Drive Daniel H. Pink, 2011-04-05 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

Drive James Sallis, 2011-10-04 Much later, as he sat with his back against an inside wall of a Motel 6 just north of Phoenix, watching the pool of blood lap toward him, Driver would wonder whether he had made a terrible mistake. Later still, of course, there'd be no doubt. But for now Driver is, as they say, in the moment. And the moment includes this blood lapping toward him...

Hard Drive James Wallace, Jim Erickson, 1993-06 The true story behind the rise of a tyrannical genius, how he transformed an industry, and why everyone is out to get him. In this fascinating exposé, two investigative reporters trace the hugely successful career of Microsoft founder Bill Gates. Part entrepreneur, part enfant terrible, Gates has become the most powerful -- and

feared -- player in the computer industry, and arguably the richest man in America. In *Hard Drive*, investigative reporters Wallace and Erickson follow Gates from his days as an unkempt thirteen-year-old computer hacker to his present-day status as a ruthless billionaire CEO. More than simply a revenge of the nerds story though, this is a balanced analysis of a business triumph, and a stunningly driven personality. The authors have spoken to everyone who knows anything about Bill Gates and Microsoft -- from childhood friends to employees and business rivals who reveal the heights, and limits, of his wizardry. From Gates's singular accomplishments to his equally extraordinary brattiness, arrogance, and hostility (the atmosphere is so intense at Microsoft that stressed-out programmers have been known to ease the tension of their eighty-hour workweeks by exploding homemade bombs), this is a uniquely revealing glimpse of the person who has emerged as the undisputed king of a notoriously brutal industry.

Drive Kate Stewart, 2017-10-13 Music . . . the heart's greatest librarian. The average song is three and a half minutes long; those three and a half minutes could lead to a slow blink, a glimpse of the past, or catapult the

soul into heart-shattering nostalgia. At the height of my career, I had the life I wanted, the life I'd always envisioned. I'd found my tempo, my rhythm. Then I received a phone call that left me off key. You see, my favorite songs had a way of playing simultaneously. I was in love with one man's beats and another's lyrics. But when it came to the soundtrack of a life, how could anyone choose a favorite song? So, to erase any doubt, I ditched my first-class ticket and decided to take a drive, fixed on the rearview. Two days. One playlist. And the long road home to the man who was waiting for me.

Horatio's Drive Dayton Duncan, Ken Burns, 2003 The companion volume to the PBS documentary film about the first—and perhaps most astonishing—automobile trip across the United States. In 1903 there were only 150 miles of paved roads in the entire nation and most people had never seen a “horseless buggy”—but that did not stop Horatio Nelson Jackson, a thirty-one-year-old Vermont doctor, who impulsively bet fifty dollars that he could drive his 20-horsepower automobile from San Francisco to New York City. Here—in Jackson's own words and photographs—is a glorious account of that months-long, problem-beset, thrilling-to-the-rattled-bones trip with his mechanic, Sewall Crocker, and a bulldog named Bud. Jackson's previously unpublished letters to his wife, brimming with optimism against all odds, describe in vivid detail every detour, every flat tire, every adventure good and bad. And his nearly one hundred photographs show a country still settled mainly in small towns, where life moved no faster than the horse-drawn carriage and where the arrival of Jackson's open-air (roofless and windowless) Winton would cause delirious excitement. Jackson was possessed of a deep thirst for adventure, and his remarkable story chronicles the very beginning of the restless road trips that soon became a way of life in America. Horatio's Drive is the first

chapter in our nation's great romance with the road. With 146 illustrations and 1 map

Why We Drive Matthew B. Crawford, 2020-06-09 A brilliant and defiant celebration of driving as a unique pathway of human freedom, by one of the most influential thinkers of our time (Sunday Times) Why We Drive weaves philosophers, thinkers, and scientific research with shade-tree mechanics and racers to defend our right to independence, making the case that freedom of motion is essential to who we are as a species. ... We hope you'll read it.

—Road & Track Once we were drivers, the open road alive with autonomy, adventure, danger, trust, and speed. Today we are as likely to be in the back seat of an Uber as behind the wheel ourselves. Tech giants are hurling us toward a shiny, happy “self-driving” future, selling utopia but equally keen to advertise to a captive audience strapped into another expensive device. Are we destined, then, to become passengers, not drivers? Why We Drive reveals that much more may be at stake than we might think. Ten years ago, in the New York Times—bestselling Shop Class as Soulcraft, philosopher-mechanic Matthew B. Crawford—a University of Chicago PhD who owned his own motorcycle shop—made a revolutionary case for manual labor, one that ran headlong against the pretensions of white-collar office work. Now, using driving as a window through which to view the broader changes wrought by technology on all aspects of contemporary life, Crawford investigates the driver's seat as one of the few remaining domains of skill, exploration, play—and freedom. Blending philosophy and hands-on storytelling, Crawford grounds the narrative in his own experience in the garage and behind the wheel, recounting his decade-long restoration of a vintage Volkswagen as well as his journeys to thriving automotive subcultures across the country. Crawford leads us on an

irreverent but deeply considered inquiry into the power of faceless bureaucracies, the importance of questioning mindless rules, and the battle for democratic self-determination against the surveillance capitalists. A meditation on the competence of ordinary people, *Why We Drive* explores the genius of our everyday practices on the road, the rewards of “folk engineering,” and the existential value of occasionally being scared shitless. Witty and ingenious throughout, *Why We Drive* is a rebellious and daring celebration of the irrepressible human spirit.

Drive to Survive Chris Daly, 2020-03-12 *Drive to Survive: The Art of Wheeling the Rig* provides an in-depth examination of fire apparatus vehicle dynamics. This is not your average “driver training” textbook. Fire apparatus operators must understand how a vehicle maneuvers at roadway speed, and more importantly...why does it crash? Just as a doctor cannot heal the human body without a thorough understanding of anatomy and physiology, an emergency vehicle operator cannot safely drive a fire apparatus without an in-depth knowledge of vehicle dynamics. *Drive to Survive* goes beyond talking about pump operations, aerial operations, and preventative maintenance; it fills in the gaps between vehicle dynamics and crash causation. After 15 years of training and research, Chris Daly developed a training program combining his fire service and crash reconstruction training experience. This book provides an in-depth knowledge of topics required in the following NFPA standards: --NFPA 1002 “Standard for Fire Apparatus Driver/Operator Professional Qualifications” --NFPA 1451 “Standard for Fire and Emergency Service Vehicle Operations Training Programs” --NFPA 1500 “Standard on Fire Department Occupational Health and Safety Program” Fire apparatus operators will learn

the limits of driving an emergency vehicle and will understand that no matter how long they have been driving or how good they think they are, at some point physics will take over and the vehicle will lose control. We can reduce the number of emergency vehicle crashes throughout the world by addressing key issues and providing emergency vehicle operations course (EVOC) instructors with methods to convey these concepts. Concepts you learn in this book relate to more than just driving a fire apparatus. These principles apply to anyone who drives a vehicle, including your family members and loved ones.

Rainbow Drive Roderick Thorp, 2014-12-02 Decades after his father's murder, a Los Angeles cop gets a chance to set things right Michael Gallagher is twelve years old when his father is hit by a speeding truck. While crusading

for public housing, his father ran afoul of the city's most corrupt politicians, and Michael is certain they were responsible for the crash. As his father is lowered into the ground, Michael vows vengeance—no matter how long it takes. Decades later, Michael, now a police officer, is awakened one night by gunfire. Outside his window, he sees helicopters and squad cars arriving at the scene of the crime. It's a massive operation, but the next day, there is nothing about it in the logbooks. To learn what really happened that night, Michael descends into the black heart of Los Angeles, where he will learn the truth about his father—if he's lucky enough to stay alive.

Optimum Drive Paul F. Gerrard, 2017-04-18 A champion racer and professional stunt driver reveals the secrets of peak performance in any endeavor. Optimum Drive is the complete step-by-step guide to maximizing human performance. As a professional racing driver and a driving coach for over twenty years, Paul F. Gerrard gives you his unique perspective on what causes people to stagnate with the idea of being merely good, when each of us has the potential to be great. Gerrard believes that peak performance is within our grasp. Gerrard helps you understand the mental toughness that it takes to reach that greatness. He starts off by taking you onto the track as he explores what driving at 200 mph can teach us about who we are. Using his experiences from behind the wheel at death-defying speeds, Gerrard breaks down the psychology of driving, what it takes, and how we can use it to achieve greatness in life. The key, he says, is the nirvana-like sensation of flow psychology, or being in the zone—a mental state in which one who is performing an activity is fully immersed in a feeling of energized focus, full involvement, and joy. It is through flow psychology that Gerrard introduces a blend of holistic mindset combined with a competitive edge, which is essential to successful

professional driving. This mix of guts, tenacity, and endurance is the foundation of Gerrard's philosophy for attaining greatness—and can be put to work for you too, on or off the track.

Let's Go for a Drive! Mo Willems, 2017 Elephant Gerald and Piggie want to go for a drive, but as Gerald thinks of one thing after another that they will have to take along, they come to realize that they lack the most important thing of all.

Velva Jean Learns to Drive Jennifer Niven, 2009-07-28 The New York Times bestselling author of *All the Bright Places*—soon to be a Netflix film starring Elle Fanning—presents a coming-of-age debut about ill-fated love during the Great Depression—and what it means to be a woman with ambition. Velva Jean's mother urged her to “live out there in the great wide world,” and growing up in Appalachia in the years before World War II, Velva Jean dreams of becoming a big-time singer in Nashville. Then she falls in love with Harley Bright, a handsome juvenile delinquent turned revival preacher. As their tumultuous love story unfolds, Velva Jean must choose between keeping her hard-won home and pursuing her dream of singing in the Grand Ole Opry. Like *All the Bright Places*, hailed as a “charming love story about [an] unlikely and endearing pair” (New York Times Book Review), Jennifer Niven's debut novel is a big-hearted story about the struggle to find happiness.

Future Drive Daniel Sperling, 2013-02-22 In *Future Drive*, Daniel Sperling addresses the adverse energy and environmental consequences of increased travel, and analyzes current initiatives to suggest strategies for creating a more environmentally benign system of transportation. Groundbreaking proposals are constructed around the idea of electric propulsion as the key to a sustainable transportation and energy system. Other essential elements

include the ideas that: improving technology holds more promise than large-scale behavior modification technology initiatives must be matched with regulatory and policy initiatives government intervention should be flexible and incentive-based, but should also embrace selective technology-forcing measures more diversity and experimentation is needed with regard to vehicles and energy technologies Sperling evaluates past and current attempts to influence drivers and vehicle use, and articulates a clear and compelling vision of the future. He formulates a coherent and specific set of principles, strategies, and policies for redirecting the United States and other countries onto a new sustainable pathway.

Memorial Drive Natasha Trethewey, 2020-07-28 An Instant New York Times Bestseller A New York Times Notable Book One of Barack Obama's Favorite Books of 2020 Named One of the Best Books of the Year by: The Washington Post, NPR, Shelf Awareness, Esquire, Electric Literature, Slate, The Los Angeles Times,

USA Today, and InStyle A chillingly personal and exquisitely wrought memoir of a daughter reckoning with the brutal murder of her mother at the hands of her former stepfather, and the moving, intimate story of a poet coming into her own in the wake of a tragedy At age nineteen, Natasha Trethewey had her world turned upside down when her former stepfather shot and killed her mother. Grieving and still new to adulthood, she confronted the twin pulls of life and death in the aftermath of unimaginable trauma and now explores the way this experience lastingly shaped the artist she became. With penetrating insight and a searing voice that moves from the wrenching to the elegiac, Pulitzer Prize-winning poet Natasha Trethewey explores this profound experience of pain, loss, and grief as an entry point into understanding the tragic course of her mother's life and the way her own life has been shaped by a legacy of fierce love and resilience. Moving through her mother's history in the deeply segregated South and through her own girlhood as a "child of miscegenation" in Mississippi, Trethewey plumbs her sense of dislocation and displacement in the lead-up to the harrowing crime that took place on Memorial Drive in Atlanta in 1985. Memorial Drive is a compelling and searching look at a shared human experience of sudden loss and absence but also a piercing glimpse at the enduring ripple effects of white racism and domestic abuse. Animated by unforgettable prose and inflected by a poet's attention to language, this is a luminous, urgent, and visceral memoir from one of our most important contemporary writers and thinkers.
