What Editors Do Peter Ginna, 2017-10-06 Essays from twenty-seven leading book editors: "Honest and unflinching accounts from publishing insiders . . . a valuable primer on the field." —Publishers Weekly Editing is an invisible art in which the very best work goes undetected. Editors strive to create books that are enlightening, seamless, and pleasurable to read, all while giving credit to the author. This makes it all the more difficult to truly understand the range of roles they inhabit while shepherding a project from concept to publication. *What Editors Do* gathers essays from twenty-seven leading figures in book publishing about their work. Representing

both large houses and small, and encompassing trade, textbook, academic, and children's publishing, the contributors make the case for why editing remains a vital function to writers—and readers—everywhere. Ironically for an industry built on words, there has been a scarcity of written guidance on how to approach the work of editing. Serving as a compendium of professional advice and a portrait of what goes on behind the scenes, this book sheds light on how editors acquire books, what constitutes a strong author-editor relationship, and the editor's vital role at each stage of the publishing process—a role that extends far beyond marking up the author's text. This collection treats editing as both art and craft, and also as a career. It explores how editors balance passion against the economic realities of publishing—and shows why, in the face of a rapidly changing publishing landscape, editors are more important than ever. "Authoritative, entertaining, and informative." —Copyediting

Why We Do What We Do Edward L. Deci, Richard Flaste, 1996-08-01 What motivates us as students, employees, and individuals? If you reward your children for doing their homework, they will usually respond by getting it done. But is this the most effective method of motivation?

No, says psychologist Edward L. Deci, who challenges traditional thinking and shows that this method actually works against performance. The best way to motivate people—at school, at work, or at home—is to support their sense of autonomy. Explaining the reasons why a task is important and then allowing as much personal freedom as possible in carrying out the task will stimulate interest and commitment, and is a much more effective approach than the standard system of reward and punishment. We are all inherently interested in the world, argues Deci, so why not nurture that interest in each other? Instead of asking, How can I motivate people? we should be asking, How can I create the conditions within which people will motivate themselves? An insightful and provocative meditation on how people can become more genuinely engaged and successful in pursuing their goals. —Publisher's Weekly

Good Things to Do Rüdiger Bittner, 2023 The book is to show that the aim of thinking about what to do, of practical reason, is to find, not what we ought to do, but what is a good thing to do for us under the circumstances. So it argues, first, that neither under prudence nor under morality there are things we ought to do. There is no warrant for the idea of our being required, by natural law perhaps or by our rationality, to do either what helps us attain our ends or what is right for moral reasons. While common moral understanding is committed to there being things we ought to do and to our being guilty and deserving blame if we fail to do them, we can lay aside these notions without loss, indeed with benefit. Second, it explains what it is for something to be good for somebody to do under the circumstances and argues for understanding practical reason in these terms. What is good for somebody to do we find by experience: from what we go through we learn what helps and what hinders and figure out on this basis both what is prudentially useful and what is morally right to do - although in the end this difference itself gives way, and morality turns out to be a part of prudence--

When We Do Harm Danielle Ofri, MD, 2020-03-23 Medical mistakes are more pervasive than we think. How can we improve outcomes? An acclaimed MD's rich stories and research explore patient safety. Patients enter the medical system with faith that they will receive the best

care possible, so when things go wrong, it's a profound and painful breach. Medical science has made enormous strides in decreasing mortality and suffering, but there's no doubt that treatment can also cause harm, a significant portion of which is preventable. In *When We Do Harm*, practicing physician and acclaimed author Danielle Ofri places the issues of medical error and patient safety front and center in our national healthcare conversation.

Drawing on current research, professional experience, and extensive interviews with nurses, physicians, administrators, researchers, patients, and families, Dr. Ofri explores the diagnostic, systemic, and cognitive causes of medical error. She advocates for strategic use of concrete safety interventions such as checklists and improvements to the electronic medical record, but focuses on the full-scale cultural and cognitive shifts required to make a meaningful dent in medical error. Woven throughout the book are the powerfully human stories that Dr. Ofri is renowned for. The errors she dissects range from the hardly noticeable missteps to the harrowing medical cataclysms. While our healthcare system is—and always will be—imperfect, Dr. Ofri argues that it is possible to minimize preventable harms, and that this should be the galvanizing issue of current medical discourse.

Do Pause Robert Poynton, 2019-04-30 Machines are designed to run constantly; people aren't. Our coping mechanisms are meditation apps, weekend breaks and annual holidays, but things soon revert. To prosper, we need a more sustainable approach - an ability to pause. *Do Pause* looks at the importance of this subtle yet powerful idea to communication, creativity, relationships - as well as our wellbeing and sanity. With practical tools to help you create new habits or make more significant lifestyle choices, you'll discover ways to: Reset and regenerate;

Deepen your thinking and experiences; Take back control of your time; Reconnect with other people - and yourself. From taking a breath to taking a sabbatical, a pause can be many things. And the good news is, even just a small pause every now and again can make a real and lasting difference.

What the Best College Teachers Do Ken

Bain, 2011-09-01 Winner of the Virginia and Warren Stone Prize awarded annually by Harvard University Press for an outstanding book on education and society What makes a great teacher great? Who are the professors students remember long after graduation? This book, the conclusion of a fifteen-year study of nearly one hundred college teachers in a wide variety of fields and universities, offers valuable answers for all educators. The short answer is—it's not what teachers do, it's what they understand. Lesson plans and lecture notes matter less than the special way teachers comprehend the subject and value human learning. Whether historians or physicists, in El Paso or St. Paul, the best teachers know their subjects inside and out—but they also know how to engage and challenge

students and to provoke impassioned responses. Most of all, they believe two things fervently: that teaching matters and that students can learn.

What the Best College Students Do Ken

Bain, 2012-08-27 The author of the best-selling *What the Best College Teachers Do* is back with more humane, doable, and inspiring help, this time for students who want to get the most out of college—and every other educational enterprise, too. The first thing they should do? Think beyond the transcript. The creative, successful people profiled in this book—college graduates who went on to change the world we live in—aimed higher than straight A's. They used their four years to cultivate habits of thought that would enable them to grow and adapt throughout their lives. Combining academic research on learning and motivation with insights drawn from interviews with people who have won Nobel Prizes, Emmys, fame, or the admiration of people in their field, Ken Bain identifies the key attitudes that distinguished the

best college students from their peers. These individuals started out with the belief that intelligence and ability are expandable, not fixed. This led them to make connections across disciplines, to develop a “meta-cognitive” understanding of their own ways of thinking, and to find ways to negotiate ill-structured problems rather than simply looking for right answers. Intrinsically motivated by their own sense of purpose, they were not demoralized by failure nor overly impressed with conventional notions of success. These movers and shakers didn’t achieve success by making success their goal. For them, it was a byproduct of following their intellectual curiosity, solving useful problems, and taking risks in order to learn and grow.
