*Sleep Donation* Karen Russell, 2020-09-29 Newly illustrated and available for the first time in years, a haunting novella from the uncannily imaginative author of the national bestsellers *Swamplandia!* and *Orange World*: the story of a deadly insomnia epidemic and the lengths one woman will go to to fight it. Trish Edgewater is the Slumber Corps' top recruiter. On the phone, at a specially organized Sleep Drive, even in a supermarket parking lot: Trish can get even the most reluctant healthy dreamer to donate sleep to an insomniac in crisis--one of hundreds of thousands of people who have totally lost the ability to sleep. Trish cries, she shakes, she shows potential donors a picture of her deceased sister, Dori: one of the first victims of the lethal insomnia plague that has swept the globe. Run by the wealthy and enigmatic Storch brothers, the Slumber Corps is at the forefront of the fight against this deadly new disease. But when Trish is confronted by Baby A, the first universal sleep donor, and the mysterious Donor Y, whose horrific infectious nightmares are threatening to sweep through the precious sleep supply, her faith in the organization and in her own motives begins to falter. Fully illustrated with dreamy evocations of Russell's singular imagination and featuring a brand-new Nightmare

Appendix, Sleep Donation will keep readers up long into the night and long after haunt their dreams.

Give a Little Wendy Smith,2009-11-03 With open hearts and open hands, we gave what we could, and a little became a lot. -- from Give a Little Dimes destroyed polio. Five bucks can beat malaria. Give a Little: How Your Small Donations Can Transform Our World not only contains remarkable, inspiring stories of how small donations are making an extraordinary difference in the lives of millions both here in the United States and around the world, but also lays out where and how to start giving . . . today. Together, ordinary Americans have far more transformational power than any government or big foundation. In 2007, giving by American individuals amounted to \$229 billion--that is, 82 times the amount the Gates Foundation gave that same year. Simple, inexpensive things--a water filter, a bike, an irrigation pump, a bed net, a goat--cause a ripple effect that lifts a whole family, a town, and, astonishingly, even a nation out of poverty. Inspired by Smith's twenty years in the nonprofit sector, Give a Little shows how easily we can dip into our pockets and, with just a few dollars, change the world.

**The Organ Donor Experience** Katrina A. Bramstedt,2011-11-16

Organ donors are, by definition, altruists, and their act is even more generous when they remain anonymous. But altruism doesn't tell the whole story. There are myriad motivations, some subconscious, some conscious, that compel people to donate a part of themselves to someone they don't know. The Organ Donor Experience uncovers the desires, personalities and motivations of Good Samaritan organ donors and reveals much about the process of donating an organ to a needy recipient.

Organ Donation Sarah Boslaugh, 2022-04-01 This book provides a comprehensive yet accessible look at organ donation and transplantation, including coverage of scientific, medical, social, legal, and ethical issues. Readers will also discover how new technologies and medical advances are shaping the future of organ donation. Donated organs and tissues have improved or saved the lives of hundreds of thousands of individuals. But these life-changing procedures raise many logistical and ethical

questions. How can organs be effectively allocated to those in need? Should individuals be allowed to purchase organs from living donors? What role does religion and culture play in someone's decision to donate or accept an organ? Will new technologies like bioprinting change the future of organ donation? Part of Greenwood's Health and Medical Issues Today series, *Organ Donation* is divided into three sections. Part I explores different aspects of the donation and transplantation process, including which tissues and organs can be donated, living versus deceased donation, religious and cultural perceptions, and cutting-edge alternatives to traditional organ transplants. Part II delves deep into a variety of issues and controversies related to the subject, offering thorough and balanced coverage of such hot-button topics as opt-in versus opt-out systems, organ trafficking, and transplant tourism. Part III provides a variety of useful materials, including case studies, a glossary, and a directory of resources.

Organ Donation Margaret Haerens, 2012-09-26 This global-perspective guidebook explores issues related to organ donation in various countries, including the United States, Spain, Australia, India, and Pakistan. Readers will learn about poverty and organ donation, illegal trafficking of organs, and compensation for

donation. This book also examines the presumed consent of opt-in / opt-out laws. Essay sources include The Portugal News, Ami Cholia, Calev Ben-David, Habib Toumi, and Natsuko Fukue.

*The Ethics of Medical Data Donation* Jenny Krutzinna, Luciano Floridi, 2019-01-16 This open access book presents an ethical approach to utilizing personal medical data. It features essays that combine academic argument with practical application of ethical principles. The contributors are experts in ethics and law. They address the challenges in the re-use of medical data of the deceased on a voluntary basis. This pioneering study looks at the many factors involved when individuals and organizations wish to share information for research, policy-making, and humanitarian purposes. Today, it is easy to donate blood or even organs, but it is virtually impossible to donate one's own medical data. This is seen as ethically unacceptable. Yet, data donation can greatly benefit the welfare of our societies. This collection provides timely interdisciplinary research on biomedical big data. Topics include the ethics of data donation, the legal and regulatory challenges, and the current and future collaborations. Readers will learn about the ethical and regulatory challenges associated with medical data donations. They will also better understand the special nature of

using deceased data for research purposes with regard to ethical principles of autonomy, beneficence, and justice. In addition, the contributors identify the key governance issues of such a scheme. The essays also look at what we can learn in terms of best practice from existing medical data schemes.

### **Organ Donation and Transplantation Georgios**

Tsoulfas, 2018-07-25 One of the most interesting and at the same time most challenging fields of medicine and surgery has been that of organ donation and transplantation. It is a field that has made tremendous strides during the last few decades through the

combined input and efforts of scientists from various specialties. What started as a dream of pioneers has become a reality for the thousands of our patients whose lives can now be saved and improved. However, at the same time, the challenges remain significant and so do the expectations. This book will be a collection of chapters describing these same challenges involved including the ethical, legal, and medical issues in organ donation and the technical and immunological problems the experts are facing involved in the care of these patients. The authors of this book represent a team of true global experts on the topic. In addition to the knowledge shared, the authors provide their personal clinical experience on a variety of different aspects of organ donation and transplantation.

**EBOOK: Organ and Tissue Donation: An Evidence Base for Practice** Margaret Sque, Sheila Payne, 2007-03-16 What is the historical and social context that shapes our attitudes towards organ and tissue donation? How do the bereavement experiences of organ donor families differ from other types of bereavement? How can health and social care professionals support bereaved families leading up to, during and after organ and tissue donation? This ground-breaking book is a valuable addition to the end-of-life,

palliative and bereavement care literature. Using original research findings relating to the social and psychological issues surrounding organ donation, this book provides a strong evidence-base and brings together contemporary research carried out in the developed world. The book is internationally applicable, especially in countries with Westernised healthcare systems and where organ donation takes place using similar practices to the UK. Key areas covered include: Examination of the historical development of human dissection and how it created a context for legislation Analysis of how human organ and tissue donation is currently understood The social theories that help explain the donation event and families' and health professionals' experiences of it Organ and Tissue Donation: An Evidence Base for Practice is essential reading for transplant coordinators and qualified clinical practitioners working in intensive care, accident and emergency departments, operating theatres, palliative care units and bereavement support and counselling services. It is also a core text for specialist postgraduate programmes and a useful reference book for national organisations concerned with donation and transplant services.

*Money for the Asking* Peter Munstedt, 2019-11-01 *Money for the Asking* explores the basics of fundraising for music library

professionals. Music libraries face many challenges today, including shrinking budgets. Fundraising is one way to increase a library's resources, but few books address fundraising opportunities specifically for music libraries. In this concise volume Peter Munstedt provides practical advice for music librarians who want to initiate fundraising. Based on his depth of experience, the author explains the importance of promoting a library's needs, which can be critical in establishing fundraising efforts. Working with individual donors is essential for any fundraising program. The book differentiates four essential steps that development professionals employ when working with donors, including identification, cultivation, solicitation, and stewardship. There is also an explanation of the various types of donations, such as gifts in kind, monetary gifts, endowments, and planned giving. Obtaining resources through grants is another significant aspect of fundraising. The book covers corporation, foundation, and government grants within the context of music libraries. Other methods of raising money are also described, including several kinds of fundraising events, such as benefit concerts, book sales, as well as other public and private events. While encouraging music libraries to pursue fundraising, the author also cautions

about several subtle issues that consist of hidden costs, internal politics, and ethical concerns. This book reveals principles in the professional development world as seen through the eyes of a music librarian. The author explains real-life experiences in a music library setting, including case studies from his library. Also provided are examples of fundraising web pages from various other music libraries. The book reveals the positive effects and actual benefits that fundraising can bring to a music library. Money really is there for the asking.

Giving Blood Johanne Charbonneau, André Smith, 2015-07-24

Giving Blood represents a new agenda for blood donation research. It explores the diverse historical and contemporary undercurrents that influence how blood donation takes place, and the social meanings that people attribute to the act of giving blood. Drawing from empirical studies conducted in the United States, Canada, France, Australia, China, India, Latin America and Africa, the book's chapters turn our attention to the evolution of blood donation worldwide, examining: the impact of technology advances on blood collection practices the shifting approaches to donor recruitment and retention the governance and policy issues associated with the establishment of blood clinics the political and legal challenges of regulating blood systems. This innovative examination moves the focus from individual explanations of rates of blood donation to a social, structural explanation. It will appeal to international scholars and students working in the areas of sociology, medical anthropology, health care, public policy, socio-legal studies, comparative politics, organizational management,

health and illness, the history of medicine, and public health ethics.

**Regulating Reproductive Donation** Susan Golombok, 2016-04  
Brings together different disciplinary perspectives and new

empirical insights to explore the regulation of assisted reproduction around the world.

The Self-Donation of God Jack D. Kilcrease, 2013-03-20 In The Self-Donation of God, Jack Kilcrease argues that the speech-act of promise is always an act of self-donation. A person who unilaterally promises to another is bound to take a particular series of actions to fulfill that promise. Being that creation is grounded in God's promising speech, the divine-human relationship is fundamentally one of divine self-donation and human receptivity. Sin disrupts this relationship and therefore redemption is constituted by a reassertion of divine promise of salvation in the face of the condemnation of the law (Gen 3:15). As a new and effective word of grace, the promise of a savior begins the process of redemption within which God speaks forth a new narrative of creation. In this new narrative, God gives himself in an even deeper manner to humanity. By donating himself through a promise, first to the protological humanity and then to Israel, he binds himself to them. At the end of this history of self-binding, God in Christ enters into the condemnation of the law, neutralizes it in the cross, and brings about a new creation through his omnipotent word of promise actualized in the resurrection.
