STEM Gems Stephanie Espy, 2016-06-06 Tired of seeing the same careers foisted upon women in TV, movies and magazines? Chemical engineer Stephanie Espy, a graduate of MIT, UC Berkeley and Emory University, tells the stories of 44 inspiring women in STEM to show girls and young women around the world a new set of women heroes to look up to. The statistics for women in Science, Technology, Engineering and Mathematics (STEM) careers are just plain sad. In recent years, fewer than 20% of college graduates in engineering and computer science were women. While stereotypes pervade about women in these fields, the truth is that most girls have never even heard of these careers and are not aware of the wide range of options that exist. In *STEM Gems*, you and your daughter, niece, neighbor, friend or student will discover: The stories of 44 inspiring women in diverse STEM fields and how they made it; The challenges these incredible women faced in pursuit of their dreams; The tremendous accomplishments these Gems have achieved in their respective STEM fields; Advice on how to pursue science, technology, engineering and mathematics careers; Actionable steps girls and young women can take right now to set themselves up for success; What girls and young women can expect in a promising STEM career, and much, much more! Through the powerful stories of the *STEM Gems* in this book, girls and young women will have their pick of current role models of various ages, ethnicities and job types. And through the eight chapters that outline actionable steps, girls and young women will learn what they can do right now, today, to set themselves up for success and to create their own unique paths. *STEM Gems* is relatable, encouraging and inspiring, demonstrating the limitless possibilities for the next generation of women.

Parched D.P. Payne, Gwyn McNamee, 2018-10-04 A wendigo controlled by a curse. An insatiable mystery woman. One sexy, crazy ride. Greed. For the last 4,000 years, it's been my curse. Every day, I live with the repercussions of the terrible choices I made. I thought I'd seen it all...then a black aura crosses my path. The beautiful woman it belongs to sends my world into a tailspin. She gets under my skin, hypnotizing me with her adventurous and kinky nature. I almost forget I know nothing about her. Thinking with the wrong head can certainly get a man in trouble, but in this case, it could mean an end worse than my curse. *Parched* is a complete stand-alone full of steamy scenes and supernatural creatures.

Gems François Farges, 2020-09-01 Enter into the fascinating world of precious gems through this unique volume that brings together the wonders of mineralogy and masterpieces of jewelry. Both a reference book and an exhibition catalog, *Gems* unveils the fascinating world of minerals and gems through a dialogue between the prestigious collections of the Muséum national d'histoire naturelle in Paris and the great French jeweler Van Cleef & Arpels. The Muséum national d'histoire naturelle in Paris welcomes the exhibition *Gems* from September 16, 2020–May 4, 2021. This beautifully illustrated volume brings together an international team of mineralogists, scientists, and specialists in natural history and in the history of jewelry, under the editorial direction of François Farges, to explore the diversity of the mineral universe through an exceptional selection of geological specimens (some published here for the first time), legendary gems, and exceptional ornaments created throughout history. Raw crystals, cut stones, and jewelry are compared and contrasted, shedding light on both the natural wonders made by the Earth itself and the virtuoso creations of human hands that transform them into works of art.

behind the world's greatest gems are brought to life by the curator of the Smithsonian's National Gem Collection Dr. Jeffrey E. Post, curator of the National Gem Collection for more than 25 years, separates fact from fiction in an all-new and original book, revealing fresh information and regaling the reader with anecdotes and tales of some of the world's greatest and most famous gemstones. Dr. Post is the author of the now out-of-print book *The National Gem Collection* (Abrams, 1997), which has sold more than 50,000 copies. In this brand-new book, he tells the stories of the Smithsonian's most famous gems, including the Hope Diamond, Star of Asia Sapphire, Carmen Lucia Ruby, Hooker Emerald, and Blue Heart Diamond—and also presents the tales, details, and fascinating facts surrounding rarely displayed gems from the Smithsonian vault and additions made to the collection since 1997. Not only a resource for learning about rare and beautiful gems, the book also presents the stories of the people who once owned or were associated with these jewels—from ordinary people to kings, emperors, maharajas, celebrities, and captains of industry.

This detailed text, accompanied by colorful photographs, informs readers about the remarkable processes that take place under the surface of Earth to form different kinds of gems. They'll also learn how some gems are mined, while others are replicated in laboratories. Future lapidaries will also find out how they might find and polish gems for themselves.
