue ball is going up and down a hill. For each shot, there are two table layouts. The first is the ball positions on the table. The second is how the pro player made the point. There are two ways you can use these examples. First - as a mental exercise. Study the ball layout and the ball paths to determine how the shot was played. Second - as a table exercise. Set the balls up in the positions. Try to duplicate the shot. It may take only a few attempts, or a lot before you learn how to consistently score the point. You will do a lot of experimentation with different speeds and spins. The result will be a better understanding on how to play similar shots during your competitions. Enjoy the learning process and good luck!!

**Carom Billiards Basics** Andreas Efler,2014-03-01 The basics training program is not only a useful guide for beginners into the fascinating world of carom billiards but also advanced players can improve and control their technique. The effects are systematically taught - separately as well as in combination - by means of exercises. A collection of training games guarantees lots of fun. The results of the exercises can be recorded and saved in a special database. This makes it easy for you to measure your progress!

*Carom Billiards: Full Table Circle Patterns* Allan P. Sand,2019-10-01 One of the interesting shot patterns is known as full table circle. These shots follow a clockwise or counter-clockwise path around the table rails. This book contains a large assortment of these types of shots. For each shot, there are two table layouts. The first is the ball positions on the table. The second is how the pro player made the point. There are two ways you can use these examples. First - as a mental exercise. Study the ball layout and the ball paths to determine how the shot was played. Second - as a table exercise. Set the balls up in the positions. Try to duplicate the shot. It may take only a few attempts, or a lot before you learn how to consistently score the point. You will do a lot of experimentation with different speeds and spins. The result will be a better understanding on how to play similar shots during your competitions. Enjoy the learning process and good luck!!

Carom Billiards: Around the World Patterns Allan P. Sand,2019-10-01 During competitions, many of the shots you see use a cue ball path known as Around the World. Basically, the path is from a corner, across to the opposite long rail. From there, the cue ball goes to the short rail and then the other long rail. From the second long rail, the cue ball travels to the other, side corner. This collection of around the world shots provides you with a extensive variety of scoring

solutions. For each shot, there are two table layouts. The first is the ball positions on the table. The second is how the pro player made the point. There are two ways you can use these examples. First - as a mental exercise. Study the ball layout and the ball paths to determine how the shot was played. Second - as a table exercise. Set the balls up in the positions. These are available at any office supply store. Place the first cue ball on the A ball position, the second cue ball on the B position, and the Red Ball on the dark ball position. PLAYING RULES Depending on your game preferences, use the appropriate scoring rules: 3-Cushion Straight Rail Balkline One Cushion For specific details, search on the World Wide Web for carom billiards rules. TABLE OPTIONS Every table layout provides four (4) different ways to score points: CB1 > Red > CB2 CB1 > CB2 > Red CB2 > Red > CB1 CB2 > CB1 > Red HOW TO STUDY Start with armchair analysis. Look at each table layout and consider possible playing options. Imagine shooting your ideas, concentrating on the appropriate speed and spin. Make sketches and notes, as needed. CHALLENGES (for fun & profit) For a change of pace, consider setting up a friendly competition among your buddies. Mutually select several of these layouts. Place the donuts on the table. Use a round-robin format. Everyone shoots an agreed number of times (1, 3, or 5) per setup. Winner gets the pot, and another round begins. ++++++ NOTES: - Ball positions are not random. They are calculated to fall within a wide variety of common pathways. - There are no hints or tips. Experimentation is encouraged. - Test newly learned systems with these layouts. - Test your abilities to predict the future. ++++++ FYI - there are two Riddles & Puzzles books: - Carom Billiards: Some Riddles & Puzzles (half-table layouts) - Carom Billiards: MORE Riddles & Puzzles (full-table layouts)

Carom Billiards Allan P Sand,2016-12-10 This is one of a series of Carom Billiards books that show how professional players select shots, based on the table layout. All of these shots have been mapped out based on shots played at international competitions.This book contains a wide variety of examples where the player shot the Cue Ball (CB) into the cushion(s) before the CB hit the first Object Ball (OB).These shots put you inside the head of the player beginning with the ball positions (shown in the first table layout). The second table layout shows the shooting decision and the results of the player's choice. The sections are based on the number of rails the CB goes before connecting with the first OB.
