**The Revolutions of Civilisation** William Matthew Flinders Petrie, 2013-05  
William Matthew Flinders Petrie, commonly known as Flinders Petrie, was a well-known English Egyptologist and a pioneer of systematic methodology in archaeology and preservation of artefacts. He was a member of the Fellows of the Royal Society due to having made a substantial contribution to the improvement of natural knowledge. In *The Revolutions of Civilization* Petrie surveys the development of various human civilisations, focusing on Egypt and Europe.

*Civilisations* Laurent Binet, 2022-04-14

**Civilisation Or Civilisations** E. H. Goddard, P. A. Gibbons, 1926

The Origin of Nations George Rawlinson, 1881

**The Origin of Civilisation and the Primitive Condition of Man** Sir John Lubbock, 1875

**Great Civilisations** Robert Nicholson, Peter Chrisp, Claire Watts, 2000

The Secret of the Pacific Charles Reginald Enock, 1912

*The Evolution of Civilizations* Carroll Quigley, 2003-01 Carroll Quigley was a legendary teacher at the Georgetown School of Foreign Service. His course on the history of civilization was extraordinary in its scope and in its impact on his students. Like the course, *The Evolution of Civilizations* is a comprehensive and perceptive look at the factors behind the rise and fall of civilizations. Quigley defines a civilization as a producing society with an instrument of expansion. A civilization's decline is not inevitable but occurs when its instrument of expansion is transformed into an institution--that is, when social arrangements that meet real social needs are transformed into social institutions serving their own purposes regardless of real social needs.

*Understanding Early Civilizations* Bruce G. Trigger, 2003-05-05 This book offers the first detailed comparative study of the seven best-documented early civilizations: ancient Egypt and Mesopotamia, Shang China, the Aztecs and adjacent peoples in the Valley of Mexico, the Classic Maya, the Inka, and the Yoruba. Unlike previous studies, equal attention is paid to similarities and differences in their sociopolitical organization, economic systems, religion, and culture. Many of this study's findings are surprising and provocative. Agricultural systems, technologies, and economic behaviour turn out to have been far more diverse than was expected. These findings and many others challenge not only current understandings of early civilizations but also the theoretical foundations of modern archaeology and anthropology. The key to understanding early civilizations lies not in their historical connections but in what they can tell us about similarities and differences in human behaviour.

**The Law of Civilization and Decay An Essay on History** Brooks Adams, 1951-01-01

The Emergence of Civilisation Charles Keith Maisels, 2016-06-08 *The Emergence of Civilisation* is a major contribution to our understanding of the development of urban culture and social stratification in the Near Eastern region. Charles Maisels argues that our present assumptions about state formation, based on nineteenth century speculations, are wrong. His investigation illuminates the changes in scale, complexity and hierarchy which accompany the development of civilisation. The book draws conclusions about the dynamics of social change and the processes of social evolution in

general, applying those concepts to the rise of Greece and Rome, and to the collapse of the classical Mediterranean world.

**The Clash of Civilizations and the Remaking of World Order** Samuel P. Huntington, 2007-05-31 The classic study of post-Cold War international relations, more relevant than ever in today's geopolitical climate—with a foreword by Zbigniew Brzezinski. Since its initial publication in 1996, *The Clash of Civilizations and the Remaking of World Order* has become one of the most influential books ever written about foreign affairs. Samuel Huntington explains how clashes between civilizations pose the greatest threat to world peace, but also how an international order based on civilizations is the best safeguard against war. *The Clash of Civilizations and the Remaking of World Order* explains how the population explosion in Muslim countries and the economic rise of East Asia have changed global politics. These developments challenge Western dominance, promote opposition to supposedly “universal” Western ideals, and intensify inter-civilization conflict over such issues as nuclear proliferation, immigration, human rights, and democracy. In his incisive analysis, Huntington offers a strategy for the West to preserve its unique culture and emphasizes the need for people everywhere to learn to coexist in a complex, multipolar, multi-civilizational world.

Trade and Civilisation Kristian Kristiansen, Thomas Lindkvist, Janken Myrdal, 2018-07-05 Provides the first global analysis of the relationship between trade and civilisation from the beginning of civilisation until the modern era.

**Civilization** Kenneth Clark, 1992

*The Clash of Civilisations Or the End of History?* Dominik Kalweit, 2008-02 Seminar paper from the year 2005 in the subject Politics - International Politics - Topic: European Union, grade: A / 1.0, University of Malta (Faculty of International Relations ), course: North Africa & International Order in the 21st Century, 19 entries in the bibliography, language: English, abstract: Introduction Samuel P. Huntington, notable political scientist and professor at Harvard University, raised a great discussion when his article *The Clash of Civilizations?* was published in 1993. As a response to Francis Fukuyama's *The End of History* - thesis, Huntington provides the post - Cold War world with a scheme of interpretation for the international relations of the multi-polarity which is to be found after 1989 up to date. Further, Huntington's main hypothesis states [...] that the fundamental source of conflict [...] will not be primarily ideological or primarily economic. The great division among humankind and the dominating source of conflict will be cultural. In opposition, Fukuyama beforehand *ibidem* *una traho* describes the global political order after the fall of the Iron Curtain as clearly defined: The end of history is reached since democracy will be the only reliable form of governance and state building, establishing in more and more countries throughout the world, regarding a long term spectrum of time. There is [...] such a thing as a single, coherent modernisation process [...] ]leading[ to liberal democracy and market-oriented economies as the only viable choices. This text will provide a short analysis of the countries of Northern Africa, namely Morocco, Algeria, Tunisia, Libya and Egypt, from the time of the twentieth century until to date. By doing so, particular emphasis will be put on cultural, historical and political aspects of the region, which, even that they might to a large extent be treated individually, have to be examined as co-relating and inter-acting with each other, nonetheless. In the context

*Principles of Western Civilisation* Benjamin Kidd, 1902

**Byzantine Civilisation** Steven Runciman, 1933 Byzantine culture and civilization was, until the late nineteenth century, regarded prejudicially as inferior to the Greek tradition and that of the Christian West, between which it was historically poised. It has taken historians like Steven Runciman to assess the cultural achievements of Byzantium in its own terms -- to evoke its individuality and uniqueness. A major attempt of modern scholarship to define for the general reader the scope and richness of Byzantine art, society, religion, politics, customs and history.

**The Past in the Present** Arthur Mitchell, 2015-06-25 Excerpt from *The Past in the Present: What Is Civilisation?* The publication of these Lectures, which were written under many difficulties, has been delayed in the hope that I should find time to re-write them. The necessary leisure, however, has not come, and I have consented to publish them as they were delivered - in all their incompleteness and with all their faults of style and arrangement. One change only I have made. I have struck out all merely amplifying, coupling, or recapitulating paragraphs. By this, perhaps, I have made them read less runningly. But those who have the printed Lectures in hand do not require such aids, and will gladly exchange them for shortness. I do not need to point out the objects I have in view in the first six Lectures.
