**Human Dimension and Interior Space** Julius Panero, Martin Zelnik, 2014-01-21 The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space. Human Dimension and Interior Space is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With Human Dimension and Interior Space, these standards are now accessible to all designers of interior environments.

**Dimensions** Jacques Vallee, 2013-08 In DIMENSIONS, the first volume of a trilogy, Dr. Jacques Vallee reexamines the historical record that led to the modern UFO phenomenon and to the belief in alien contact. He then tackles the enigma of abduction reports, which come from various times and various countries, as well as the psychic and spiritual components of the contact experience. In the last portion of the book, he notes the factors that inhibit research into the phenomenon--the triple coverup and political motivations--and concludes that the extraterrestrial theory is simply not strange enough to explain the facts.

It is the story of a band of Dimensionaut's who as small pioneering teams venture to the far corners of the Universe. It is their story starting with the problems of the early days of the programme and the trials and tribulations of their many trips to strange worlds. their encounters with both very advanced entities and primitive life forms. It is accounts of their contacts with beings from other dimensions and finally what happened when one of them ends up going outside of the known Universe. The subsequent meeting with the Creator has profound consequences for the human race on her return. Other books by the same author From Blood to Compassion version 1 & 2

The Thought Readers (Mind Dimensions Book 1) Dima Zales, Anna Zaires, 2014-10-02 A new series about mind readers from a New York Times and USA Today bestselling author... Everyone thinks I'm a genius. Everyone is wrong. Sure, I finished Harvard at eighteen and now make crazy money at a hedge fund. But that's not because I'm unusually smart or hard-working. It's because I cheat. You see, I have a unique ability. I can go outside time into my own personal version of reality--the place I call "the Quiet"--where I can explore my surroundings while the rest of the world stands still. I thought I was the only one who could do this--until I met her. My name is Darren, and this is how I became entangled with all the Russians and learned that I'm a Reader.

*The Cosmology of Extra Dimensions and Varying Fundamental Constants* Carlos Martins, 2013-04-17 The workshop on The Cosmology of Extra Dimensions and Varying Fundamental Constants, which was part of JENAM 2002, was held at the Physics Department of the University of Porto (FCUP) from the 3rd to the 5th of September 2002. It was regularly attended by about 110 participants, of which 65 were officially registered in the VFC workshop, while the others came from the rest of the JENAM workshops. There were also a few science correspondents from the national and international press. During the 3 days of the scientific programme, 8 Invited Reviews and 30 Oral Communications were presented. The speakers came from 11 different European countries, and also from Argentina, Australia, Canada, Japan and the U.S.A. There were also speakers from six Portuguese research institutions, and nine of the speakers were Ph.D. students. The contributions are presented in these proceedings in chronological order. The workshop brought together string theorists, particle physicists, theoretical and observational cosmologists, relativists and observational astrophysicists. It was generally agreed that this inter-disciplinarity was the greatest strength of the workshop, since it provided people coming into this very recent topic from the various different backgrounds with an opportunity to understand each other's language and thereby gain a more solid understanding of the overall picture.

**Archetypal Dimensions of the Psyche** Marie-Louise von Franz,1999-02-16 The chief disciple of C. G. Jung, analyst Marie-Louise von Franz uses her vast knowledge of the world of myths, fairy tales, visions, and dreams to examine expressions of the universal symbol of the Anthropos, or Cosmic Man—a universal archetype that embodies humanity's personal as well as collective identity. She shows that the meaning of life—the realization of our fullest human potential, which Jung called individuation—can only be found through a greater differentiation of consciousness by virtue of archetypes, and that ultimately our future depends on relationships, whether between the sexes or among nations, races, religions, and political factions.
