What is the long tail anyway? Whether you're a newly minted MBA, a chronic second-guesser, or just someone eager for a new vantage point, The Decision Book presents fifty models for better structuring, and subsequently understanding, life's steady challenges. Interactive and thought-provoking, this illustrated workbook offers succinct summaries of popular strategies, including the Rubber Band Model for dilemmas with many directions, the Personal Performance Model to test whether to change jobs, and the Black Swan Model to illustrate why experience doesn't guarantee wisdom. Packed with familiar tools like the Pareto Principle, the Prisoner's Dilemma, and an unusual exercise inspired by Warren Buffet, The Decision Book is the ideal reference for flexible thinkers.

Whether you need to plot a presentation, assess someone's business idea or get to know yourself better, this unique guide will help you simplify any problem and take steps towards the right decision.

Snap Decision Nathan Whitaker, 2014-07-01 Sometimes the truth hits hard. Chase Clark just upped his game. As an eighth grader, he scores the chance to play on the varsity football team with his best friend, Tripp. But when a hard hit takes Tripp down, Chase is the only one who knows what really happened. And telling could have serious consequences. Making the right call won't be easy. Neither will the consequences he'll face, both with the guys on the team and with the school. What's the game plan when doing right might mean everything else goes very wrong?

Decisive Chip Heath, Dan Heath, 2013-03-26 The four principles that can help us to overcome our brains' natural biases to make better, more informed decisions--in our lives, careers, families and organizations. In *Decisive*, Chip Heath and Dan Heath, the bestselling authors of *Made to Stick* and *Switch*, tackle the thorny problem of how to overcome our natural biases and irrational thinking to make better decisions, about our work, lives, companies and careers. When it comes to decision making, our brains are flawed instruments. But given that we are biologically hard-wired to act foolishly and behave irrationally at times, how can we do better? A number of recent bestsellers have identified how irrational our decision making can be. But being aware of a bias doesn't correct it, just as knowing that you are nearsighted doesn't help you to see better. In *Decisive*, the Heath brothers, drawing on extensive studies, stories and research, offer specific, practical tools that can help us to think more clearly about our options, and get out of our heads, to improve our decision making, at work and at home.

Suicide Paul G. Quinnett, 1992 This is a frank, compassionate book written to those who

contemplate suicide as a way out of their situations. The author issues an invitation to life, helping people accept the imperfections of their lives, and opening eyes to the possibilities of love.

Decision by Debate Douglas Ehninger, Wayne Brockriede, 2008 *Decision by Debate* broke new ground in argumentation and debate with its publication in 1963. Ehninger and Brockriede were the first to recognize debate as fundamentally a co-operative enterprise, with the competitive clash of ideas occurring within a framework in which everyone has the opportunity to speak, in which everyone agrees to suspend judgment until all arguments are presented, in which everyone agrees to abide by the decision of the adjudicator. The most lasting legacy of the work is its break with formal, deductive logic and its introduction of Stephen Toulmin's model of argument to undergraduate student debaters, which, since then, has become a mainstay of what many have called the Renaissance of argumentation studies. Without the work presented in *Decision by Debate*, contemporary interdisciplinary views of argumentation that now dominate many disciplines might have never have taken place or at least have been severely delayed.

Wharton on Making Decisions Stephen J. Hoch, Howard C. Kunreuther, 2004-08-20 *Perspectives from leaders in decision science at Wharton* Organized in part through Wharton's Risk Management and Decision Processes Center, the book assembles leading researchers from Wharton's business faculty who demonstrate how to apply the latest approaches in decision-making from four perspectives: personal, managerial, negotiator, and consumer. Each chapter describes how decisions are actually made, presents the ideal scenario, and then provides practical suggestions for improvement. The subjects range from when consumers will choose variety, integrating intuition into decisions, and applying game theory and strategic decisions, to decision factors in negotiations and how choices are made about insurance and health care.

Multiobjective Decision Making Vira Chankong, Yacov Y Haimmes, 2008-02-04 This first-rate text explores the theory and methodology of systems engineering in evaluating alternative courses of action and associated decision-making policies. It treats criteria as multidimensional, rather than scalar, in the development of normative theories. These contribute to a behavioral theory of decision making and provide guidance for exercising judgment. An introductory discussion of the systemic approach to judgment and decision is followed by explorations of psychological value measurements, utility, classical decision analysis, and vector optimization theory. The second section chiefly deals with methods of assessing and evaluating alternatives, including both noninteractive and interactive methods. A taxonomy and a comparative evaluation of methods conclude the text.

Coverage includes Understanding how Decision Management Systems can transform your business Planning your systems “with the decision in mind” Identifying, modeling, and prioritizing the decisions you need to optimize Designing and implementing robust decision services Monitoring your ongoing decision-making and learning how to improve it Proven enablers of effective Decision Management Systems: people, process, and technology Identifying and overcoming obstacles that can derail your Decision Management Systems initiative

Judgment and Decision Making Terry Connolly, Hal R. Arkes, Kenneth R. Hammond, 2000-01-13 This is a revision of Arkes and Hammond's 1986 collection of papers on judgment and decision making. Updated and extended, the focus of this volume is interdisciplinary and applied (in contrast to the companion collection, Goldstein and Hogarth's *Research in Judgment and Decision Making*, 1997). The papers are selected from scientific literature, but chosen specifically to appeal to the scholar, student and layperson alike.

The Decision Britta Böhler, 2015-11-15 This intriguing novel follows German author Thomas Mann during three crucial days in 1936. Away in Switzerland and fearing arrest by the Nazis upon his return to Germany, Mann must choose whether to travel back to Munich. He decides to release an open letter to the regime in a Swiss newspaper but is then tortured by doubt: his Jewish publisher in

Germany will be furious with the unwelcome attention Mann's letter is sure to bring, and by choosing exile, isn't the writer abandoning his loyal readers back home? Will the Nazis burn his books? Will they confiscate his diaries, which include intimate, homoerotic confessions? Britta Böhler shows us one of the twentieth century's greatest writers as a family man, a father, a writer, and a man with moral doubts. We see a human soul trapped in a historical setting that forces him to make a seemingly impossible choice. A convincing depiction of a dilemma addressed only sparsely in Mann's own writings, *The Decision* eloquently explores the all-too-human price of confronting totalitarianism.

Kill Decision Daniel Suarez, 2013-08-06 A scientist and a soldier must join forces when combat drones zero in on targets on American soil in this gripping technological thriller from New York Times bestselling author Daniel Suarez. Linda McKinney studies the social behavior of insects—which leaves her entirely unprepared for the day her research is conscripted to help run an unmanned and automated drone army. Odin is the secretive Special Ops soldier with a unique insight into a faceless enemy who has begun to attack the American homeland with drones programmed to seek, identify, and execute targets without human intervention. Together, McKinney and Odin must slow this advance long enough for the world to recognize its destructive power. But as enigmatic forces press the advantage, and death rains down from above, it may already be too late to save mankind from destruction.

Multiple Criteria Decision Making G.H. Tzeng, H.F. Wang, U.P. Wen, P.L. Yu, 2012-12-06 It was a great honor and privilege to organize the Tenth International Conference on Multiple Criteria Decision Making at Taipei, Taiwan, July 19-24, 1992. Accompanying this unique honor and privilege there was a series of complex, challenging problems. Each of them involved multiple criteria, fuzziness, uncertainty, unknown yet dynamic changes. The problem sometimes cost us sleep because we

wanted to do the very best job, but in reality it seemed to be impossible. The following are the main goals of the organization committee: (i) inviting all prominent and distinguished MCDM scholars around the world to participate in the conference and to present their up-to-date research results, (ii) providing financial aid and hospitality so that each invited speaker can have free room and board at a five star hotel, (iii) creating an environment so that all participants can freely exchange their ideas, and build friendships around the world. Due to the enthusiastic participation of the prominent scholars, the generous support of the Taiwan government, universities, the Industrial leaders and nonprofit foundations, and the active problem solving attitude and doing of the organizational committee and the Habitual Domain (HD) club, the conference was a great success.

Decision Making by the Book Haddon Robinson, 2010-10-01 It's said that decisions are made in the details. And yet, we make hundreds, even thousands of decisions daily. So how do Christians process all those details and come up with answers that please God? In *Decision-Making by the Book*, author, lecturer, and radio personality, Haddon W. Robinson, takes his usual clear-eyed, not-a-word-wasted approach, to help you make decisions according to biblical principles—every time.

Multiple Criteria Decision Making Murat Köksalan, Jyrki Wallenius, Stanley Zionts, 2011-06-06 Multiple Criteria Decision Making (MCDM) is all about making choices in the presence of multiple conflicting criteria. MCDM has become one of the most important and fastest growing subfields of Operations Research/Management Science. As modern MCDM started to emerge about 50 years ago, it is now a good time to take stock of developments. This book aims to present an informal, nontechnical history of MCDM, supplemented with many pictures. It covers the major developments in MCDM, from early history until now. It also covers fascinating discoveries by Nobel Laureates and other prominent scholars. The book begins with the early history of MCDM, which covers the roots of MCDM through the 1960s. It proceeds to give a decade-by-decade account of major developments in the field starting from the 1970s until now. Written in a simple and accessible manner, this book will be of interest to students, academics, and professionals in the field of decision sciences. history of Multiple Criteria Decision Making Covers decade-by-decade developments in MCDM, from early history until now Contains brief biographies and pictures of major contributors in the field Reviews: “Our ability to analyze and resolve complex decision problems is one of the most important developments of the last half of the 20th century. But, like all such endeavors, advances were often based on earlier ideas from a multitude of fields, ideas that encouraged and gave impetus to new generations of researchers. All readers of Multiple Criteria Decision Making: From Early History to the 21st Century will find that the authors have woven the early and modern histories of MCDM into a scientific adventure story, one that helps us to understand better how advances in a field of research are the result of many, many seemingly unrelated activities.” Saul I Gass Professor Emeritus Department of Decision, Operations and Information Technologies Robert H Smith School of Business, University of Maryland, College Park “Rarely do we get to understand the evolution of a scientific field told with such care and understanding. And a handy guide to the MCDM literature as well! I'll have all of my students read it!” Mark H Karwan Praxair Professor in Operations Research, SUNY Distinguished Teaching Professor Industrial and Systems Engineering at the University at Buffalo (SUNY) “I really enjoyed reading this book. It was written by three experts who have lived with MCDM and its history for a long time (two of them for over 40 years!). Now our community has a useful and valuable book that can be used by students and researchers to learn about MCDM and its history. I particularly like the photos which bring the history and its people to life.” Pekka Korhonen Professor of Statistics Aalto University, School of Economics “This book brings to life – contributors, contributions, activities – the evolution, growth, and future directions of MCDM, a multidiscipline that embraces all facets of decision making. Kudos to three highly distinguished MCDM scholars who have written a classic, which should be essential reading and serve as a resource for scholars in all academic and professional disciplines.” Herb Moskowitz Purdue University Retired Professor “Köksalan and his co-authors provide us with a better understanding of the history of an important area in OR to which many top researchers have contributed especially over the last twenty to thirty years ... As one of the first such publications covering a specific subfield, this book has certainly set a very high standard.” IFORS Newsletter
