Patient H.M. Luke Dittrich, 2016-08-09 "Oliver Sacks meets Stephen King"* in this propulsive, haunting journey into the life of the most studied human research subject of all time, the amnesic known as Patient H.M. For readers of *The Immortal Life of Henrietta Lacks* comes a story that has much to teach us about our relentless pursuit of knowledge. Winner of the PEN/E.O. Wilson Literary Science Writing Award • Los Angeles Times Book Prize Winner NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post • New York Post • NPR • The Economist • New York • Wired • Kirkus Reviews • BookPage In 1953, a twenty-seven-year-old factory worker named Henry Molaison—who suffered from severe epilepsy—received a radical new version of the then-common lobotomy, targeting the most mysterious structures in the brain. The operation failed to eliminate Henry's seizures, but it did have an unintended effect: Henry was left profoundly amnesic, unable to create long-term memories. Over the next sixty years, Patient H.M., as Henry was known, became the most studied individual in the history of neuroscience, a human guinea pig who would teach us much of what we know about memory today. Patient H.M. is, at times, a deeply personal journey. Dittrich's grandfather was the brilliant, morally complex surgeon who operated on Molaison—and thousands of other patients. The author's investigation into the dark roots of modern memory science ultimately forces him to confront unsettling secrets in his own family history, and to reveal the tragedy that fueled his grandfather's relentless experimentation—experimentation that would revolutionize our understanding of ourselves. Dittrich uses the case of Patient H.M. as a starting point for a kaleidoscopic journey, one that moves from the first recorded brain surgeries in ancient Egypt to the cutting-edge laboratories of MIT. He takes readers inside the old asylums and operating theaters where psychosurgeons, as they called themselves, conducted their human experiments, and behind the scenes of a bitter custody battle over the ownership of the most important brain in the world. Patient H.M. combines the best of biography, memoir, and science journalism to create a haunting, endlessly fascinating story, one that reveals the wondrous and devastating things that can happen when hubris, ambition, and human imperfection collide. "An exciting, artful blend of family and medical history."—The New York Times *Kirkus Reviews (starred review)

HM Courts Service Great Britain. National Audit Office, 2009 The Crown Court operates from around 500 court rooms at almost 100 locations around England and Wales. In 2007 it heard 135,000 criminal cases, including the most serious cases, up 5 per cent from 2005. Some Crown Court locations in London and parts of the South East are running at, or close to, full capacity, which can increase waiting times affecting victims, witnesses and other parties in a court case. At some locations HM Courts Service has used magistrates' court rooms to reduce the shortage of Crown Court rooms. It has also transferred blocks of cases between different locations. HM Courts Service is planning to spend £120 million to increase the number of Crown Court rooms by 30 (6 per cent) over the next three years. HM Courts Service should improve its assessment of future Crown Court workload and finalise a standard way of assessing the court rooms needed to meet that workload. For 2009-10, onwards HM Courts Service has established a new staffing model - the first since 2004-05 - for determining staff levels. It is also working with the Ministry of Justice to improve learning and development programmes for Crown Court staff. Improvements are needed to the two main Crown Court IT systems. The case management system - CREST - is 20 years old and is no longer supported by the manufacturer, bringing operational risks. The XHIBIT system provides real time information on the progress of trials and records results, but it needs greater flexibility to respond to changes in legislation. XHIBIT is not currently able to accommodate new or revised forms when they are introduced.

H. M. Pulham, Esquire John P. Marquand, 2015-07-14 A Harvard reunion prompts a Boston Brahmin's search for meaning in this comedy of manners by the #1 New York Times—bestselling author of *Point of No Return*. In preparation for the twenty-fifth reunion of his class at Harvard, Harry Pulham is asked to collect and edit the personal histories of his fellow alumni. A glance at the previous year's class book tells him just how tedious the assignment will be: "I have been very busy all this time practising corporation law and trying to raise a family," a typical entry reads. "I still like to go to the football games and cheer for Harvard." Harry's autobiography is almost indistinguishable from those of his classmates. From his career at a Boston investment firm to his marriage to childhood friend Kay Motford, he has always made the safe, familiar choice—with one exception. For a brief interlude after World War I, Harry joined an advertising agency in Manhattan and fell in love with a beautiful, independent woman unlike anyone he had ever met. A wholly unexpected future opened up for him in those few months, but when family obligations called him back to New England, the relationship came to a sudden end. Now, twenty years later, Harry believes that his story could not have turned out any other way. A clever satire that achieves heartbreaking poignancy, *H. M. Pulham, Esquire* is a masterpiece from the author declared by the New York Times to be "our foremost fictional chronicler of the well-born."

Hall of Smoke H.M. Long, 2021-01-19 Epic fantasy featuring warrior priestesses, and fickle gods at war, for readers of Brian Staveley's *Chronicles of the Unhewn Throne*. Epic fantasy featuring warrior priestesses and fickle gods at war, for readers of Brian Staveley's *Chronicles of the Unhewn Throne*. Hessa is an Eangi: a warrior priestess of the Goddess of War, with the power to turn an enemy's bones to dust with a scream. Banished for disobeying her goddess's command to murder a traveller, she prays for forgiveness alone on a mountainside. While she is gone, raiders raze her village and obliterate the Eangi priesthood. Grieving and alone, Hessa - the last Eangi - must find the traveller and atone for her weakness and secure her place with her loved ones in the High Halls. As clans from the north and legionaries from the south tear through her homeland, slaughtering everyone in their path Hessa strives to win back her goddess' favour. Beset by zealot soldiers, deceitful gods, and newly-awakened demons at every turn, Hessa burns her path towards redemption and revenge. But her journey reveals a harrowing truth: the gods are dying and the High Halls of the afterlife are fading. Soon Hessa's trust in her goddess weakens with every unheeded prayer. Thrust into a battle between the gods of the Old World and the New, Hessa realizes there is far more on the line than securing a life beyond her own death. Bigger, older powers slumber beneath the surface of her world. And they're about to wake up.

The HM Learning and Study Skills Program Judy Tilton Brunner, Matthew S. Hudson, 2013-11-21 The HM Learning and Study Skills Program: Level II was designed to provide an introduction to learning and study skills for 8th, 9th, and 10th grade students through a series of activity-oriented units. It is structured on the assumption that an activity-oriented lesson is the most effective instructional strategy for the teaching of study skills: more succinctly, that "learning by doing" is the best way 'study smart'. The Level II Teacher's Guide includes a pretest, a wide variety of teaching suggestions, unit summaries, activities for retrieval and closure as well as teaching adaptations through the use of technology. It was published to help teachers assist students in the development of essential study skills and to reinforce their existing strategies that work. The Program supports academic independence for students that have a wide range of ability with college and career readiness as a tangible and realistic goal.

HM Treasury Great Britain: Parliament: House of Commons: Committee of Public Accounts, 2013-02-15 The Treasury acts as both the finance ministry and economic ministry but it appears to neglect its role as finance ministry. Its own accounts are impenetrable and there are many instances of poor decision making by departments, which the Treasury could and should have prevented. While staff turnover fell in 2011-12, it is still very high. Furthermore, the Treasury remains committed to cutting its headcount by a third and there are still very few women at senior levels. The support provided to banks in the last crisis helped prevent the banking system from collapse. The Treasury has successfully withdrawn nearly all of the taxpayer guarantees to banks but the taxpayer still owns some £66 billion of shares in RBS and Lloyds, a sum which is yet to be recovered. The Treasury has not convinced that it understands either the risks it has taken on by indemnifying the Bank of England against losses on Quantitative Easing or the expected economic benefits. Some £375 billion has so far been injected into the economy as an 'experiment' but the Department could not explain what the effect has been on the whole economy or on different parts of society. The National Loans Guarantee Scheme achieved just 15 per cent of its intended take-up and has now been superseded by a more generous Bank of England scheme. The Treasury needs to be clear what it wants this Bank of England scheme to achieve, and how it intends to monitor it.

HM Government: Scotland Analysis: Assessment of a Sterling Currency Union - Cm. 8815 Great Britain: H.M. Treasury, 2014-02-13 This assessment finds that the UK is a successful union because taxation, spending, monetary policy and financial stability policy are co-ordinated across the whole UK. It means risks are pooled, there is a common insurance against uncertainty and no one area or sector of the larger economy is too exposed. Within a sterling currency union, an independent Scottish state would find it more difficult to adjust to the effects of economic challenges. The continuing UK would become unilaterally exposed to much greater fiscal and financial risk from a separate state. Greater fiscal risk would come from UK taxpayers being asked to support the wider economy of another state and also financial risk were banks from that state to fail. The experience of the euro area in the financial crisis highlighted the challenges of creating a durable and effective currency union, illustrated by the very difficult economic adjustments required by some members and the financial risks that have been accepted by other members and their taxpayers. On the basis of the scale of the challenges, and the Scottish Government's proposals for addressing them, HM Treasury would advise the UK Government against entering into a currency union. There is no evidence that adequate proposals or policy changes to enable the formation of a durable currency union could be devised, agreed and implemented by both governments.

The Future of HM Coastguard in Scotland Great Britain: Parliament: House of Commons: Scottish Affairs Committee, 2012-11-15 This report expresses concern about the decision to close two of Scotland's Maritime Rescue Co-ordination Centres and says Government must do more to explain the rationale for the decision and how it will ensure that the same high standard of service is maintained, with fewer resources. Despite an extensive Government consultation, those on the front line felt they had been excluded from the process. There has been no satisfactory explanation for the decision to close Clyde and Forth MRCCs, which will leave the central belt of Scotland, where the population is most densely concentrated, without a Coastguard station. The Committee is particularly concerned at the loss of local knowledge resulting from the closures. Both the Minister and the Chief Executive of the Maritime and Coastguard Agency have assured the Committee that robust and extensive testing was being done before the closure of Clyde Maritime Rescue Co-ordination Centre to ensure that the stations taking over its area of responsibility would do so seamlessly and continue to provide the level of search and rescue cover which the public has a right to expect. The Committee understands the Government's argument that the changes are intended to allow HM Coastguard to do more, better, with less, and says it hopes that this is indeed the case. The Government must keep the Committee updated on the impact of the proposed changes, and provide reassurance after 31 December 2012 that the Scottish coastline is still being served to the same high standard as before.

Departmental report 2007 H.M. Revenue & Customs Great Britain: H.M. Revenue & Customs, 2007-05-25 Dated May 2007. On cover: Integrating and growing stronger. Spring 2007

HM Revenue and Customs Great Britain: Parliament: House of Commons: Committee of Public Accounts, 2010-02-25 This report examines the following issues: claiming the additional tax allowances available to older people; administering tax for older people; and providing cost-effective support for older people. Older people are a significant and growing group for HM Revenue & Customs (HMRC), making up 18 per cent of taxpayers, with 5.6 million liable for income tax. Older people are poorly served by the Department. Errors occur because people's tax

affairs often become more complicated when they reach pension age, and HMRC's systems do not cope well with their multiple sources of income. For example, an estimated 1.5 million older people have overpaid tax by £250 million because of discrepancies between the Department's records and those of their employers and pension providers. Older people may also be paying too much tax because they do not claim additional tax allowances available. Some 2.4 million older people have also overpaid around £200 million in tax because they did not have their savings income paid gross of tax. HMRC should devise simpler systems so that older people can have peace of mind about their tax affairs and it should have a more coherent plan for meeting the needs of older people efficiently and effectively. It costs the Department twice as much on average to deal with an enquiry from an older person compared to those from other taxpayers because their enquiries tend to be more complicated. HMRC should safeguard opportunities for face-to-face contact which older people often prefer.

HC 624 - Appointment of HM Chief Inspector of Prisons and HM Chief Inspector of Probation Great Britain. Parliament. House of Commons. Justice Committee, 2015-11-27 The Report follows a pre-appointment scrutiny hearing which the Committee held on Tuesday 24 November with Mr Peter Clarke, the Secretary of State's preferred candidate for HM Chief Inspector of Prisons, and Glenys Stacey, the preferred candidate for HM Chief Inspector of Probation.

HM Revenue & Customs Great Britain: Parliament: House of Commons: Committee of Public Accounts, 2011-12-20 HM Revenue & Customs faces a huge challenge to resolve long-standing problems with the administration of PAYE and tax credits while making substantial reductions to its running costs. The Department needs to stabilise its administration of PAYE following the problems encountered after a new processing system was introduced in 2009. It also needs to recover a significant amount of outstanding tax credit debt while minimising the amount of new debt being accumulated. While £900 million extra has been allocated to tackle tax avoidance, at the same time, following the 2010 Spending Review, the Department is required to reduce its running costs by £1.6 billion over the next four years. The Department has made progress in improving PAYE administration since the Committee's last examination of this area in 2010. However, as a consequence of the Department's handling of the 2009 transition to the new PAYE Service, it has had to forgo up to £1.2 billion of income tax underpaid from 2004-05 to 2009-10. Under current plans, it will take until 2013 before all processing backlogs are cleared and the new PAYE Service is operating as intended. The Department needs to focus on improving data quality in particular to sustain progress in PAYE administration. Without a clear plan for reducing tax credit debt, the level of uncollected debt will continue to rise to an estimated £7.4 billion by 2014-15. The Department has been forced to acknowledge that much of this debt will never be recovered from tax credit claimants, and recently wrote off some £1.1 billion of debt dating back to the introduction of the scheme.

Hm Revenue and Customs House of Commons Public Accounts Commi, 2009-03-24 In this report the Committee of Public Accounts examines HM Revenue and Customs' (the Department) administration of tax credits and also examines the Department on its collection of income tax through PAYE and Self Assessment. The Department overpaid £7.3 billion in the first four years of the tax credits scheme and underpaid more than £2.0 billion. By the end of March 2008, it had collected £2.7 billion (37 per cent) of this debt and written off £1 billion (14 per cent). £3.6 billion of the total of overpayments are outstanding and the Department is unlikely to recover £1.8 billion. Overpayments continue to affect many people, including some of the most vulnerable in society. Claimants are not given the support they need in making claims and too much is assumed on the part of claimants in their understanding the complex tax credits system. Tax credits suffer from high rates of error and fraud: in 2006-07 claimant error and fraud is estimated to have led to incorrect payments of between £1.31 billion and £1.54 billion. In 2007-08, the Department collected £225 billion in income tax and national insurance contributions through the Pay As You Earn (PAYE) system. The planned transfer of the administration of PAYE to its National Insurance Recording System has been delayed, adding to the backlog of tax cases - currently 16 million - that must be checked manually. In 2007-08, the Department collected £30.2 billion (net) through the Self Assessment system. A total of 46 per cent of Self Assessment returns were filed online, significantly exceeding the 35 per cent target, though some 34 per cent of filed returns may be inaccurate, putting between £2.9 billion to £3.7 billion tax at risk.

HM Customs and Excise Standard Report 2003-04 Great Britain: Parliament: House of Commons: Committee of Public Accounts, 2005-12-06 HM Customs and Excise (now part of HM Revenue and Customs) collected £162 billion of gross receipts in 2003-04 in value added tax (VAT) and excise and customs duties from over 1.8 million business traders. The Committee's report examines the NAO standard report on the work of the Department during 2003-04 (contained within the 95th report of the Commissioners of Her Majesty's Customs and Excise for 2003-04, published as HCP 119, session 2004-05, ISBN 0102931593 in December 2004). It makes a number of recommendations focusing on work related to the two key revenue streams of VAT (which generates £63.6 billion net) and hydrocarbon oils, mainly on petrol and diesel fuel (which provides £12.7 billion and £9.8 billion respectively).

HM Revenue & Customs' Transformation Programme Great Britain. National Audit Office, 2008 Eighteen months into an ambitious programme to transform HMRC, the Department has spent £851 million and achieved estimated benefits of £2.4 billion. These benefits are mainly from activities already underway when the programme began. Changes to funding have led the Department to revise and postpone parts of the programme, and the overall benefits expected carry high levels of uncertainty. A report out today by the National Audit Office found that most of the £11.5 billion benefits are expected to come from an increased tax yield (£6.3 billion) and transaction savings to business and government (£4.1 billion). The estimate of additional tax yield is volatile and assumes collection in full. The Department has made progress in developing its systems and processes and enhanced its project and financial management skills to deliver the programme. For most programmes it has developed governance processes and set out responsibilities for managing the projects. It delivered, as planned, one major programme in the first 18 months and has implemented parts of other programmes. It is taking action to improve implementation plans and milestones, risk management and contingency plans for some other programmes. A major driver of the programme is the Department's targets to achieve efficiency savings of 5 per cent a year. Changes in funding and content of the programme during 2007-08 delayed the completion of the business cases for individual programmes. The Department has approved business cases for 10 programmes and plans to complete the remaining three over Summer 2008. Finalising the component parts of the transformation programme is a critical step, particularly as the Department expects the funding available to peak in 2008-09 and reduce thereafter. Changing the culture of the Department to

become more customer-focused is an important part of the programme. In any change programme staff satisfaction might be expected to decline and recent surveys indicate morale remains at a low ebb. The Department needs to more actively demonstrate the benefits to its staff and manage the expectations of customers as many of the improvements for them are scheduled for 2011 and beyond.

Hm Revenue and Customs' Estate Private Finance Deal Eight Years On Great Britain: Parliament: House of Commons: Committee of Public Accounts,2010 A NAO report published as HC 30, Session 2009-10.

HM Government: Scotland Analysis: Security - Cm. 8741 Great Britain: Scotland Office,2013-10-29 This paper analyses the UK's approach to identifying and managing threats to the national security of the UK, and the implications for these arrangements of a vote for independence. It complements analysis of the UK's approach to defence explored elsewhere in the Scotland analysis series. It is clearly in the UK's interests to be surrounded by secure and resilient neighbouring countries, including - in the event of a yes vote - an independent Scottish state. While the UK endeavours to work with other countries and international organisations to improve security and fight organised crime for everyone's mutual benefit there is something qualitatively different about being influential and intimately connected with the rest of the UK by being a part of it. Issues of national security are of the utmost sensitivity, linked to a country's foreign, security and defence policy posture, and any decisions are closely related to matters of sovereignty and democratic accountability. For this reason, a security union is closely connected to the existence of a political union. The creation of an independent Scottish state would see an end to the current arrangements for ensuring Scotland's security, as Scotland, including Police Scotland, would no longer be part of the UK's national security infrastructure and capabilities. In practical terms this means that the present level of strategic and operational communication and co-ordination that occurs everyday across the UK, with Scotland playing a key role within it - whether concerned with counter-terrorism, fighting serious and organised crime or protecting against cyber threats - would end
