Have you recently moved to a new city and are struggling to make friends? Do you find yourself constantly making plans with friends that fall through? Making and maintaining friendships during adulthood can be hard--or, with a bit of intention and creativity, joyful. They examine the true nature of consciousness in three revelatory, engrossing essays. Ervin Laszlo makes a compelling case that consciousness is a phenomenon that transcends our physical beings. Jean Houston examines consciousness and its place in what she calls the "quantum field of the cosmos." Larry Dossey offers a trenchant, erudite takedown of the physicalist view of the mind. Together they change the way we see ourselves and our universe.

Four Ways to Click Amy Banks, Leigh Ann Hirschman, 2015-02-05 Research shows that people cannot reach their full potential unless they are in healthy connection with others. Dr. Amy Banks teaches us how to rewire our brains for healthier relationships and happier, more fulfilling lives. We all experience moments when we feel isolated and alone. A 2006 Purdue University study found that twenty-five percent of Americans cannot name a single person they feel close to. Yet every single one of us is hardwired for close relationships. The key to more satisfying relationships—be it with a significant other, a family member, or a colleague—is to strengthen the neural pathways in our brains that encourage closeness and connection. In this groundbreaking book, Dr. Banks give us a road map for developing the four distinct neural pathways in the brain that underlie the four most important ingredients for close relationships: calmness, acceptance, emotional resonance, and energy. Four Ways to Click gives you the tools you need to strengthen the parts of your brain that encourage connection and to heal the neural damage that disconnection can cause. From the Hardcover edition.

The Power of Networks Christopher G. Brinton, Mung Chiang, 2018-11-13 An accessible illustrated introduction to the networks we use every day, from Facebook and Google to WiFi and the Internet What makes WiFi faster at home than at a coffee shop? How does Google order search results? Is it really true that everyone on Facebook is connected by six steps or less? The Power of Networks answers questions like these for the first time in a way that all of us can understand. Using simple language,

analogies, stories, hundreds of illustrations, and no more math than simple addition and multiplication, Christopher Brinton and Mung Chiang provide a smart and accessible introduction to the handful of big ideas that drive the computer networks we use every day. The Power of Networks unifies these ideas through six fundamental principles of networking. These principles explain the difficulties in sharing network resources efficiently, how crowds can be wise or not so wise depending on the nature of their connections, why there are many layers in a network, and more. Along the way, the authors also talk with and share the special insights of renowned experts such as Google’s Eric Schmidt, former Verizon Wireless CEO Dennis Strigl, and “fathers of the Internet” Vint Cerf and Bob Kahn.

Connections Change Everything Kimberly Layne,2020-01-20 With the advancement of technology, and the growing desire to be more efficient and effective, we are slowly disengaging, and unconsciously separating ourselves. We are denying ourselves the ability to be present and to truly experience what is around us with all five senses. Feeling and being more connected at work is a key component to an individual's happiness. Happiness and fulfillment at work is just as much a risk factor for life expectancy as is diabetes, heart disease and obesity. It is proven that a joyful employee is a more productive, creative, and committed employee, and an asset to a company's bottom line. As a leader it falls to you to start the conversation and to create the culture. Connections Change Everything will show you how to practice connected leadership, daily, which emphasizes being relatable as a leader and having present conversations with your employees.
