**The Big Fat Secret** John Mckenna, 2013-09-21 John Mckenna brings all his scientific and medical training to the fore in writing this book which deals with certain critical issues facing western society. He explains in simple language how the statistics are showing that all of us are slowly gaining weight. He explains that this sudden increase in weight can be traced back to two decisions made by politicians in the US in the mid-1970s. These politicians altered the way in which food was manufactured and in so doing altered the health of everyone on a western diet. As a result we now have an obesity crisis in many western nations. John goes on to explain how these changes in processed foods have altered how the body handles food and leads to a fatty liver, diabetes and obesity. He also explains why the authorities are silent about the real cause of obesity and why the medical approach of eat less fat and exercise more has had no effect on the epidemic. The book goes on to explain effective treatment in the form of diet and explains which supplements are helpful. There is also a chapter dealing with how one's emotional state has a direct impact on the progression of the disorder. To the point, insightful and informative - The Big Fat Secret will provide the answers to your questions and change the way you look at certain foods... for good!

*Diabetes Technology* Boris Draznin, 2019-06-17 We live in a century of technological revolution and the birth of artificial intelligence. The problem is that diabetes-related technology is moving ahead much faster than physicians and other healthcare professionals can incorporate these advances into our practices. Diabetes Technology will consist of three parts: Part I addresses the clinical science of diabetes pumps, continuous glucose monitoring and communication technology with numerous practical aspects. Part III offers personal stories of healthcare providers who treat their own diabetes with modern diabetes technology. In particular, they will address how and why they decided to use this technology and the positive and negative aspects of their decision.

I've been on a mission to expose the half-truths and lies within the fitness, health, big-pharma, agriculture, sports, and diet and celebrity industries including government and why they don't want this information as common consumer knowledge. To reveal it is considered taboo by my colleagues and unwelcomed by the marketplace. However I can't sit idly by and watch the charlatans put the next generation's health at risk for the sake of profit. My only regret, taking so long to write the book. After each chapter I relate my mobility and pain depression challenges after being diagnosed with Avascular Necrosis (AVN) bone disease. That's right, through my immobility adversity misfortune you also learn how to apply a customized fit healthy habit program to live life to the fullest regardless of ailment. This timeless
