FTP Protocol Noite.pl, File Transfer - FTP Micro-course concentrates on operation of FTP - the protocol used to transfer files over the Internet. - It is the oldest protocol, which main task is two-way file transfer. Nowadays more and more popular are HTTP protocols - small files are downloaded directly from a web page or the BitTorrent protocol is used for the propagation of large files. However, for example, when creating a file repository for third party company (eg leaflets, high-resolution product images) the FTP is still unreplaceable. The course describes how to test the FTP server on the basis of information about the operation of this protocol. The course also explains why some older firewalls cannot handle this protocol and how to fix it.

Big Book of Internet File Transfer RFCs ,2000 File Transfer Protocol (FTP) was one of the first applications implemented on the Internet, and it is also one of the most fundamental. Almost all Internet hosts support it, as do almost all browsers. This volume offers exhaustive coverage of the rules governing how clients and servers communicate to enable successful data transfers via FTP. In addition to documentation of file transfer mechanics, readers will find practical instructions on many special techniques, including using file transfers for network booting and the security issues relating to file transfer over the Internet. Despite the growing acceptance of protocols specific to the Web, there remain many scenarios in which simple file transfer offers clear-cut advantages. Thus, this book is certain to prove an important source of information for years to come. Fixed-Term Parliaments Bill Great Britain: Parliament: House of Lords: Select Committee on the Constitution,2010-12-16 This report considers the Fixed-term Parliaments Bill which would remove the Prime Minister's power to call an election at the time of his choosing, and sets a five year fixed term, subject to the possibility of early dissolution following a vote by the House of Commons. It examines the key issues of the Bill's principals as well as the process by which it was brought forward. The Committee takes the view that the origins and content of the Bill owe more to short-term considerations than to a mature assessment of enduring constitutional principles or sustained public demand. In the view of the majority of the Committee, the shift from a five year maximum to five year norm would inconsistent with the Government's stated aim of making the legislature more accountable; with existing constitutional practice; and with the practice of the devolved institutions and the clear majority in international legislatures. However the Committee does accept that an elected government should have a full term in which to develop their policies and take their legislative programme through Parliament. It considers a four year term should be adopted for any fixed-term arrangement at Westminster. Potential date clashes with elections to the devolved institutions should also be avoided. Some form of safety valve which would allow for an early election in circumstances such as the government losing the confidence of the Commons or where a political or economic crisis has affected the country is also necessary. The report also makes several specific recommendations for amendments for the Bill.
