Software Engineering for Large-Scale Multi-Agent Systems Alessandro Garcia, Carlos Lucena, Franco Zambonelli, Andrea Omicini, Jaelson

Castro, 2003-08-03 Nowadays, engineering large-scale software systems means dealing with complex systems composed of pervasive software components that move around and adapt to nondeterministic and open environments, like the Internet, in order to achieve systems design goals through the coordination of autonomously distributed services. The agent metaphor, in particular software agents and multi-agent systems (MAS), constitutes a promising approach for covering most of the software development life cycle, from conceptual modeling and requirements specification to architectural definition, design, and implementation. This book presents 17 carefully reviewed papers arranged in order to provide a coherent survey of how to exploit agent properties and MAS issues in today's software systems. The book offers the following topical sections: - software engineering foundations - requirements engineering and software architecture - coordination and mobility - reuse - dependability - empirical studies and applications

**Handbook of Effective Inclusive Schools** James McLeskey, Fred Spooner, Bob Algozzine, Nancy, L. Waldron, 2014-05-16 Over the last decade, the educational context for students with disabilities has significantly changed primarily as a result of mandates contained in NCLB and IDEA. The purpose of this book is to summarize the research literature regarding how students might be provided classrooms and schools that are both inclusive and effective. Inclusive schools are defined as places where students with disabilities are valued and active participants in academic and social activities and are given supports that help them succeed. Effectiveness is addressed within the current movement toward multi-tiered systems of support and evidence-based practices that meet the demands of high-stakes accountability.

Deadly Diamond D. J. Martin, 2014-07-29 DEADLY  
DIAMOND by D. J. Martin The Special Investigator  
team of Matt Diamond and Natasha Cutter had  
returned to their new office in Beverly Hills,  
California, and were going over a large list of  
potential clients when one caught their eye. They  
had received a call from Ms. Gloria Goldstein  
regarding the murder of her parents and the theft  
of a large twenty-carat light pink diamond from  
their jewelry store. The police had been of little  
help, and she was most anxious for them to  
investigate the tragedy. Although events began in  
Beverly Hills, the location quickly changed to  
Johannesburg, South Africa, which meant that the  
globe-traveling team would again return to the  
country where they had worked in their previous  
case. The hunt for the thieves and murderers had  
to begin at the original source, the antiques  
studio of Martin Clause in Johannesburg. He was  
the first to purchase what he named the Empress  
Diamond for \$500,000, then sold it to the  
Goldsteins for a solid \$1,000,000 a few days  
later. The Empress, from Tanzania, was the largest  
light pink diamond ever found. The Empress Diamond  
would be worth millions more if it could reach the  
United States. The Goldsteins provided the way to  
get the precious stone to the American market.  
Three former American Special Forces veterans also  
entered into pursuit of the Empress, as well as a  
sinister figure with the code name The Red Fox,  
who would pay any price to obtain the Empress for  
billionaire Sir Fredrick Marsh. Marsh wanted to  
give it to his wife as a birthday gift. It was up

to Matt Diamond and Natasha Cutter to follow the trail of the Deadly Diamond, a trail that would result in more deaths and a stone that many believed was cursed. Intrigue and suspense - who has the Empress now? - make this an exciting read, and the ending will surprise the reader with its strange twist of fate.

Murder in the Mist Eleanor Clarke

Yukic, 2000-06-28 The romantic holiday to southern France that Jim Collins has so carefully planned with his girlfriend, Teri Hunter, becomes complicated and bizarre from the moment they arrive in Paris. Jim had thought that three weeks in Provence would provide a suitable setting to convince Teri to marry him. A romantic vacation? What a joke that turns out to be. Jim is tall--over six feet and built like a wide receiver, muscular, lean and tough. His hair and eyes are dark brown, his complexion well-tanned. The bump on his long, aquiline nose bears evidence of a previous break. His mouth is full and sensuous. Teri loves the feel of his lips on hers and other sensitive parts of her anatomy. Teri is an attractive, shapely woman with a lean, athletic build--muscular, but definitely female. Her bright green eyes are in sharp contrast to her lustrous coal black hair and well-tanned skin. Jim is passionately in love with her. All along their carefully planned festive route through southern France, the couple keeps bumping unexpectedly into their fellow New York to Paris air travelers and becoming involved in odd accidents and bizarre incidents. A glamorous but frightened redhead, who traveled on their air flight from New York to Paris, on learning that Jim is a policeman, tries to solicit his help. Before she can explain the reasons for her noticeable terror, her companion, an arrogant, powerful US Senator, effectively isolates her from further contact or possible assistance, and she's unable to elude his tight

surveillance. Hiking in the woods of the French National Park in Le Camargue--a vast natural area where thousands of flamingos, herons, ducks and other fowls live in the salty sea water marshes along with beavers, racoons, squirrels, possums and herds of wild horses and cows--they hear gunshots, and Jim discovers the body of Meredith Prescott, the mysterious redhead who was so desperately seeking his help. Jim is at the top of the local police list of suspects. Their vacation continues to be marred by a host of improbable episodes--a kidnapped child in Lyon, the grandstand underneath them collapsing at a bull fight, thugs shadowing them, a hostile effort to foirce their car off the road high above the French Grand Canyon and other attempts on their lives as they visit Avignon, Arles, St. Remy, Aix-en-Provence, St. Tropez, Stes. Maries de la Mer, Moustiers Ste. Marie, Gordes and Paris. The couple doesn't understand why they keep finding themselves in these dangerous situations. Teri is frightened and Jim is torn between the desire to protect her and consumed with a need to unravel the mysterious events. Two French government agents, friends of Jim's from the past, pitch in to help solve the international web of intrigue in which Jim and Teri have become innocently ensnarled. The exciting climax erupts in the shawdow of Notre Dame Cathedral on the decks of a dinner cruise down the Seine.

Leveraging Applications of Formal Methods, Verification, and Validation Tiziana Margaria, Bernhard Steffen, 2010-10-19 The two volume set LNCS 6415 and LNCS 6416 constitutes the refereed proceedings of the 4th International Symposium on Leveraging Applications of Formal Methods, ISoLA 2010, held in Heraklion, Crete, Greece, in October 2010. The 100 revised full papers presented were carefully revised and selected from numerous submissions and discuss

issues related to the adoption and use of rigorous tools and methods for the specification, analysis, verification, certification, construction, test, and maintenance of systems. The 46 papers of the first volume are organized in topical sections on new challenges in the development of critical embedded systems, formal languages and methods for designing and verifying complex embedded systems, worst-case traversal time (WCTT), tools in scientific workflow composition, emerging services and technologies for a converging telecommunications / Web world in smart environments of the internet of things, Web science, model transformation and analysis for industrial scale validation, and learning techniques for software verification and validation. The second volume presents 54 papers addressing the following topics: EternalS: mission and roadmap, formal methods in model-driven development for service-oriented and cloud computing, quantitative verification in practice, CONNECT: status and plans, certification of software-driven medical devices, modeling and formalizing industrial software for verification, validation and certification, and resource and timing analysis.
