Forward Drive Jim Motavalli, 2014-10-14 This comprehensive account of the past, present and future of the automobile examines the key trends, key technologies and key players involved in the race to develop clean, environmentally friendly vehicles that are affordable and that do not compromise on safety or design. Undertaking a rigorous interrogation of our global dependency on oil, the author demonstrates just how unwise and unnecessary this is in light of current developments such as the fuel cell revolution and the increasing viability of hybrid cars, which use both petrol and electricity - innovations that could signal a new era of clean, sustainable energy. The arguments put forward draw on support from an eclectic range of sources - including industry insiders, scientists, economists and environmentalists - to make for an enlightening read.

The Third Screen Chuck Martin, 2014-12-08 The ultimate guide to mobile marketing - revised and updated! An American Express Open Forum Best Business Book We are in the midst of a technological revolution bigger than the television or the PC. How do we, as marketers, harness mobile technology

to serve our customers most effectively? With the first screen - the television - companies sent ads directly into consumers' living rooms, reaching millions with one campaign. Now, the third screen - the mobile device - changed the game in an even more revolutionary way. The Third Screen: The Ultimate Guide to Mobile Marketing defines the implications, strategies, and tactics used to thrive in business during the mobile revolution. This revised, updated edition links technological developments to behavioral changes, reveals the unexpected forces of the changes in mobile, and equips marketers and businesses for the future.

Tinkering Kathleen Franz, 2011-06-07 In the first decades after mass production, between 1913 and 1939, middle-class Americans not only bought cars but also enthusiastically redesigned them. By examining the ways Americans creatively adapted their automobiles, *Tinkering* takes a fresh look at automotive design from the bottom up, as a process that included manufacturers, engineers, advice experts, and consumers in various guises. Franz argues that automobile ownership opened new possibilities for ingenuity among consumers even as large corporations came to control innovation. Franz weaves together a variety of sources, from serial fiction to corporate documents, to explore tinkering as a form of authority in a culture that valued ingenuity. Women drivers represented one group of consumers who used tinkering to advance their claim to social autonomy. Some canny drivers moved beyond modifying their individual cars to become independent inventors, patenting and selling automotive accessories for the burgeoning national demand for aftermarket products. Earl S. Tupper was one such tinkerer who went on to invent Tupperware. These savvy tinkerers worked in

a changing landscape of invention shaped increasingly by automotive giants. By the 1930s, Ford and General Motors worked to change the popular discourse of ingenuity and used the world's fairs of the Depression as a stage to promote a hierarchy of innovation. Franz not only demonstrates the entrepreneurial spirit of American consumers but she engages larger historical questions about gender, consumption and ingenuity while charting the impact corporate expansion on tinkering during the first half of the twentieth century.

Cemeterians Jack W. Plunkett, 2008 Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.
