An Atlas of Countries That Don't Exist Nick Middleton,2017-03-21 A "fascinating" journey to little-known and contested lands around the globe, from Tibet to the Isle of Man to Elgaland-Vargaland (Geographical Magazine). What is a country? Acclaimed travel writer and Oxford geographer Nick Middleton brings to life the origins and histories of fifty states that, lacking international recognition and United Nations membership, exist on the margins of legitimacy in the global order. From long-contested lands like Crimea and Tibet to lesser-known territories such as Africa's last colony and a European republic that enjoyed independence for a single day, Middleton presents fascinating stories of shifting borders, visionary leaders, and "forgotten" peoples. "Engrossing . . . You'll not find Middle-earth, Atlantis or Lilliput inside, but you will find something just as intriguing . . . sure to prompt discussions about what makes a country a 'real country.'" —Seattle Times

Hot Countries Alec Waugh,2011-10-28 First published in 1930, this discursive and absorbing travel-book offers, as the author says in his new Foreword, a picture of a way of living that exists no longer. *Hot Countries* tells of a series of journeys in the Far East, the West Indies and the South Sea Islands when he was a young and light-hearted novelist seeking colour, romance and adventure.

Invisible Countries Joshua Keating,2018-01-01 A thoughtful analysis of how our world's borders came to be and why we may be emerging from a lengthy period of cartographical stasis What is a country? While certain basic criteria--borders, a government, and recognition from other countries--seem obvious, journalist Joshua Keating's book explores exceptions to these rules, including self-proclaimed countries such as Abkhazia, Kurdistan, and Somaliland, a Mohawk reservation straddling the U.S.-Canada border, and an island nation whose very existence is threatened by climate change. Through stories about these would-be countries' efforts at self-determination, as well as their respective challenges, Keating shows that there is no universal legal authority determining what a country is. He argues that although our current world map appears fairly static, economic, cultural, and environmental forces in the places he describes may spark change. Keating ably ties history to incisive and sympathetic observations drawn from his travels and personal interviews with residents, political leaders, and scholars in each of these invisible countries.

History of the Low Countries J. C. H. Blom,E. Lamberts,2006-06 The history of the smaller European countries is rather neglected in the teaching of European history at university level. We are therefore pleased to announce the publication of the first comprehensive history of the Low Countries - in English - from Roman Times to the present. Remaining politically and culturally fragmented, with its inhabitants speaking Dutch, French, Frisian, and German, the Low Countries offer a fascinating picture of European history en miniature. For historical reasons, parts of northern France and western Germany also have to be included in the Low Countries, a term that must remain both broad and fluid, a convenient label for a region which has seldom, if ever, composed a unified whole. In earlier ages it was even more difficult to set parameters to the region, again reflecting Europe as a whole, when tribes and kingdoms stretched across expanses not limited to the present states of Belgium, Luxembourg, and the Netherlands. Nevertheless, its parts did demonstrate many common traits and similar developments that differentiated them from surrounding countries and lent them a distinct character. Internationally, the region often served both as a mediator for and a buffer to the surrounding great powers, France,

Britain, and Germany; an important role still played today as Belgium and the Netherlands have increasingly become involved in the broader process of European integration, in which they often share the same interest and follow parallel policies. This highly illustrated volume serves as an ideal introduction to the rich history of the Low Countries for students and the generally interested reader alike.

Through Unknown African Countries Arthur Donaldson Smith, 1897 A. Donaldson Smith was an American medical doctor and amateur big-game hunter who, in 1894-95, undertook an 18-month expedition from Berbera, Somalia (then British Somaliland) to Lake Turkana (then Lake Rudolf) in Kenya. He explored the headwaters of the Shabeelle River in Ethiopia and, on his return journey, descended the Tana River to the Kenyan coast. This book is his account of the expedition. Its appendices contain detailed descriptions and illustrations of the fishes, spiders and scorpions, moths, geological specimens, fossils, plants, and ethnographic objects collected on the expedition. Also included are maps of the expedition's route, glossaries of words collected from several African tribes, and his correspondence with Emperor Menelek, from whom he sought permission to travel through southern Ethiopia. Lake Turkana National Park in Kenya is now a UNESCO World Heritage Site.

Emerging Africa Steven Radelet, 2010-10-01 Emerging Africa describes the too-often-overlooked positive changes that have taken place in much of Africa since the mid-1990s. In 17 countries, five fundamental and sustained breakthroughs are making old assumptions increasingly untenable: • The rise of democracy brought on by the end of the Cold War and apartheid • Stronger economic management • The end of the debt crisis and a more constructive relationship with the international community • The introduction of new technologies, especially mobile phones and the Internet • The emergence of a new generation of leaders. With these significant changes, the countries of emerging Africa seem poised to lead the continent out of the conflict, stagnation, and dictatorships of the past. The countries discussed in the book are Botswana, Burkina Faso, Cape Verde, Ethiopia, Ghana, Lesotho, Mali, Mauritius, Mozambique, Namibia, Rwanda, São Tomé and Príncipe, Seychelles, South Africa, Tanzania, Uganda, and Zambia.

Developing Countries In The World Economy Jaime De Melo, 2015-03-26 Differences in the choices of trade and macro policies, both by developing countries and by developed countries towards developing countries, have been critical in determining the overall performance of developing countries. All too often, the performance of developing countries has not been assessed using appropriately conducted studies. The papers in this book are chosen to bridge this gap and show how a quantitative approach to policy evaluation can help resolve controversies and explain the choice of observed policies. The book brings together carefully selected papers that assess the impacts of various trade and macro policies, by quantifying the policies of developing countries at the macro level (exchange rate, investment, savings) and at the sector level (trade and industrial policies), in addition to policies of developed countries towards developing countries (trade preferences, quotas, VERs and migration policies). Facets of the political economy of trade, migration, and climate policies are explored (such as the enlargement of the EU, the rise of regionalism and how it can ease the pains of adjustment to trade liberalization, openness and inequality). Growing tensions between trade and the environment are also investigated. In short, this book covers a wide area of events ranging from external and internal shocks to external and internal policies, showing how the consequences of these events can be brought to rigorous quantitative analysis.
