**First Church of the Higher Elevations** Peter Anderson,2015-06-01 These contemplative essays, written for seekers and wanderers, explore the complexity of the scripture of place, the geography of the heart, the landscape of imagination, and the topography of memory. Thoughtful and rich in spirit, the book discusses a personal relationship to place and prayer. Dark, serious, joyful, and funny, it is a perfect companion on a trek through the woods or in the comfort of your own home.

**Elevations** Richard A. Cohen,1994-10-26 Elevations is a series of closely related essays on the ground-breaking philosophical and theological work of Emmanuel Levinas and Franz Rosenzweig, two of the twentieth century's most important Jewish philosophers. Focusing on the concept of transcendence, Richard A. Cohen shows that Rosenzweig and Levinas join the wisdom of revealed religions to the work of traditional philosophers to create a philosophy charged with the tasks of ethics and justice. He describes how they articulated a responsible humanism and a new enlightenment which would place moral obligation to the other above all other human concerns. This elevating pull of an ethics that can account for the relation of self and other without reducing either term is the central theme of these essays. Cohen also explores the ethical philosophy of these two thinkers in relation to Nietzsche, Husserl, Heidegger, Buber, Sartre, and Derrida. The result is one of the most wide-ranging and lucid studies yet written on these crucial figures in philosophy and Jewish thought.

**Elevation** Stephen King,2019-11-12 From legendary master storyteller Stephen King, a riveting story about “an ordinary man in an extraordinary condition rising above hatred” (The Washington Post) and bringing the fictional town of Castle Rock, Maine together—a “joyful, uplifting” (Entertainment Weekly) tale about finding common ground despite deep-rooted differences, “the sign of a master elevating his own legendary game yet again” (USA TODAY). Although Scott Carey doesn’t look any different, he’s been steadily losing weight. There are a couple of other odd things, too. He weighs the same in his clothes and out of them, no matter how heavy they are. Scott doesn’t want to be poked and prodded. He mostly just wants someone else to know, and he trusts Doctor Bob Ellis. In the small town of Castle Rock, the setting of many of King’s most iconic stories, Scott is engaged in a low grade—but escalating—battle with the lesbians next door whose dog regularly drops his business on Scott’s lawn. One of the women is friendly; the other, cold as ice. Both are trying to launch a new restaurant, but the people of Castle Rock want no part of a gay married couple, and the place is in trouble. When Scott finally understands the prejudices they face—including his own—he tries to help. Unlikely alliances, the annual foot race, and the mystery of Scott’s affliction bring out the best in people who have indulged the worst in themselves and others. “Written in masterly Stephen King’s signature translucent...this uncharacteristically glimmering fairy tale calls unabashedly for us to rise above our differences” (Booklist, starred review). Elevation is an antidote to our divisive culture, an “elegant whisper of a story” (Kirkus Reviews, starred review), “perfect for any fan of small towns, magic, and the joys and challenges of doing the right thing” (Publishers Weekly, starred review).

**Elevations** Max McCoy,2018-02-28 The upper Arkansas River courses through the heart of America from its headwaters near the Continental Divide above Leadville, Colorado, to Arkansas City, just above the Kansas-Oklahoma border. Max McCoy embarked on a trip of 742 miles in search of the river's unique story. Part adventure and part reflection, steeped in the natural and cultural history of the Arkansas Valley, Elevations is McCoy's account of that journey. Going by kayak when he can-by Jeep, on foot, or by other means when he has to-McCoy takes us with him, navigating the Arkansas River as it reveals its nature and tests his own. Along the way, and when he isn't battling the current for his overturned kayak; braving a frigid Christmas Eve along the river; or joining the search for a drowning victim, he steps out to explore the world beyond the river's banks. Here for instance is Camp Amache, where Japanese Americans were imprisoned during World War II. Here is Ludlow, where thirteen women and children died in a standoff between striking coal miners and the militia in 1914. Farther along we find Sand Creek, site of a massacre by US soldiers in 1864, and, uncomfortably close, Garden City, where white supremacists were charged with planning a terror attack on Somali refugees in 2016. Whether traveling back in time, pausing in the present, or looking forward, Elevations captures the Arkansas River in its thrilling moments and placid stretches, in its natural splendor and degradation at human hands. The book shows us the river as a flowing repository of human history and, in the telling of this gifted writer, as a life-changing experience.

**Key Contemporary Buildings** Rob Gregory,2008 Third in the Key series, this book features 95 buildings of the early twenty-first century ... Each of the buildings is illustrated with one or two full-color photographs and accurate scale floor plans, elevations, and sections, as appropriate.

**All Elevations Unknown** Sam Lightner Jr.,2001-09-18 "In 1999, when mankind had successfully mapped the surface of the Moon, Venus, and Mars, there were still sections of Borneo that man had nothing to say about other than 'all elevations unknown.'" In the spring of 1999, armed with little more than a description from a book and a map labeled "all elevations unknown," Sam Lightner and his German rock-climbing buddy, Volker, found themselves deep in the jungles of Borneo on a mission to climb a mountain that was only rumored to exist. They had only their climbing expertise to rely on and a copy of a little-known book titled World Within, written by Major Tom Harrison, a British World War II soldier who had been one of the first white men ever to explore the interior jungles of the island and interact with its native peoples. He had also conducted one of the most daring and unusual campaigns in military history: In 1945, he had been assigned the near-impossible mission of parachuting blindly into the thick Borneo rain forests to unite the feuding native tribes-who then had a grisly habit of cutting off heads-against the Japanese in order to reclaim the island for the Allies. A captivating, utterly original combination of travel-adventure memoir and historical re-creation, All Elevations Unknown charts Lightner's exhilarating, often harrowing quest to ascend the mountain Batu Lawi in the face of leeches, vipers, and sweat bees, and to keep his team together in one of the earth's most treacherous uncharted pockets. Along the way, Lightner reconstructs a fascinating historical narrative that chronicles Tom Harrison's adventures on Borneo during the war and illuminates an astonishing piece of forgotten World War II history. Rife with suspense and vivid detail, the two intertwining tales open up the island of Borneo, its people, and its history in a powerful, unforgettable way, and take adventure writing to new heights. A daring twist on the travel-adventure genre that places the talented Lightner in the ranks of authors such as Jon Krakauer, Sebastian Junger, and Redmond O'Hanlon, All Elevations Unknown is ultimately the remarkable story of two adventurers, separated by fifty years and united

by one mountain.

**Elevations to the Heart of Jesus** F. F. Doyotte,1875

Climatic Change at High Elevation Sites Henry F. Diaz,Martin Beniston,Raymond S. Bradley,2013-04-17 This book provides a unique, in-depth view of past, present and potential future climatic change in mountain regions, and in particular on the mechanisms which are responsible for this change. Other books which focus on environmental change in mountains focus more generally on the impacts of this change on mountain systems, rather than on the regional features of climatic change itself. The book enters into a high level of detail concerning results of international investigations which involve specialists from numerous climate-related disciplines. The book can be used in an academic and research context, for advanced graduate and doctoral students, as well as researchers working in various domains of relevance to climatic change issues. The book also has relevance in the context of future activities of the Intergovernmental Panel on Climate Change (IPCC), in terms of providing up-to-date knowledge of fundamental mechanisms and consequences of climatic change in mountain regions.
