Republic of Drivers Cotten Seiler,2009-05-15 Rising gas prices, sprawl and congestion, global warming, even obesity—driving is a factor in many of the most contentious issues of our time. So how did we get here? How did automobile use become so vital to the identity of Americans? Republic of Drivers looks back at the period between 1895 and 1961—from the founding of the first automobile factory in America to the creation of the Interstate Highway System—to find out how driving evolved into a crucial symbol of freedom and agency. Cotten Seiler combs through a vast number of historical, social scientific, philosophical, and literary sources to illustrate the importance of driving to modern American conceptions of the self and the social and political order. He finds that as the figure of the driver blurred into the figure of the citizen, automobility became a powerful resource for women, African Americans, and others seeking entry into the public sphere. And yet, he argues, the individualistic but anonymous act of driving has also monopolized our thinking about freedom and democracy, discouraging the crafting of a more sustainable way of life. As our fantasies of the open road turn into fears of a looming energy crisis, Seiler shows us just how we ended up a republic of drivers—and where we might be headed.

Linux Driver Development for Embedded Processors - Second Edition Alberto de los Ríos,2018-10-31
LINUX DRIVER DEVELOPMENT FOR EMBEDDED PROCESSORS - SECOND EDITION - The flexibility of Linux embedded, the availability of powerful, energy efficient processors designed for embedded computing and the low cost of new processors are encouraging many industrial companies to come up with new developments based on embedded processors. Current engineers have in their hands powerful tools for developing applications previously unimagined, but they need to understand the countless features that Linux offers today. This book will teach you how to develop device drivers for Device Tree Linux embedded systems. You will learn how to write different types of Linux drivers, as well as the appropriate APIs (Application Program Interfaces) and methods to interface with kernel and user spaces. This is a book is meant to be practical, but also provides an important theoretical base. More than twenty drivers are written and ported to three different processors. You can choose between NXP i.MX7D, Microchip SAMA5D2 and Broadcom BCM2837 processors to develop and test the drivers, whose implementation is described in detail in the practical lab sections of the book. Before you start reading, I encourage you to acquire any of these processor boards whenever you have access to some GPIOs, and at least one SPI and I2C controllers. The hardware configurations of the different evaluation boards used to develop the drivers are explained in detail throughout this book; one of the boards used to implement the drivers is the famous Raspberry PI 3 Model B board. You will learn how to develop drivers, from the simplest ones that do not interact with any external hardware, to drivers that manage different kind of devices: accelerometers, DACs, ADCs, RGB LEDs, Multi-Display LED controllers, I/O expanders, and

Buttons. You will also develop DMA drivers, drivers that manage interrupts, and drivers that write/read on the internal registers of the processor to control external devices. To easy the development of some of these drivers, you will use different types of Frameworks: Miscellaneous framework, LED framework, UIO framework, Input framework and the IIO industrial one. This second edition has been updated to the v4.9 LTS kernel. Recently, all the drivers have been ported to the new Microchip SAMA5D27-SOM1 (SAMA5D27 System On Module) using kernel 4.14 LTS and included in the GitHub repository of this book; these drivers have been tested in the ATSAMA5D27-SOM1-EK1 evaluation platform; the ATSAMA5D27-SOM1-EK1 practice lab settings are not described throughout the text of this book, but in a practice labs user guide that can be downloaded from the book´s GitHub.
